

STRING ART DESIGN PROJECT

- THE WORK WILL BE DONE IN & OUT OF CLASS.
- **CONCEPTS COVERED: STRUCTURING SHAPES, MEASURING ANGLES AND SECTIONS**
- FINISHED PRODUCTS WILL BE GRADED WITH A RUBRIC AND THEN DISPLAYED IN OUR 8TH GRADE HOUSE
- **HAVE FUN AND BE MATHEMATICALLY CREATIVE!!**
- TIMELINE IS APPR. 1 WEEK

SAMPLE STRING ART

Due to limited space, patterns for these designs are not included in this book. The designs are included to spark your imagination.

After completing several of the patterns we have included, you should be able to create your own designs. 25

WHAT IS THREAD DESIGN ? (cont.)

1. This is a combination of two Thread Designs from the preceding page. Note the intricate patterns that have resulted.

2. The next three illustrations are to show the need for the proper number of nails in a particular Thread Design. The design above consists of 12 nails. This is not enough nails to make an effective or intricate design.

3. This design consists of 24 nails which is sufficient for a multi-layered project, if the circle is not too large. These designs are 6" in diameter. A larger project should contain more nails accordingly.

4. 48 nails were used for this design. In this size design (6"), with 48 nails, one to three layers of different colored thread could be used effectively.

SUPPLIES

- STUDENTS WILL PROVIDE:
- **SMALL HAMMER**
- **COLORED THREAD**
 - **3 -4 COLORS**
 - **GOOD QUALITY**

- MS. MUNCE WILL PROVIDE:
- **WOOD 8" X 8"**
- **BLACK PAINT**
- **NAILS – 1/2 "**
- **WASHERS – FOR MEASURING**
- **PLIERS**

ACTIVITIES TO PREPARE FOR PROJECT

- PRACTICE CONSTRUCTING CIRCLES AND SQUARES
- FIND CENTER POINT OF SHAPES
- MEASURE = DISTANCE POINTS
- CONNECT POINTS WITH COLORED LINES

A Rhapsody in String

... how to create string art designs

Circle Designs

Stunning two dimensional designs like the one shown can be made using circles. Design shown uses a circle design with equally spaced points. Equal points can be made with the use of a protractor as in Fig. 1, or with a compass.

Different sized inside circles are determined by the number of nails skipped between each wrap. In Fig. 2, three nails were skipped, producing a large circle slightly smaller than the original circle. In Fig. 3, eight nails were skipped and a small circle was produced. Fig. 4 shows Figures 2 and 3 combined together.

When multiple layers are used, always wrap the smallest circle first, so succeeding layers will not hide the circles beneath them.

If the protractor is moved from the center point of the circle, Fig. 5, unequal points will be produced around the circumference. When design is wrapped it will result in ovals offset from center of circle. See Fig. 6.

Turn to page 6 for Circle design.

Fig. 2.

Fig. 4.

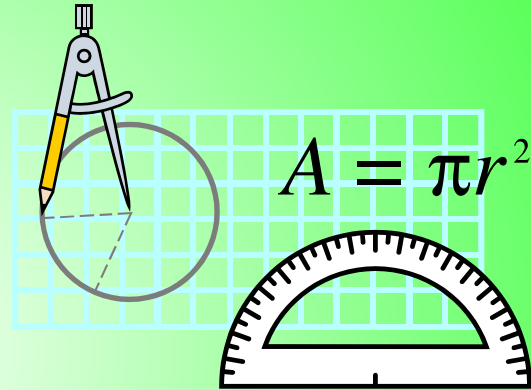

Fig. 6.

HAMMER TIME!!

- **ON SCRAP BOARD YOU WILL DRAW FIRST LETTER OF YOUR NAME**
 - » **USE A RULER FOR STRAIGHT LINES**
- **DRAW POINTS ON YOUR LETTER**
- **PROCEED BY HAMMERING NAILS INTO THE POINTS**
 - » **DO THIS EASY AND KEEP NAILS STRAIGHT**
- **MEASURE HEIGHT WITH WASHER**

You are ready to begin our fabulous string art project!!!

YOU NEED TO DECIDE ON A
CIRCLE OR SQUARE SHAPE.
CLICK ON DIAGRAM TO SEE
EXAMPLES.

Straight Line Designs

Straight lines are by far the simplest design form, and can be used in a variety of different ways. Lines can be intersecting as in Fig. 10 or non-intersecting with points having the same spacing or different spacing. Intersecting lines create angles that can be used in forming interesting curves and designs as shown in the free-form design on page 8. Square pattern combines four right angles with equal spacing.

