Studying the Structures of Text

(...and happy to do it!)

Mr. Gagnon's 3rd graders, and all 3rd graders, are learning about the various structures of text, ways a story can be organized. The students used graphic organizers, shapes to represent each subsection of a story, to visualize the organizational structure.

Checking for Understanding

Resource Teacher Kate Giusti made a fine point with Lorin Valenti, 6th grader.

Rehearsing for the 3rd Grade Assembly

At Carrington every grade level presents to their schoolmates a show about what they have been learning. Coming up on March 28th is the 3rd grade's turn. Presentation is part of learning, and Mrs. Ciccone's class got accustomed to being on stage.

Pi Day was also Pie Day March 14th is also known as Pi Day, because the number Pi -3.14 – corresponds to the date 3/14. Pi represents the relationship between the diameter of every circle and the circumference of every circle. Mr. Brault's 6th grade Math students got to learn **Pi**, taste **pie**, smell **pie**, see **Pi** and **pie**, and use **Pi** to calculate the circumference of circles. Pi Day is also the birthday of Albert Einstein.

Mr. Brault taught the lesson.

Among pie eaters were Fatu Montger, Braeden Gorman, and Yasin Azizoglu.

Hair of Genius

Sunji Cramer read about Albert Einstein, a wild-haired scientist.

Who would win, Lion or Tiger?

Ask 3rd grader Kaden May, who read the book.

Kindergarten as it used to be Kindergarten as it used to be does still exist, but now it is called prekindergarten. In Pre-K at Carrington the children still have the chance to dress up, play with sand and water, and still learn some ABC's and math. (at right) Mrs. Mauceri's children played.
