

Name _____

Date _____

1. There are 16 glue sticks for the class. The teacher divides them into 4 equal groups. Draw the number of glue sticks in each group.

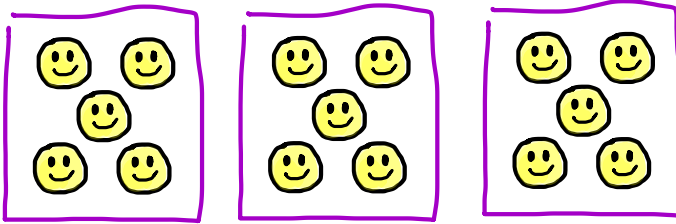

There are 4 glue sticks in each group.

$$16 \div \underline{4} = \underline{4}$$

2. Draw a picture to show $15 \div 3$. Then, fill in the blank to make a true division sentence.

$$15 \div 3 = \underline{5}$$

NOTE: Students may draw the following. If they do, tell students their drawing is mathematically correct, but we were expecting 3 groups, not 5.
