

2C Cover Up

Open the instructions for how to play the game.

When you open the game board, you will need to click on the link to play the game. (The game board is on the 2nd page. Look to the bottom right corner to navigate between the directions and digital gameboard.)

Cover Up

2C

Materials: Spinner Overlay pencils recording sheets

Directions:

1. Player take turns spinning the same spinner. The player that spun the higher number, goes first.
2. The first player spins the spinners and draws an array with those dimensions on their grid.
3. The player explains to their partner how to find the product represented by the array (the area of the array).
4. The player writes the total product on the array and writes the equation on the line under the grid.
5. Play continues until each player has had 4 turns.
6. At the end of the game, players add their products. **+**
They player whose total is closest to 100, wins!

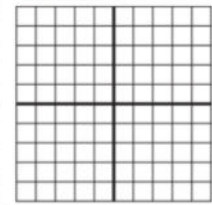

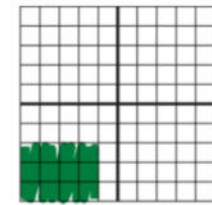

Unit 2 Module 2 | Session 9 of the class set, stored in the Work Place bin
