

Animal Poster Project

Due February 24, 2014

At home, you need to create a poster about your animal and their ecosystem/habitat. Your poster must include:

- A large title
- 5 pictures (computer printed or hand-drawn) with captions
- 5 sections
 - Animal Statistics
 - height/weight/lifespan/description of what they look like
 - Ecosystem and Habitat and Environmental Factors
 - Paragraph describing the habitat of your animal: where do they live, what is the climate, type of home
 - Be sure to include what environmental factors may affect their habitat or the species
 - Living Habits
 - What types of foods does it eat, how does it care for its young, who are their prey, or who are their predators? How does it get its food?
 - Adaptations
 - Paragraph explaining the animal's adaptations that help it survive in its environment
 - ❖ physical (means of defense)
 - ❖ environmental
 - 4 Cool Facts
 - What did you find most interesting or unusual? What information did you learn about this animal that you will always remember?

Your report should be written in your own words.
No copying from your resources!!!!

Poster project is PUE ON February 24, 2014

Be ready to share! Practice what you will say. You should NOT read from your poster, but rather, share what you learned!! 😊
