

Teacher Tips

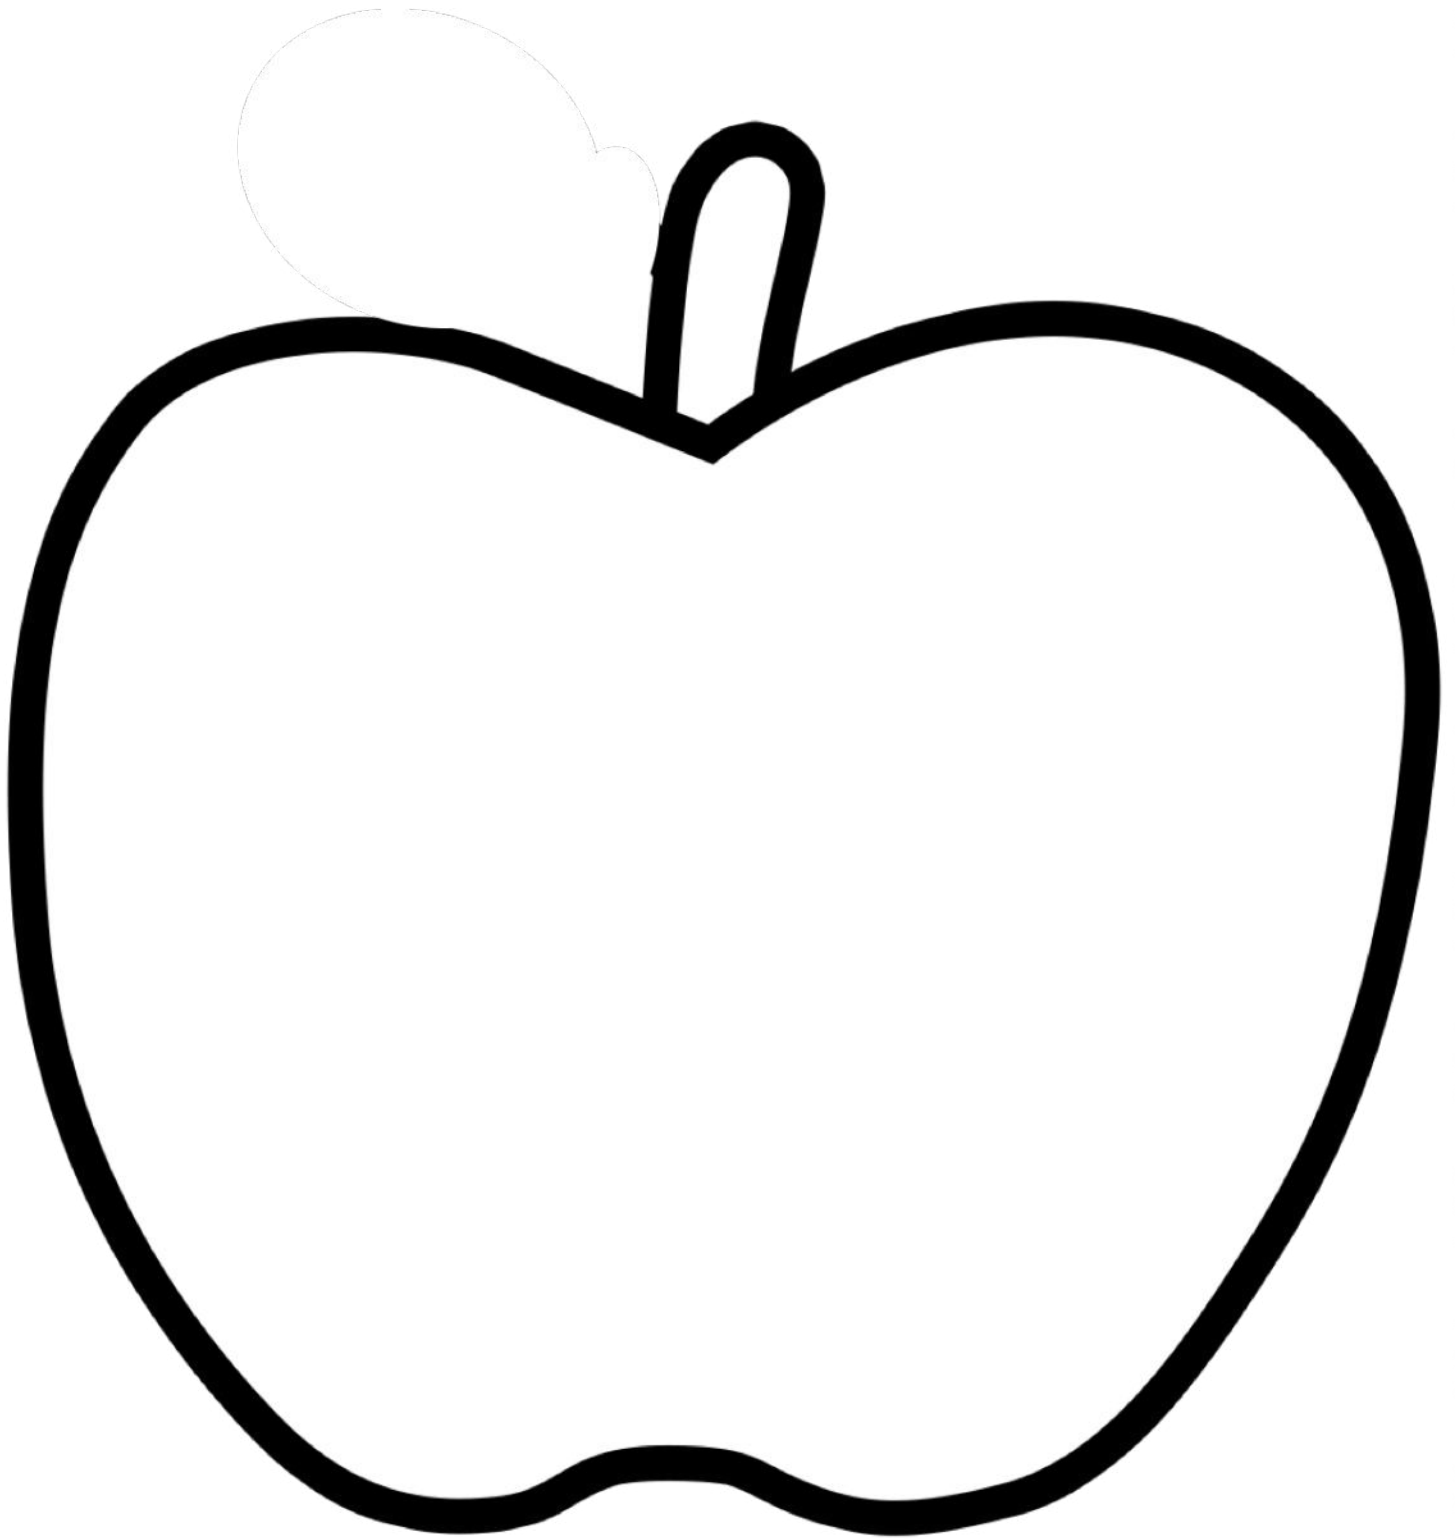

- Students will draw on the apple with crayons, markers, colored pencils.
- I like to print the apples on white cardstock and then have students cut out their apple emoji to move around for grouping and then eventually put onto a bulletin board or chart.
- There are two sizes of apples depending on your size needs.
- I like to post the main chart on the board or my device and then provide students with a mini copy of the chart for easy reference.
