Frequently Asked Questions

Who is Framatome?

Framatome is a global company whose U.S. branch provides services, fuel, and engineering support to nuclear plants worldwide.

What is the Employee Training Program?

The Employee Training Program is an innovative work-study program where individuals work and train with other technicians and engineers during a portion of the year and attend traditional or compressed college classes during the remainder of the year.

Why was the program developed?

The Employee Training Program was designed to meet Framatome's need for a dedicated, highly skilled, seasonal workforce – while providing unparalleled educational and economic opportunities in Virginia's Region 2000.

What are the benefits of the program?

Individuals accepted into the program become Framatome employees and enjoy year-round pay; health, dental and life insurance benefits; 401(k) and numerous other benefits – all while gaining valuable work experience and earning their degree. Employment and advancement opportunities extend well beyond the Employee Training Program for motivated individuals.

Criteria for Acceptance Into Program

- High School Graduate
- Framatome Employment Interview
- Background Investigation for Nuclear Site Access
- CVCC Placement Testing
- Willingness and Ability to Travel

Framatome offers training and work experience in a multitude of high-tech disciplines including: advanced robotics; non-destructive examination techniques such as eddy current and ultrasonic testing; machining; welding; fiber optics; computer networking; nuclear plant maintenance and repair; and numerous other related areas.
