

AP Calculus AB Summer Assignment

I am giving you a summer assignment that will be due on August 17th at 8:00am (the first day of school). The assignment is on DeltaMath. You should already have an account from Mr. Howard's class or from another math class but you will need to enter my teacher code "917986" and select the class "Calc AB 2020-21". You should see only one assignment called "Summer Assignment". Some questions are easy and some are hard so don't wait until the last minute!

I look forward to meeting you all in a couple of months! Calculus Rules! Learning is a privilege!
