

Rocks and Minerals Jeopardy!!!

| ROW 1 | ROW 2 | ROW 3 | ROW 4 | Row 5 |
|---------|---------|---------|---------|---------|
| Q \$100 | Q \$100 | Q \$100 | Q \$100 | Q \$100 |
| Q \$200 | Q \$200 | Q \$200 | Q \$200 | Q \$200 |
| Q \$300 | Q \$300 | Q \$300 | Q \$300 | Q \$300 |
| Q \$400 | Q \$400 | Q \$400 | Q \$400 | Q \$400 |
| Q \$500 | Q \$500 | Q \$500 | Q \$500 | Q \$500 |

Final Jeopardy

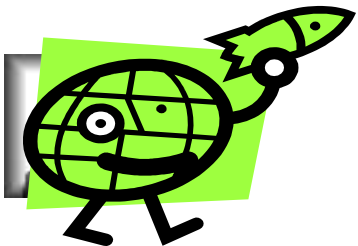

\$100 Question

A non living solid material

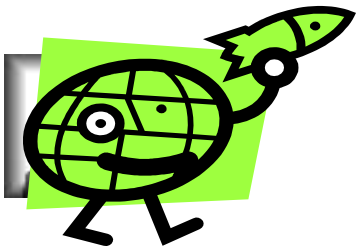

\$100 Answer

What is a mineral?

\$200 Question

The color of a mineral when it is ground into powder.

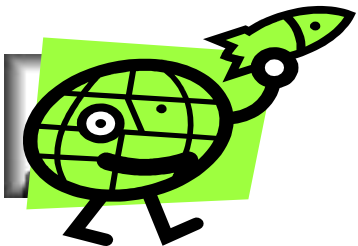

\$200 Answer

What is streak?

\$300 Question

The way a mineral shines.

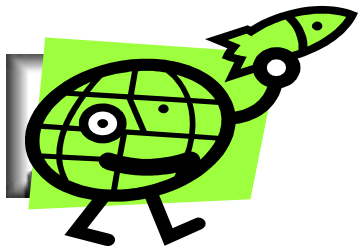

\$300 Answer

What is a luster?

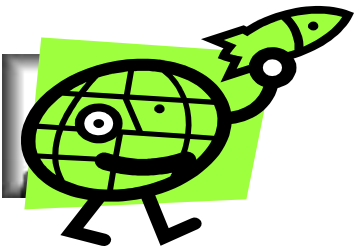

\$400 Question

The way a mineral splits along flat surfaces.

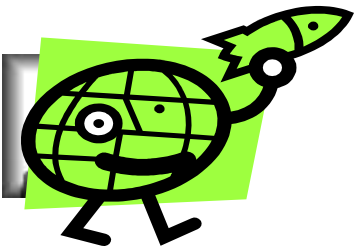

\$400 Answer

What is cleavage?

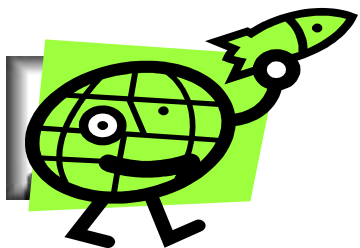

\$500 Question

How easily a mineral can be scratched.

\$500 Answer

What is hardness?

\$100 Question

Which of these is a mineral?

Granite

Gneiss

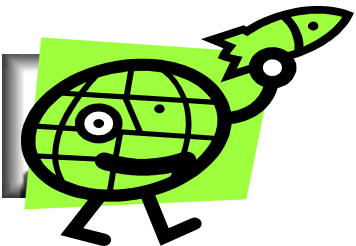

Diamond

Pumice

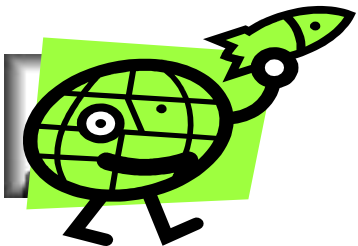

\$100 Answer

What is diamond?

\$200 Question

The hottest part of Earth.

