

Student Name:  
Teacher Name:  
Class Name/Subject: Chemistry  
Period:  
Assignment Week #: 3

1) What was your greatest takeaway from the climate change website/reading?

Please answer the following questions about this week:

- 1) How long did you spend working only on chem this week? Be honest.
  
- 2) What is something new you learned in chem class this week?
  
- 3) Was there anything difficult about it? Explain.
  
- 4) How is chem class this week related to something outside of chem class? Another class or an experience from your life?
  
- 5) What is a question you have based on chem class this week? Something you are curious about or wonder about, not something you were supposed to learn/do but didn't.
  
- 6) How are you doing this week?
