

# LANDSCAPE Painting

... is the art of a picture depicting an expanse of scenery in a single view, taking on the characteristics of a particular region for aesthetic appeal.

Combining both their physical origins and the cultural overlay of human presence, landscapes reflect the living atmosphere of people and place, vital to local and national identity. The character of a landscape can help define its location, creating a sense of place that differentiates it from other regions. A landscape can be a dynamic backdrop to people's lives.

## Different Landscape Subject Matter

### **Landforms**

mountains, hills, dunes

### **Water Bodies**

rivers, lakes, ponds and the sea

### **Living Elements**

land cover, vegetation, foliage