Parallel lines do not produce curves but can be used as in the square to create an interesting effect. Try offsetting lines and using unequal spacing for something different.

Turn to page 5 for Square Design.

Fig. 10. Intersecting Lines

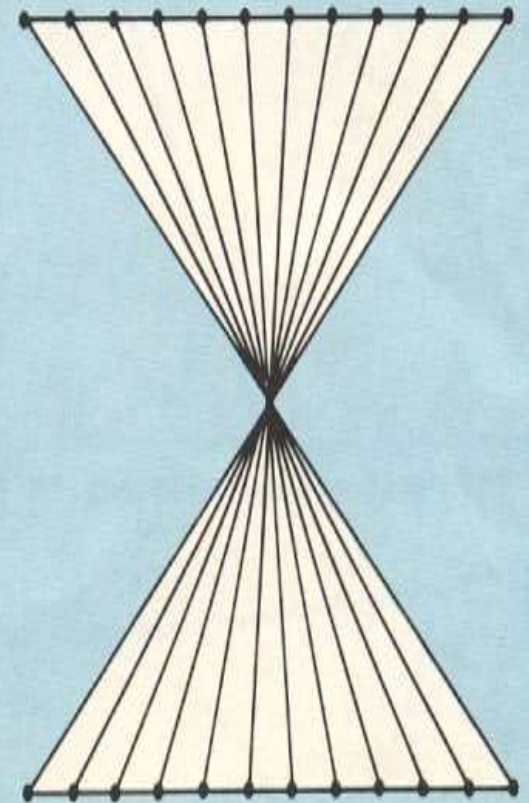

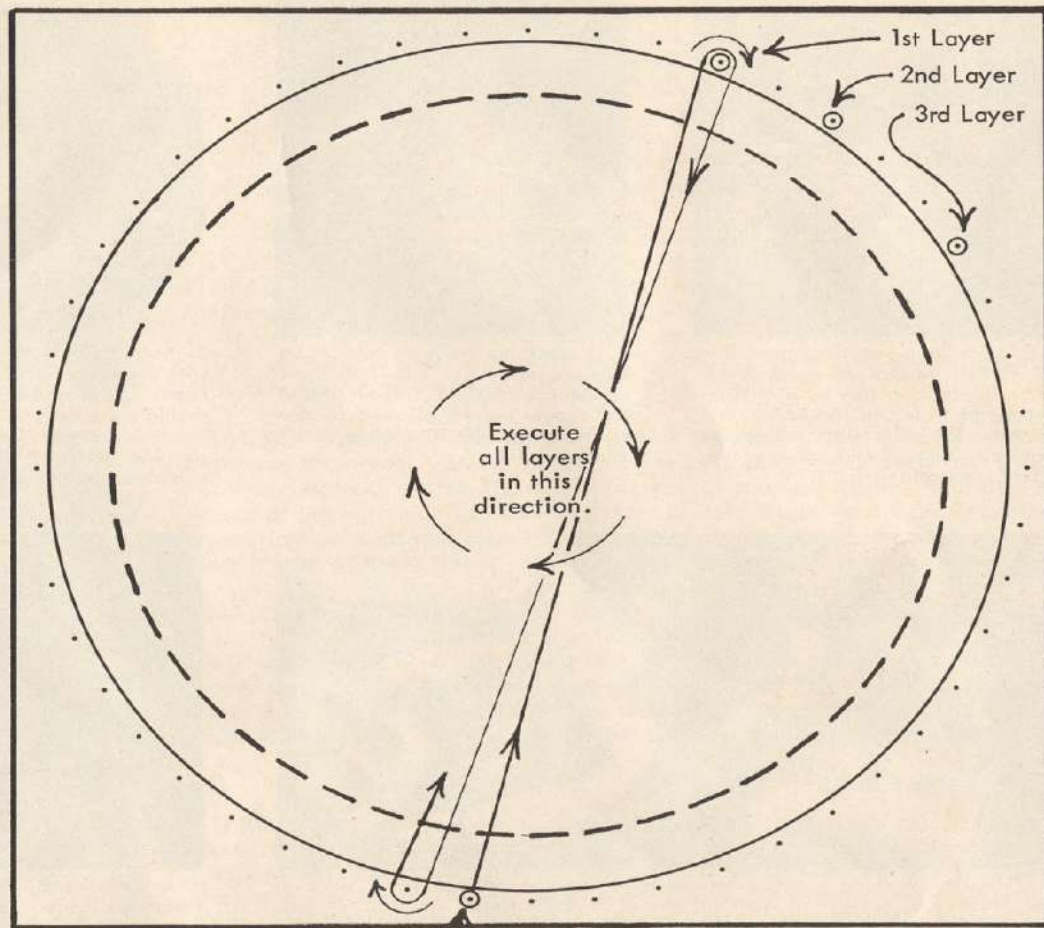

Fig. 11. Parallel Lines

Basic Project

The above photos are of the finished basic project. You may finish the project with a mat (Top) or without (Bottom). The color selection is also of your choice.

NAILS REQUIRED:
48 1/2" X 18 gauge brads

Starting Nail
(Start all layers
from this nail.)

Use the solid black
lines as a guide for
cutting the mat.

STEPS FOR CIRCLE DESIGN

- CONSTRUCT CIRCLE ON YOUR PLYWOOD - [HYPERLINK](#)
- MEASURE EQUAL POINTS AROUND CIRCLE BY -----
(CIRCUMFERENCE) / 29 = SPACING
- 360 DEGREES / 29 = DEGREES
- *** (29 EQUALLY SPACED POINTS)
- DRAW DOTS FOR POINTS ON CIRCLE

What is THREAD DESIGN ?

THREAD DESIGN (String Art)

This is an art form that uses thread to create a colorful design. The design is made up of straight lines by wrapping thread around nails in a specified manner. The design is created by: A. the arrangement of the nails, B. the sequence used in wrapping the thread around the nails.

As the thread is wrapped around the nails it forms a tangent that creates an opening in the center of the design.

A tangent is a line, curve or surface touching, but not intersecting another line, curve or surface. Figure 1 shows two legs of an angle which have been equally divided. A line was then drawn from the last point on one leg to the first point of the other leg, etc.. The

next points were then used so a curved effect was achieved in the center.

