2017-2018

Dear Parents/Guardians:

The math placement process involves a comprehensive set of measures to make the appropriate recommendations for next year. It is our goal to place students into an academic schedule that will allow them to reach success. The majority of our current 5th grade students will take Math 6 next year. For those students who are ready to handle the rigorous demands of an accelerated math class, we offer a course entitled Math 6A (accelerated).

Your student will need to meet or exceed all of the following criteria to be considered for **Math 6A** next year:

- ❖ Academic Grade: 90% or higher for the first and second trimester
- ❖ Effort: E or G for the first and second trimester
- ❖ In-class Assessments: 90% average
- ❖ Math 6A Placement Test: 85% or higher
- ❖ Spring 2017 CAASPP: Overall score of Standard Met/Standard Exceeded

Orchard Hills prides itself on creating a well-balanced sequence of classes to prepare all students for high school and college opportunities. All of our courses provide a dynamic learning environment for students to meet Common Core standards and develop a strong foundation for high school. Students will be reassessed annually to determine if they meet the criteria to continue on the accelerated math track.

Sincerely,

Cindy Agopian
Principal
