Unit 1 Basic Principals of Life

Estimated Length of Unit	Big Ideas (Understand)	Essential Questions	Concepts (Know)	Competencies (Do)	Lesson Objectives & Suggested Resources	Vocabulary (Tier 3)	Standards and Eligible Content
15 Days	All organisms on earth share common characteristics of life.	How do we know if something is alive?	<p>Common Characteristics of life:</p> <p>All living things are made up of one or more units called cells</p> <p>Cells occur in two basic forms: prokaryotic and eukaryotic</p> <p>Obtain and use matter and energy to carry out their life processes</p> <p>Reproduce and pass out their genetic material to the next generation</p> <p>Seek and Maintain a biological balance between their internal and external environments</p> <p>Grow, develop and eventually die</p>	<p>List and describe the common characteristics exhibited by all living things- both prokaryotic and eukaryotic</p> <p>Compare cellular structures and their functions in prokaryotic and eukaryotic cells</p>		<p>Prokaryotic cell</p> <p>Eukaryotic cell</p> <p>Stimuli</p> <p>Adapt</p> <p>Evolve</p> <p>Population</p>	<p>Standards;</p> <p>3.1.B.A1</p> <p>3.1.B.A5</p> <p>3.1.B.A9</p> <p>3.1.B.C2</p> <p>3.2.B.A8</p> <p>4.1.3.A</p> <p>4.1.4.A</p> <p>Eligible Content:</p> <p>BIO.A.1.1.1</p> <p>Acad. Stand. for Reading in Science and Tech.</p> <p>CC.3.5.9-10A</p> <p>CC.3.5.9-10B</p> <p>CC.3.5.9-10C</p> <p>CC.3.5.9-10D</p> <p>CC.3.5.9-10E</p> <p>CC.3.5.9-10G</p> <p>CC.3.5.9-10H</p> <p>CC.3.5.9-10I</p>

			Detect and respond to stimuli				
			Adapt and evolve at the population level				
	Structure is related to function at all biological levels of the organization.	How is structure related to function at the various levels of cellular organization?	<p>Similarities and differences in structure between prokaryotic and eukaryotic cells</p> <p>Relationship between form and function</p> <p>Common features/ functions of cell structures on both Prokaryotic and eukaryotic cells</p> <p>Levels of biological organization from organelle to multicellular organism</p> <ul style="list-style-type: none"> ○ Organelle ○ Cell ○ Tissue ○ Organ ○ Organ System ○ Multicellular Organism <p>Cell surface area to volume ratio controls cell size.</p>	Describe and interpret relationships between structure and function at the organelle, cell tissue, organ, organ system and multicellular organism level of organization.		<p>Organelle</p> <p>Cell</p> <p>Tissue</p> <p>Organ</p> <p>Organ System</p> <p>Multicellular Organism</p>	<p>Standards:</p> <p>3.1.B.A1</p> <p>3.1.B.A5</p> <p>3.1.B.A6</p> <p>3.1.B.C2</p> <p>4.1.3.A</p> <p>4.1.4.A</p> <p>Eligible Content:</p> <p>BIO.A.1.2.1</p> <p>BIO.A.1.2.2</p> <p>Acad. Stand. for Reading in Science and Tech.</p> <p>CC.3.5.9-10A</p> <p>CC.3.5.9-10B</p> <p>CC.3.5.9-10C</p> <p>CC.3.5.9-10D</p> <p>CC.3.5.9-10E</p> <p>CC.3.5.9-10G</p> <p>CC.3.5.9-10H</p> <p>CC.3.5.9-10I</p>

Review for Common Assessment Unit 1 Basic Properties of Life Duration: 1 Day

Common Assessment Unit 1 Basic Properties of Life Duration: 1 Day

Unit 2 Chemical Basis for Life (Biochemistry)

Estimated Length of Unit	Big Ideas (Understand)	Essential Questions	Concepts (Know)	Competencies (Do)	Lesson Objectives and Suggested Resources	Vocabulary (Tier 3)	Standards and Eligible Content
20 days	Life is a product of the organization and interaction of matter	How is life a product of the organization and interaction of matter?	Organic vs. Inorganic Matter - matter is anything that occupies space and has mass - Levels of Biochemical organization (atom, elements, molecules, macromolecules and compounds) -living things are made up of molecules			Organic matter Inorganic matter Mass Atoms Elements Molecules Macromolecules Compounds	Standards: 3.1.B.A7 3.1.B.A.5 4.2.5.C Eligible Content: BIO.2.2.1 Acad. Stand. for Reading in Science and Tech. CC.3.5.9-10A CC.3.5.9-10B CC.3.5.9-10C CC.3.5.9-10D CC.3.5.9-10E CC.3.5.9-10G CC.3.5.9-10H CC.3.5.9-10I
	Life is a product of the organization and interaction of matter	How is life a product of the organization and interaction of matter?	Chemical structure of water Polarity of water/hydrogen	Describe the unique properties of water.		Polarity Hydrogen Bond Adhesion	Standards: 3.1.B.A5 3.1.B.A.8 4.2.5.C

