## Purchasing Catalog Options

### Punch – Out

Through SRM we have ability to “Punch – Out” to a suppliers website and choose products and/or services and bring them back into our SRM shopping cart or PO.

### Materials Service Contract Catalog (MSCC)

SRM internal database listing procurement items from multiple suppliers/contracts.

## Functionality through technology to increase procurement effectiveness

### eXtensible Markup Language (XML)

The language COPA uses for electronic data interchange of the Purchase Order and Invoice.

Will improve payment turnaround

### Auto PO

Functionality that will fax a PO directly to the supplier upon completion/release.

All new MSCC’s created will be Auto PO enabled.

# Bid Workflow

## Issue Raised At Last PPC

- All electronic solicitations workflow to Agency Heads.
  - plus Comptrollers for Service.
- Bid Approver role is embedded in overall approver role of the agency.
  - SRM Agency Services PO/Contract/Bid Head Apprvr
  - SRM Agency Supplies PO/Contract/Bid Head Apprvr
- Approval process takes too long.
- Some agencies are not going through SRM.

## Short Term Solution

- Map Ad-Hoc Approver Roles, then set up substitution role.
- IES is testing the short term solution for bid workflow using Ad Hoc Users and substitutes.

## Long Term Solution

- Survey will go out to the agencies shortly to establish which agencies would have a need to change the Bid Workflow process.
- Redesign to change the workflow to mimic shopping cart workflow.
- Hard code system.
- Need agreement from Legal and Comptroller.

## Sample Survey Questions

- ✓ Does current workflow work for the agency?
- ✓ If not, what are the requirements?
- ✓ Who should be approving?
- ✓ Is it based on services vs. supplies?
- ✓ Are there dollar thresholds involved?