Figure 2 shows the inside curve formed by the tangents. The arrows indicate the points where the lines make a tangent to the inner circle.

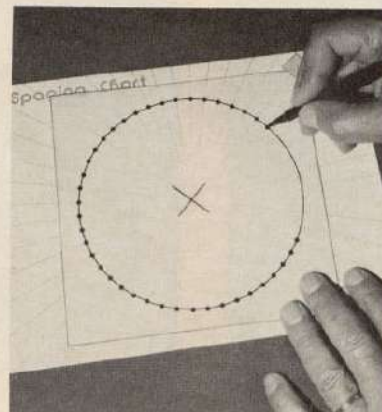

To illustrate starting a Thread Design from scratch & to familiarize you with the procedures, we have drawn a circle and divided it into eight equal parts.

We then drew lines from point to point in the sequence shown above. As you can see, the lines formed a circle in the center. This circle is illustrated by the dotted line.

For creating your own designs and to quickly divide circles and other shapes uniformly, we have provided a Spacing Chart on page 33. To use this chart, draw the desired shape on tracing paper. We used a circle to illustrate the procedure.

Place the center of the circle at the center of the Spacing Chart. The lines radiating from the center of the chart are spaced $7\frac{1}{2}$ degrees apart. Place marks on the tracing paper where the lines intersect the circle. You may wish to use only every other point, depending on the size of the design.

The size of the center circle is determined by how near the threads are to the center (focal point) of the design. The thread was tied to the white headed nail at the bottom and then wrapped to the white headed nail at the top.

This larger center circle was formed by selecting starting nails that were closer to each other and the thread was then further from the center of the circle. In order to fill the design as shown above each nail was wrapped two times.

GETTING THE PLYWOOD READY FOR STRING DESIGN

- AFTER CIRCLE AND POINTS ARE CONSTRUCTED – LIGHTLY TAP EACH POINT WITH HAMMER AND NAIL. (**DO NO DRIVE NAIL TOTALLY INTO BOARD**).
- PAINT YOUR BOARD BLACK.
- AFTER DRY, POUND NAILS INTO DENTS KEEPING NAILS STRAIGHT.

