

Use the Chem Talk, pages 128-129 to define the following in your own words:

1. Texture-

2. Uniformity

3. Strength

4. Elasticity

5. Bounce

6. Malleability

7. Emulsion

8. Composite

9. Read page 129—What are 4 uses of composites?

10. Provide a situation in which each of the following properties of a material might be important:

Elasticity

Uniformity

Strength

Bounce

11. What are 3 benefits of using composite materials?

12. What are disadvantages of using composites for industry?
