Vocabulary– 100

What is used to carry a long distance through a system of channels, pipes, and tunnels

100

aqueduct

Vocabulary- 200

The careful use of a natural
resource

200

conservation

Vocabulary- 300

Water that collects in spaces
and cracks in rocks and soil
underground

300

groundwater

Vocabulary- 400

The process where salt is removed from salt water to make fresh water

400

desalination

Vocabulary- 500

A place where water is
collected and stored

500

reservoir

More Vocabulary- 100

What is used to supply fresh water to farms and fields

100

irrigation

More Vocabulary- 200

An underground layer of rock or soil through which water moves easily

200

aquifer

More Vocabulary- 300

The recycling of waste water
so it can be used again

300

water reclamation

More Vocabulary- 400

A region of land that drains
into a river

400

watershed

More Vocabulary- 500

A hole dug or drilled into an underground area saturated with water

500

well

Quick Questions- 100

Where is most of Earth's
surface water found

100

salt water found in oceans

Quick Questions- 200

What is the source of
freshwater for much of
southern California

200

the Colorado River

Quick Questions- 300

What type of body of water covers much of Earth's surface

300

oceans

Quick Questions- 400

What kind of water do oceans
have

400

salt

Quick Questions- 500

In which source is fresh water
found

500

glaciers

More Quick Questions- 100

How much water on Earth is
salt water

100

97%

More Quick Questions- 200

What is the source of most groundwater

200

rain and melted snow

More Quick Questions- 300

What do you called water in
the ground

300

groundwater

More Quick Questions- 400

True/False: The only fresh water available for us to use is 3%

400

False

3% is all freshwater
only .6% is available to use

More Quick Questions- 500

What two kinds of water are located on Earth?

500

salt and fresh water

Explanations- 100

What can you infer about the level of the water table if your well runs dry during a drought

100

The level of the water tables
has dropped below the
depth of the well

Explanations- 200

How does the process of distillation produce fresh water from salt water

200

Salt water is heated, the water evaporates leaving behind the salt. Then, the water vapor is cooled until it condenses back into liquid fresh water

Explanations- 300

What is an example of water conservation

300

Answers will vary

Explanations- 400

Why can recycled water not
be used for cooking or
drinking

400

Recycled water is not clean,
water for cooking or drinking
needs to be clean, fresh
water

Explanations- 500

What can recycled water be
used for

500

Answers will vary.

*Watering lawns, washing
cars*
