

Public Art Roundabout Proposal Hwy 246 and Jefferson Parkway

Northfield, MN

Submitted by Adam Turman

Hi! I'm Adam. . .

I have been a working artist, muralist, print maker since 2003.

My murals can be found all over Minnesota and my prints, in private collections worldwide.

My bold illustrations riff Minnesota with stylized takes on everything from Paul Bunyan and Babe the Blue Ox, to the BWCA and the Mississippi River.

I work with major Minnesota brands, local boutiques, and private collectors alike. . .

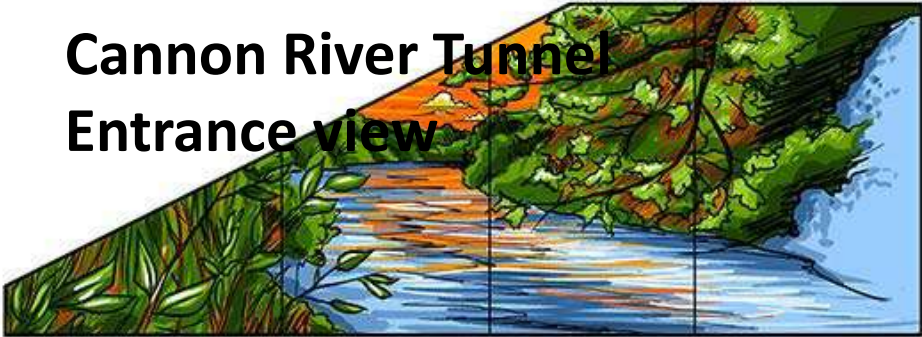

TO MAKE ART A PART OF MN EVERYDAY!

The Four Ecologies of Northfield

Cannon River Tunnel Entrance view

The Cannon River flows through this tunnel like it's namesake runs through Northfield and along Southeastern Minnesota. Leaves and trees outline and define the shore as the river flows under the #112 Pedestrian bridge in Downtown. Kayakers paddle while passing ruins of Archibald Mill a unique perspective of the history of the area. The blues of water run through to each entrance view.

Nerstrand Big Woods Tunnel Entrance view

The Nerstrand Big Woods tunnel highlights this beautiful state park. The Minnesota Dwarf Trout Lily flowers blossom while the waterfall flows heavily in the spring. A rock cairn stands tall in front of the stepping stone bridge and wild Geraniums bring a splash of color. The bright green colors exclaim “spring is here” in Nerstrand Big Woods State Park.

Oak Savannas Tunnel Entrance View

Paying tribute the abundance of wildlife found in Oak Savannas as well as some of the best bird-watching that can be found in this Biome. An American Kestrels soar and a Pileated Woodpecker hammers and forages. A Barred Owl scans for food, while a Black-Capped Chickadee sways on a branch in the wind. The orange and brown colors celebrate the Autumn season, and nature's show of leaves changing color.

**Prairie Tunnel
Entrance view**

Wildflowers galore! Minnesota prairies are filled with beautiful pollinating flowers. A Monarch Butterfly finds a Blazing Star, while Wild Daisies sunbathe. Coreopsis welcomes trail users and a bee collects pollen on Echinacea. Can you feel the sun in the bright yellows and oranges of summertime in the Prairie Biome?