• **BEGIN STRING DESIGN**

- **YOU WILL PICK A STARTING NAIL. THIS NAIL WILL START ALL LAYERS.**
- **DECIDE ON STRING SPACING BEFORE YOU BEGIN.**
- **(EVERY THIRD NAIL, EVERY SEVENTH NAIL, ETC)**
- **TIE AND KNOT STRING TO BEGINNING NAIL (COLOR THE HEAD OF THIS NAIL)**
- **COUNT OFF YOUR SPACING AND GO AROUND THE NEXT NAIL, AND CONTINUE THIS PATTERN.**
- **FIRST LAYER SHOULD HAVE THE SMALLEST OPENING IN THE CENTER.**
- **ALWAYS GO AROUND NAIL IN SAME DIRECTION (CLOCKWISE OR COUNTER)**
- **YOU MUST DO EACH LAYER TWICE.**

BASIC PROJECT (cont.)

8. The height of the nails should be uniform. One way to achieve this is to have a washer or some similar object of desired height. Pound nails down to the washer, but be careful not to bruise the material. For this project leave the nails 1/4" high.

9. Use a small pair of pliers and straighten all of the nails so they make a nice round circle.

10. Various methods may be used to hold the thread. Shown above are two types. A simple holder is a nail in a board. A better holder is to use a small prescription bottle. Fasten the bottle to a board with a screw or glue.

11. To fasten the thread to the starting nail make a slip knot in the end of the thread and place it over the starting nail. Leave a 4" tail on the thread so you will be able to tie it to the ending thread. Pull the knot tight.

12. Select the first color and tie it onto the starting nail. The layer with the smallest inside circle is completed first. If completed last it would cover the other colors. Wrap the thread around the nail marked first layer, as illustrated above.

13. The thread wrapping procedure is usually progressive. This means that the thread is advanced to the adjacent nail each time you go across the design. In most cases you will wrap in a clockwise direction.

14. Follow the sequence shown above.

15. Pull the thread to the other side and progress to the next nail. Be sure that you wrap around the nail in the same manner each time.

Note: The wrapping procedure is indicated on this and all other patterns.

STRING DESIGN

- TIPS!!!!
- KEEP THREAD VERY TIGHT WITH EACH WRAPPING AROUND NAIL.
- POUND NAIL INTO SCRAP BOARD AND PUT SPOOL OF THREAD ON IT SO BOTH YOUR HANDS ARE FREE.

BASIC PROJECT (cont.)

16. Continue wrapping in a progressive manner. The small circle is beginning to appear on the side indicated by the arrow.

17. Continue wrapping each nail. In order to complete the first layer you must wrap each nail twice.

18. After you have wrapped each nail twice, tie end of thread to the tail left on the starting thread. Tie on the second color thread to the same starting nail and again leave a 4" tail on the thread.

19. Take the thread from the starting nail to the nail marked second layer. Wrap the thread around the nail in the same manner as before and proceed in a clockwise direction to the nail adjacent to the starting nail.

20. Proceed with the winding for this layer the same as you did for the first layer. You must go around each nail twice to complete the layers.

21. Continue all the way around and tie off at the starting nail. After tying off, cut off the excess thread.

22. Select the color for the third layer and tie onto the starting nail. Proceed to the nail marked third layer and wrap in the same manner as for the other layers.

