

Enrichment Worksheet 1-5

Target Practice

In this activity, your target is an estimate and you take aim with a set of digits. It is your job to create a division problem whose answer is as close as possible to the target. For example, this is how you might aim at the target shown at the right.

$$54 \div 9 = 6, \text{ so } 540 \div 9 = 60.$$

537 is very close to 540, so

$537 \div 9$ would be very close to 60.

Answer: $\boxed{5} \boxed{3} \boxed{7} \div \boxed{9}$

digits: 3, 5, 7, 9

$$\boxed{} \boxed{} \boxed{} \div \boxed{}$$

Use the digits to create a division problem whose answer is as close as possible to the target. Each of the given digits should be used exactly once.

1.

digits: 2, 4, 6, 8

$$\boxed{} \boxed{} \boxed{} \div \boxed{}$$

2.

digits: 3, 4, 5, 6

$$\boxed{} \boxed{} \boxed{} \div \boxed{}$$

3.

digits: 1, 3, 4, 6

$$\boxed{} \boxed{} \boxed{} \div \boxed{}$$

4.

digits: 1, 3, 4, 6

$$\boxed{} \boxed{} \boxed{} \div \boxed{}$$

5.

digits: 0, 3, 5, 9

$$\boxed{} \boxed{} \boxed{} \div \boxed{}$$

6.

digits: 0, 2, 4, 5

$$\boxed{} \boxed{} \boxed{} \div \boxed{}$$

7. **CHALLENGE** Use the digits 0, 2, 4, 6, and 8 to create six different division problems whose answers are close to 500. In each division, each digit can be used exactly once.
