Garvey School District

FOR IMMEDIATE RELEASE

FIRST COMPUTER SCIENCE SCHOOLS IN THE AREA

GARVEY'S STUDENT LEADERS invite you to Our Third Year Anniversary Celebration

ROSEMEAD, CA - Since the 2016-17 school year, Garvey School District has implemented a Computer Science Immersion Program for all TK through grade 6 students. The District's elementary Computer Science Schools, provided through a partnership with Code To The Future, are among the first in LA County in using digital learning to help students develop coding skills as well as a wide range of future ready competencies with the support of cutting-edge technological devices and "Maker Space." The program has been a tremendous success and has drawn outside educators, including superintendents and principals, to visit our classrooms. In the 2019-20 school year, a newly designed Computer Science Program will be launched at the two intermediate schools through the sponsorship from the University of Southern California and Code.org.

On Wednesday, June 26, 2019 Garvey School District will host a press conference to commemorate the third-year anniversary and the expansion of the Computer Science Program. Garvey's student leaders will share their learning journey and showcase their projects, including robots and digital games they have created. A BBQ dinner will be served to celebrate this year of success with guests, students, family, and staff.

WHEN

Wednesday, June 26, 2019
4:30-6:30 p.m.

WHERE

Arlene Bitely School
7501 E. Fern Avenue
Rosemead, CA 91770

Garvey School District is taking strong steps in becoming a leading district for Computer Science and is leading the way in building a cutting-edge 21st century learning environment for all students.

For details about the Computer Science Program, please contact the Garvey School District Office at (626) 307-3400.
