

EOA-POA PROJECT

Select a topic of your choice and create a design that relates to the topic. Your design must include the elements of art line, shape, and color and you may include other elements as well. Arrange the elements using at least three of the principles of art: balance, dominance, rhythm/movement, repetition/pattern, variety/contrast. Both the EOA and POA must be used effectively. Create your design on a 7" X 7" format and choose any font for your text. Have the design completely fill the canvas, including a background color (but do not use a photograph as the background). You will be graded on criteria, creativity and craftsmanship. I recommend that you use filters and effects to enhance your design.