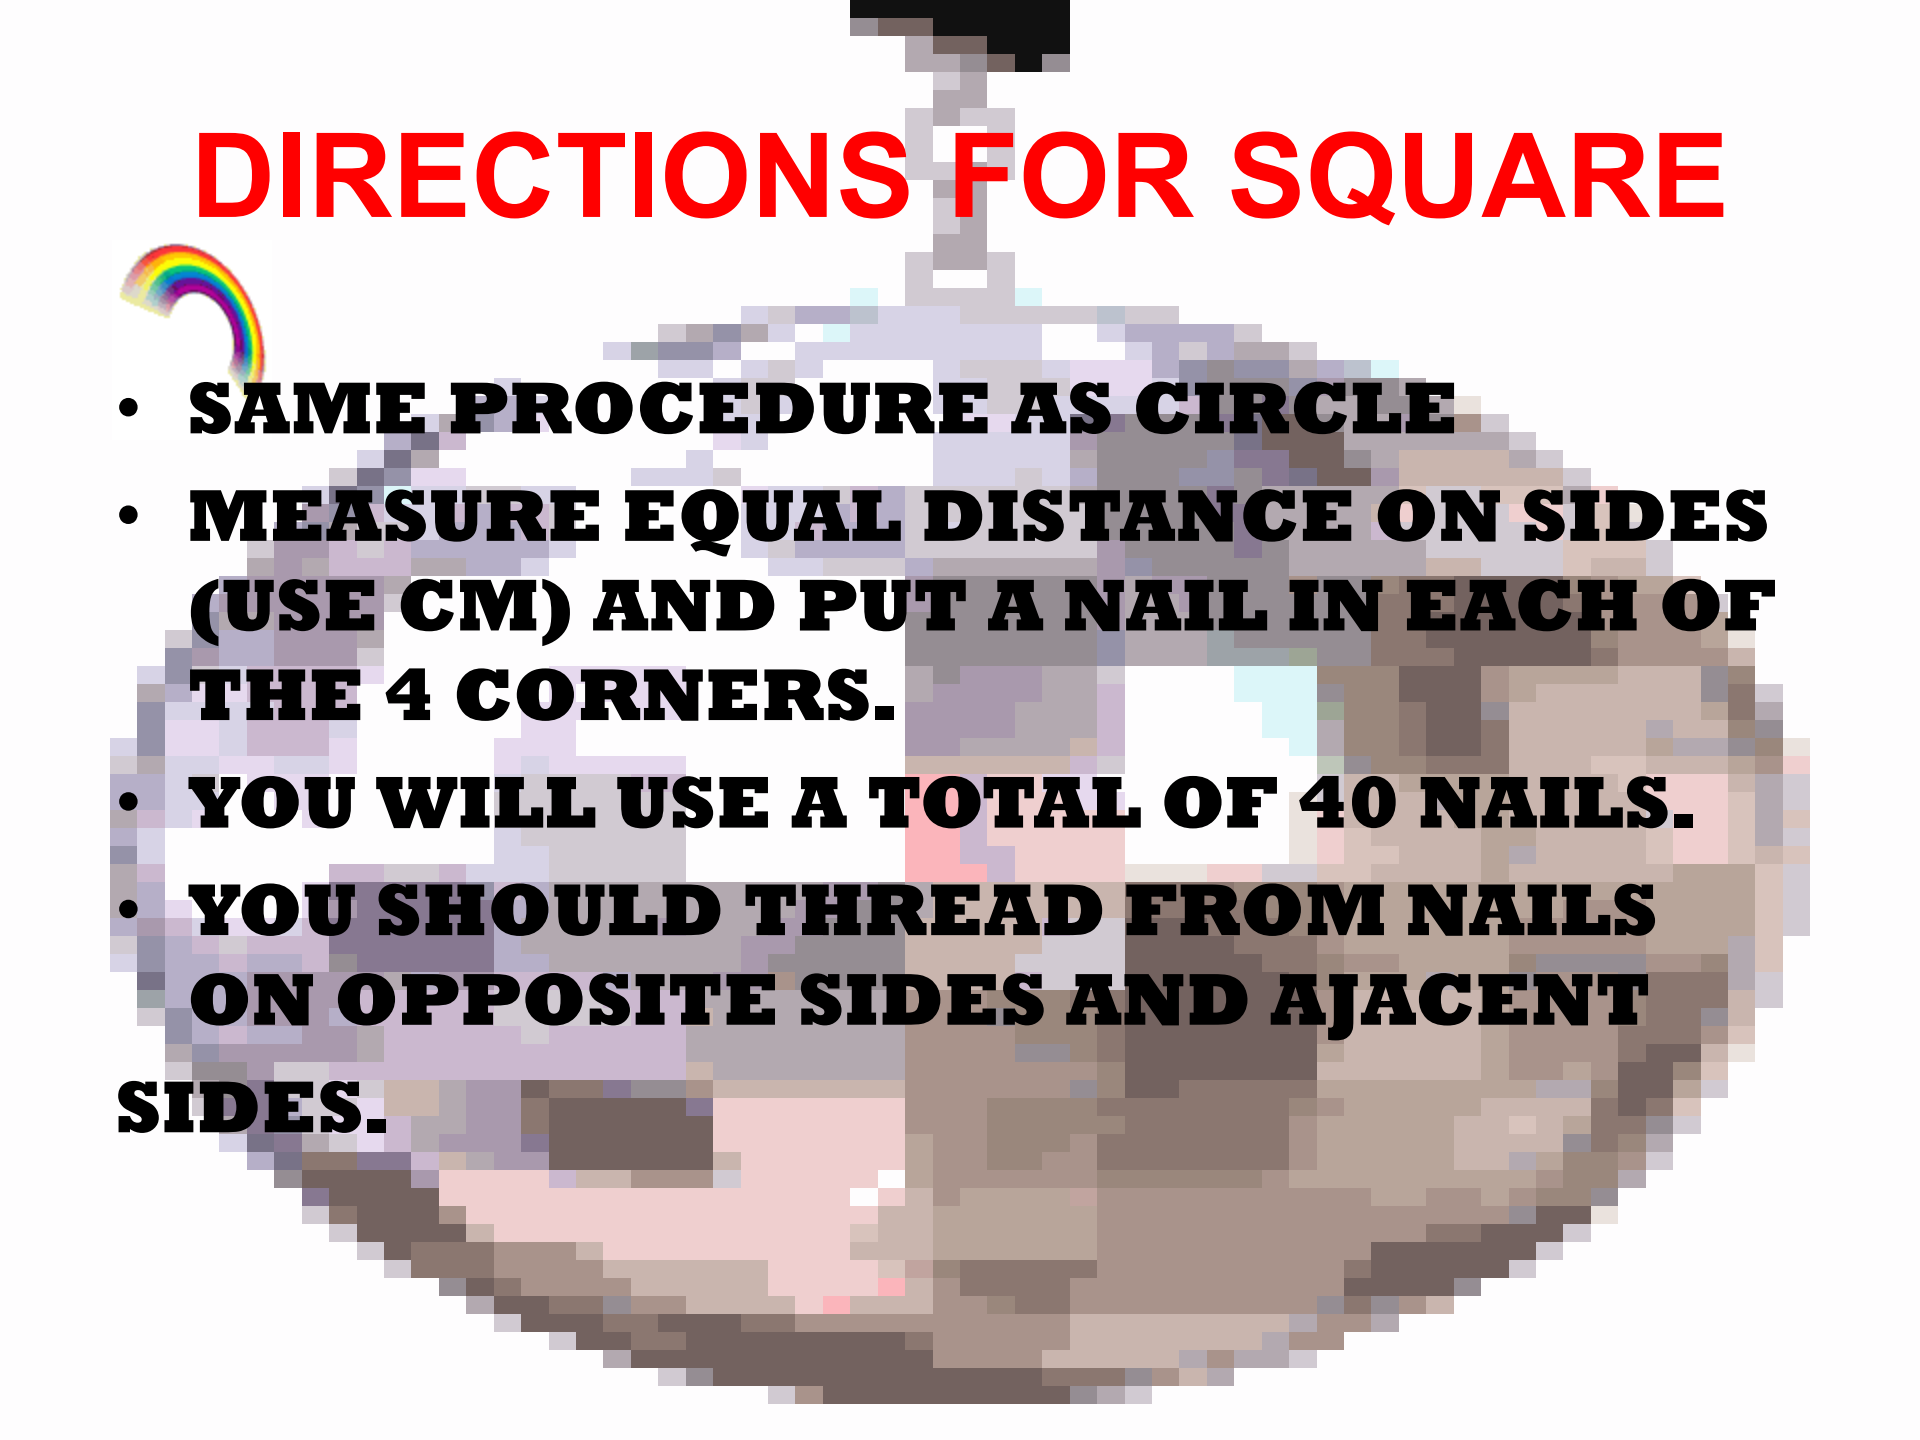

23. Proceed in a clockwise direction and complete the third layer.

• FINISHING PROJECT

- **FINISH ALL 3 OR 4 LAYERS OF THREAD.**
- **TIE KNOTS AND GLUE ENDS OF EACH COLOR THREAD TO STARTING NAIL.**
- **TAKE PEN OR PENCIL AND LIFT TOP LAYER UP TO TOP OF NAIL.**
- **MAKE SURE OTHER LAYERS ARE PARALLEL TO TOP.**

DIRECTIONS FOR SQUARE

- 
- **SAME PROCEDURE AS CIRCLE**
 - **MEASURE EQUAL DISTANCE ON SIDES (USE CM) AND PUT A NAIL IN EACH OF THE 4 CORNERS.**
 - **YOU WILL USE A TOTAL OF 40 NAILS.**
 - **YOU SHOULD THREAD FROM NAILS ON OPPOSITE SIDES AND ADJACENT SIDES.**

CONGRATULATIONS!!!

- **WE WILL USE A RUBRIC TO GRADE YOUR PROJECT!!**
- **YOUR PROJECT WILL BE DISPLAYED**
- **IN THE HOUSE AREA.**
- ****** EXTRA CREDIT - MAKE ANOTHER PROJECT WITH OTHER SHAPE OR DRAW ANOTHER STRING ART.**
- **HOPE YOU HAD FUN WITH OUR PROJECT.**
