How do you decompose fractions?

In this lesson you will learn how to decompose a fraction by breaking up the fraction into a sum of fractions.

Let's Review

Fractions can be shown in different ways.

Let's Review

Numerator: How many parts you have

Denominator: How many equal parts make up a whole

Using your manipulatives, show another way to decompose the fraction $\frac{5}{6}$.

Write the equation on your white board.

Using your manipulatives, show another way to decompose the fraction $\frac{5}{6}$.

Write the equation on your white board.

Discuss your equation with your classmates. How many different equations did you make?

Using your manipulatives, show another way to decompose the fraction $\frac{7}{8}$.

Write the equation on your white board.

Using your manipulatives, show another way to decompose the fraction $\frac{7}{8}$.

Write the equation on your white board.

Discuss your equation with your classmates. How many different equations did you make? LEARN ZILLION

Which fraction does this decomposition represent? $\frac{1}{q} + \frac{1}{q} + \frac{1}{q}$

Which fraction does this decomposition represent? $\frac{4}{9} + \frac{1}{9} + \frac{1}{9} + \frac{1}{9} = \frac{4}{9} + \frac{1}{9} + \frac{1}{9} + \frac{1}{9} + \frac{1}{9} + \frac{1}{9} + \frac{1}{9} = \frac{1}{9} + \frac{1}$

In this lesson you learned how to decompose a fraction by breaking up the fraction into a sum of fractions.