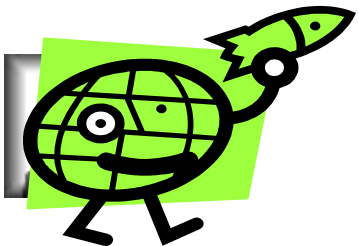

\$200 Answer

What is the inner core?

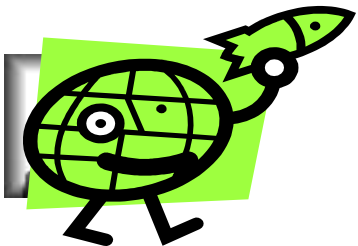

\$300 Question

This scale helps us figure out how hard minerals are.

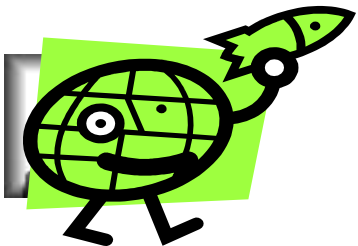

\$300 Answer

What is Mohs Hardness Scale?

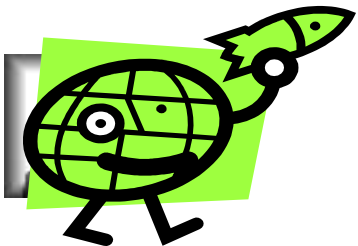

\$400 Question

Rocks that transform or change from one type of rock to another.

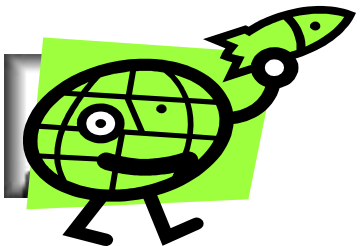

\$400 Answer

What are Metamorphic Rocks?

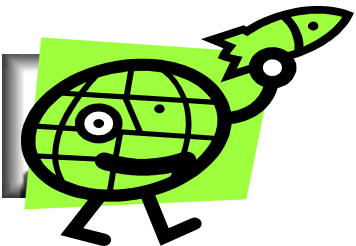

\$500 Question

These rocks come from volcanoes.

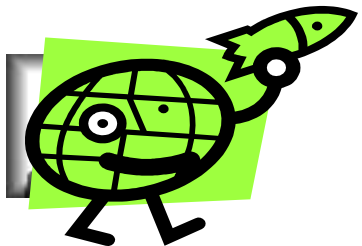

\$500 Answer

What are Igneous Rocks?

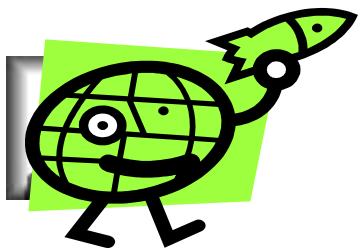

\$100 Question

Where minerals are found on Earth.

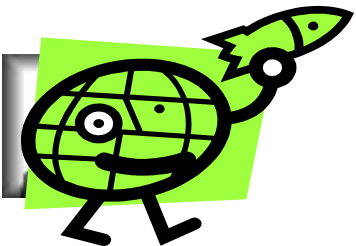

\$100 Answer

What is the Crust?

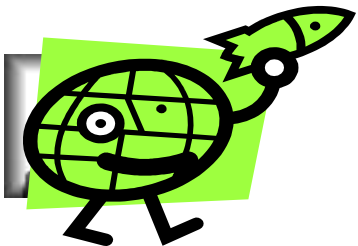

\$200 Question

A solid material made up of
1 or more minerals.

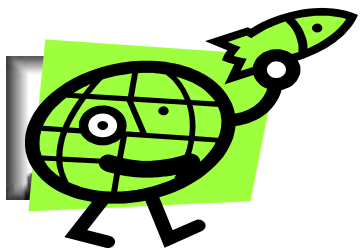

\$200 Answer

What is a rock?

