WAREHOUSE SUPPLY CATALOG

WAREHOUSE CATALOG

In this catalog is a list of supply items stocked at the Central Receiving Warehouse. This catalog will supply a stock number unit of issue and detailed description of each stocked item. Under the "Price List" tab are the prices for each item. At any time you may request an updated price list, which is accurate at the time of printing due to price averaging. The price is updated automatically when stock is received.

The catalog is broken into categories; the first to number of a stock number denotes the item is stored in what warehouse it is stored. The second two numbers represents the category. The last 4 are the stock number.