			<p>bonding and related properties.</p> <ul style="list-style-type: none"> - Adhesion and Cohesion(surface tension and capillary action) - High Specific Heat - Universal Solvent - Density Anomaly <p>Examples of how the properties of water support life.</p> <ul style="list-style-type: none"> - temperature moderation -solid water less dense than liquid water -water cycle Metabolism requires an aqueous environment -transportation -buffering properties of water 	<p>Explain how the unique properties of water support life on earth.</p>		<p>Cohesion</p> <p>Surface tension</p> <p>Capillary action</p> <p>High specific heat</p> <p>Universal solvent</p> <p>Density anomaly</p>	<p>Eligible Content: BIO.2.1.1</p> <p>Acad. Stand. for Reading in Science and Tech. CC.3.5.9-10A CC.3.5.9-10B CC.3.5.9-10C CC.3.5.9-10D CC.3.5.9-10E CC.3.5.9-10G CC.3.5.9-10H CC.3.5.9-10I</p>
	Life is a product of the organization and interaction of matter	How is life a product of the organization and interaction of matter?	<p>Chemical properties of carbon atoms. (Form 4 covalent Bonds)</p> <p>Structural Shapes of carbon molecules(straight chains, branch chains, rings)</p> <p>Monomers vs.</p>	<p>Describe the structure of a carbon atom.</p> <p>Explain how the carbon atoms bond to form biological macromolecules from monomers.</p>		<p>Macromolecule</p> <p>Monomer</p> <p>Polymer</p> <p>Dehydration Synthesis (condensation)</p>	<p>Standards: 3.1.B.A2 3.1.B.A7 3.1.B.A8 3.1.C.A2 3.1.C.A7</p> <p>Eligible Content: BIO.2.2.1</p>

			<p>Polymers</p> <p>Monomer that forms carbohydrates, protein and nucleic acids. (monosaccharide, amino acids, nucleotide) Idea of no common monomer for lipids</p> <p>Dehydration Synthesis (condensation) and Hydration reactions.</p> <p>Basic structure of the 4 major classes of biological macromolecules (common chemical components, examples of monomers form each class, examples of polymers constructed from monomers)</p> <p>Importance and use of each macromolecule for biological function.</p>	<p>Compare the structure and function of carbohydrates, lipids and nucleic acids in organisms.</p>		<p>Hydrolysis</p> <p>Monosaccharide</p> <p>Amino acid</p> <p>Nucleotide</p> <p>Carbohydrates</p> <p>Lipids</p> <p>Proteins</p> <p>Nucleic acids</p>	<p>BIO.2.2.2</p> <p>BIO.2.2.3</p> <p>Acad. Stand. for Reading in Science and Tech.</p> <p>CC.3.5.9-10A</p> <p>CC.3.5.9-10B</p> <p>CC.3.5.9-10C</p> <p>CC.3.5.9-10D</p> <p>CC.3.5.9-10E</p> <p>CC.3.5.9-10G</p> <p>CC.3.5.9-10H</p> <p>CC.3.5.9-10I</p>
	Life is a product of the organization and interaction	How is life a product of the organization and interaction	<p>Enzymes as proteins</p> <p>Enzymes as Substrate specify/interactions</p>	<p>Explain how enzymes act as catalysts to regulate</p>		<p>Enzyme</p> <p>Catalyst</p>	<p>Standards</p> <p>3.1.B.A2</p> <p>3.1.B.A7</p> <p>3.1.C.A2</p>

	of matter	of matter?	(Lock and Key Model) Effect of enzymes on activation energy and reaction rates Reusable nature of enzymes Examples of enzyme controlled reactions in living things Enzyme activity as a function of specific conditions. Effects of environmental factors (pH, temperature, concentration) on enzyme function	biochemical reactions. Explain how environmental factors affect the function and reaction rate of the enzyme. Interpret graphs to analyze enzyme catalyzed reactions.		Substrate Activation energy Active site Reaction rates pH Concentration	3.1.C.A7 Eligible Content BIO.A.2.3.1 BIO.A.2.3.2 Acad. Stand. for Reading in Science and Tech. CC.3.5.9-10A CC.3.5.9-10B CC.3.5.9-10C CC.3.5.9-10D CC.3.5.9-10E CC.3.5.9-10G CC.3.5.9-10H CC.3.5.9-10I

10 days	Ecology is the heart of life through the interactions of organisms with one another and their interrelationship with the environment.	How do organisms interact with and depend on each other in an ecosystem? How are organisms impacted by the nonliving components of an ecosystem?	The levels of ecological organization: -organism -population -community -ecosystem -biome -biosphere Abiotic components of an ecosystem Characteristic abiotic and biotic components of earth's aquatic and terrestrial ecosystems.	Describe and differentiate between the levels of ecological organization. Describe characteristic abiotic components of terrestrial and aquatic ecosystems. 	Common Assessment Unit 10 Ecology Duration: 1 Day						
<p>During the course of the year, we will have at least 6 days scheduled for the Classroom Diagnostic Tool for this course. Since these dates have not been scheduled, there may need to be an adjustment to the day to day schedule when these dates are scheduled in. Also there needs to be 4 days built in for the PSSA or Keystone Exams. These 10 days will be distributed throughout the year thus totaling 180 instructional days.</p>