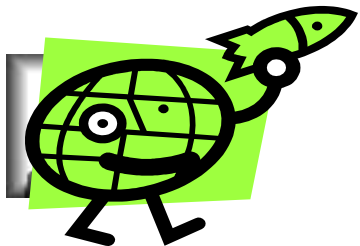

\$300 Question

The way a mineral shines.

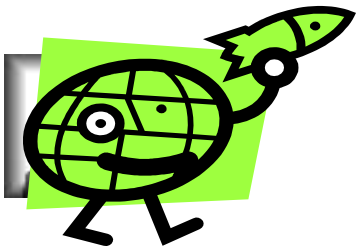

\$300 Answer

What is luster?

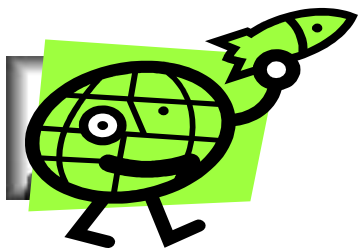

\$400 Question

A mineral's powder.

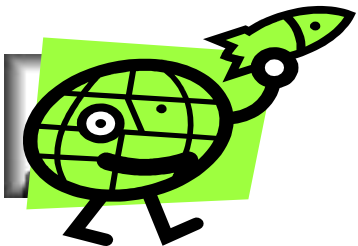

\$400 Answer

What is the streak?

\$500 Question

Rocks that form when sand, particles of rock, bits of soil and once-living things are cemented together.

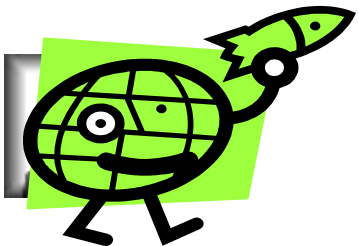

\$500 Answer

What are
Sedimentary
Rocks?

\$100 Question

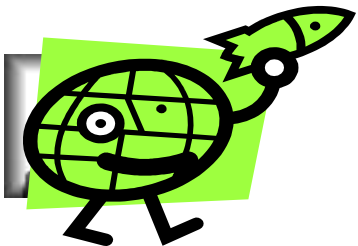

A non-living solid material
made up of 1 property.

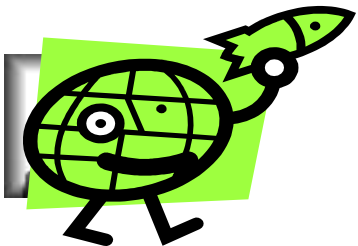

~~\$100 Answer~~

What is a mineral?

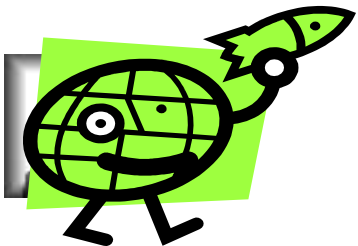

\$200 Question

Powder left behind from a mineral.

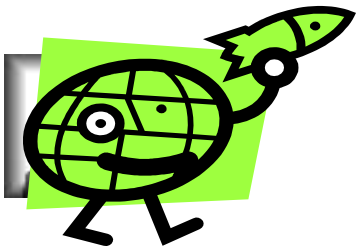

\$200 Answer

What is streak?

\$300 Question

How we find a mineral's hardness.

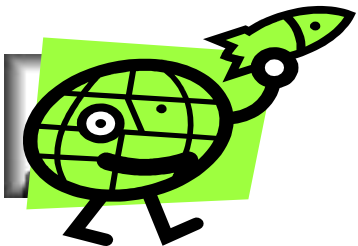

\$300 Answer

What is scratch it?

\$400 Question

The different changes or cycle
rocks undergo.

\$400 Answer

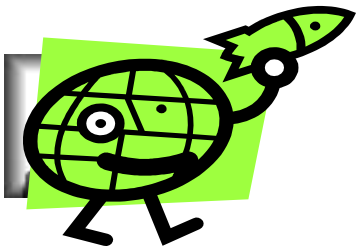

What is the ROCK CYCLE?

