Assignment Week #: 2

Please answer the following questions about this week:

1) How long did you spend working only on chem this week? Be honest.

2) What is something new you learned in chem class this week?

3) Was there anything difficult about it? Explain.

4) How is chem class this week related to something outside of chem class? Another class or an experience from your life?

5) What is a question you have based on chem class this week? Something you are curious about or wonder about, not something you were supposed to learn/do but didn't.

6) How are you doing this week?
