

## Work Place Instructions 3C Round Ball Hundreds

### Each pair of players needs:

- 1 Round Ball Hundreds Record Sheet to share
- 1 deck of Number Cards with 10s and wild cards removed
- scratch paper

- 1 Players shuffle the remaining cards in the deck and place them face-down in a stack.
- 2 Player 1 draws 3 cards off the top of the deck and arranges them to make a 3-digit number. She rounds them to the nearest hundred and records the 3-digit number she made in the appropriate basket.

In the example below, 8, 4, and 6 have been used to make 846. Rounded to the nearest 100, it would be 800, so 846 is recorded in the basket marked 800.

- 3 Player 1 puts the used cards in a discard pile and Player 2 draws 3 new cards, arranges them, rounds the number to the nearest hundred, and records this number in the appropriate basket.
- 4 Players continue taking turns. They draw 3 cards each time, decide how to arrange the numbers, and round the 3-digit number to determine which basket gets the number.
  - If no empty hoops are available for the three possible arrangements of the numbers a player draws, the player misses that turn.
  - If players play through the deck, they shuffle the cards and continue playing.
- 5 The first player to get a number in every basket wins the game.
- 6 When putting the number cards away, players should be sure to return the 0s, 1s, and wild cards to the deck.

### Game Variation

- A Play Round Ball Thousands. Write another zero at the end of each number on each basketball hoop. Then, draw 4 cards, arrange them as a 4-digit number, round the number to the nearest 1,000, and determine which basket gets the number.

NAME \_\_\_\_\_

# 3C Round Ball Hundreds Record Sheet

**Player 1**

 <input type="checkbox"/>	 <input type="checkbox"/>	 <input type="checkbox"/>	 <input type="checkbox"/>
 <input type="checkbox"/>	 <input type="checkbox"/>	 <input type="checkbox"/>	 <input type="checkbox"/>

**Player 2**

 <input type="checkbox"/>	 <input type="checkbox"/>	 <input type="checkbox"/>	 <input type="checkbox"/>
 <input type="checkbox"/>	 <input type="checkbox"/>	 <input type="checkbox"/>	 <input type="checkbox"/>

I drew \_\_\_\_\_, \_\_\_\_\_ and \_\_\_\_\_. I am going  
number number number  
to use \_\_\_\_\_ in the hundreds place, \_\_\_\_\_ in  
number number  
the tens place, and \_\_\_\_\_ in the ones place.  
number

My number is \_\_\_\_\_.  
number

I will round this number \_\_\_\_\_ to the nearest  
up/down  
hundred, which is \_\_\_\_\_. I will write this number  
number  
under the basketball hoop marked \_\_\_\_\_.  
number

If I put the \_\_\_\_\_  
number in the hundreds  
place, my number will be \_\_\_\_\_.  
bigger/smaller

My strategy is \_\_\_\_\_  
\_\_\_\_\_.
