ASCA National Standards for Students – One Vision, One Voice

Professional school counselors everywhere proudly share the same simple vision — to prepare today’s students to become tomorrow’s adults. The American School Counselor Association (ASCA) not only supports this idea, it has made it the Association’s mission.

Educational reform movements of the late 20th and early 21st centuries, such as standards-based education and the No Child Left Behind legislation, focused on raising teacher quality and academic achievement. Unfortunately, these efforts ignored the emotional, physical, social and economic barriers that can inhibit student success. This is where school counselors make a difference. School counselors are actively committed to eliminating these obstacles and to helping students understand that the choices they make now will affect their educational and career options in the future.

ASCA National Standards for Students was established to help school counselors help students. ASCA National Standards identify and prioritize the specific attitudes, knowledge and skills that students should be able to demonstrate as a result of participating in a school counseling program. Best of all, by adopting and implementing ASCA National Standards, school counselors change the way school counseling programs are designed and delivered across our country.

The Development of Standards

The development of ASCA National Standards for Students required an examination of theory, research and practice to ensure that all aspects of school counseling were considered. The process solicited broad-based involvement from all segments of the school counseling community to determine what purpose the Standards would serve and what their content would be. Through pilot surveys at ASCA's national Delegate Assembly in April 1995 and a revised survey to more than 2,000 ASCA members in September of that year, ASCA was able to gather input on school counselor attitudes and to initiate the movement toward adopting National Standards.

The standards movement has provided ASCA with a timely opportunity to better define the role of school counseling in the American educational system and establish similar goals, expectations, support systems and experiences for all students across the country. Additionally, on the local level, National Standards offer an opportunity for school counselors, school administrators, faculty, parents, businesses and the community to engage in conversations about expectations for students' academic success and the role of counseling programs in enhancing student learning.

Finally, ASCA National Standards for Students serves as the foundation for The ASCA National Model: A Framework for School Counseling Programs. Representing more than 50 years of research, theory and practice, the National Model helps school counselors design and implement programs that meet the National Standards and establish school counseling as an integral component of the academic mission of their schools.

ASCA's decision to participate in this educational reform agenda through the development of National Standards for Students offers an opportunity for the school counseling profession to implement the goals deemed important by the profession, to promote its mission in educational reform and to ensure that all students have access to comprehensive school counseling programs as part of the learning experience.

We look forward to having you join us on this mission!