\$500 Question

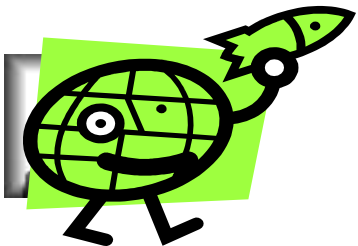

Existing rocks that change by heat, pressure, or chemicals.

We call them...Transformer Rocks.

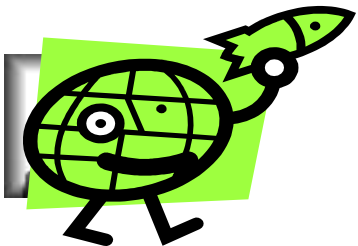

\$500 Answer

What are
Metamorphic Rocks?

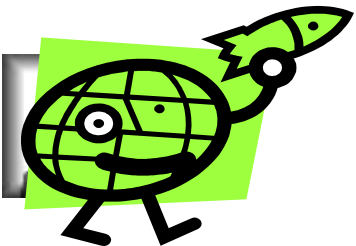

\$100 Question

a mineral that is shiny like metal

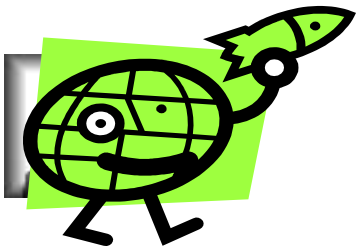

\$100 Answer

What is a **metallic** mineral?

\$200 Question

A dull or glassy mineral.

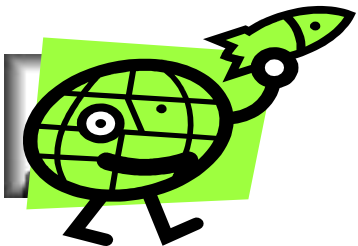

\$200 Answer

What is nonmetallic mineral?

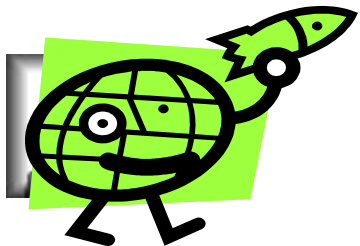

\$300 Question

The scale we use to measure the hardness of a mineral.

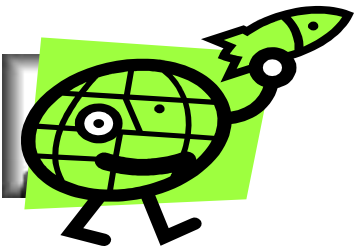

\$300 Answer

What is Mohs Hardness Scale?

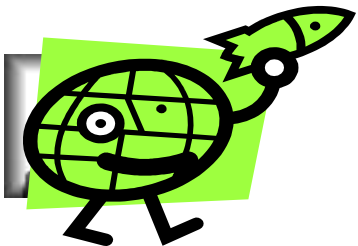

\$400 Question

Solid material made up of
1 or more minerals

\$400 Answer

What is a Rock?

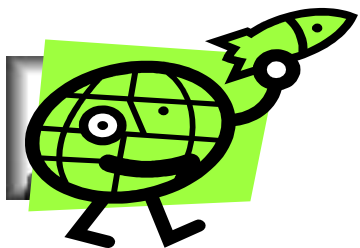

\$500 Question

Rocks that form from molten rock from deep below the Earth surface.

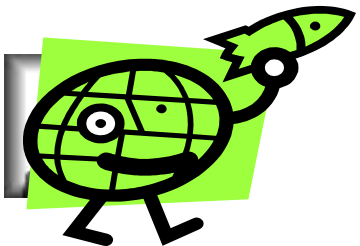

These rocks cool, then harden.

We also call them--Volcano Rocks.

\$500 Answer

What are
Igneous Rocks.

Final Jeopardy

Of all the baseball teams around the world, which team is said to be the best, the #1 team, the one that can bring it, the team that everyone loves?

Final Jeopardy Answer

Who are the **L.A. Dodgers!**

Not the **ANGELS!**
