

# Concepts *for* Adaptive Learning

## FREE TECHNOLOGY PROGRAMS

Concepts for Adaptive Learning provides FREE computer and technology programs that support advancement in both academics and career for both children and adults.

All programs currently offered online. Learn more and register at [www.cfalct.org/programs](http://www.cfalct.org/programs)

### FAMILY PROGRAM

#### Expanding Learning to Home

##### **DIGITAL LITERACY FOR PARENTS AND CHILDREN:**

The program increases digital literacy and expanded learning to families, emphasizing how to expand learning online together.

To support family learning, CfAL hosts workshops highlighting how technology can support academic success, while also identifying the dangers of unmonitored and/or excessive online activity.

### ADULT PROGRAM

#### Supporting Advancement in Careers

##### **TECHNOLOGY & COMPUTER TRAINING:**

CfAL's Adult Training program, works to close the technology gap by providing free technology training and resources to low-income families. Program benefits include building job skills from typing and learning Microsoft programs to basic computer maintenance.

# Concepts *f*or *A*daptive Learning

## FREE TECHNOLOGY PROGRAMS

### MISSION

To increase the knowledge and use of technology of urban families, preparing them for success in a constantly changing digital society. We use the resources of technology to:

- Further digital learning for children through the use of measurable programs.
- Provide free computers to families that do not have a working computer at home.
- Provide basic computer training for adults to develop job skills to improve financial independence.

### VISION

Our vision is that ALL households should have access to the technology that will help them succeed in school and career.

Having a computer and technology in the home for school and work is a necessity - not a luxury. CfAL works to close the technology gap for low-income households.
