

Spiraling STAAR Review - Grade 5

This document contains forty (or so) ready-made 15-20 minute activities to provide daily review of the Readiness standards (plus TEKS 5.3I) prior to the 5th grade Math STAAR in April. The activities are listed in the order of the standards. Please select and use activities based on the needs and priorities of your class.

Look in the Notes sections of the slideshows for facilitation directions. Most activities are low to no prep. Some require printing a few pages, so be sure to preview activities before facilitating. If you would like to edit any of the files, feel free to download a copy or, if you have a Google account, make a copy in your Drive.
