1. Mr. Thomas organizes 16 binders into stacks of 4. How many stacks does he make? Draw and label a number bond to solve.

**NOTE:** This question is better suited for a tape diagram since it is a measurement type. In this case a number bond does not make it easy to use a question mark.

$$16 \div 4 = 4$$

$4 \times 4 = 16$  Mr. Thomas makes 4 stacks.

2. The chef uses 28 avocados to make 4 batches of guacamole. How many avocados are in 2 batches of guacamole? Draw and label a tape diagram to solve.

**NOTE:** Since this question is partitive, it is perfect for using a number bond.

$$28 \div 4 = 7 \quad 7 \text{ avocados in 1 batch.}$$

$$7 \times 2 = 14$$

There are 14 avocados in 2 batches.
