

7A: Dozens of Eggs

Names:

[Spin this wheel](#) to see what fraction you are drawing. You will try to add each fraction you spin to your last turn to fill all of your egg cartons. Use the next slide to put your lines and tiles in to represent fractions or an egg carton, tiles, & string from your teacher. Then you can draw it on your record sheet or take a screenshot from the next page and add it here. Take turns. Each partner will have their own record sheet. The first person to fill 4 egg cartons wins!

7A: Dozens of Eggs

Names:

7B: Racing Fractions

Names: _____

One person is red and the other is blue. Put one of your game markers at the beginning of each number line. Take turns. [Click this spinner twice](#) to make a fraction. The smaller number goes on top. Then move your game marker on any number line the distance of your fraction. You are trying to get to the end of each line before your partner. After someone is at the end of each line the game is over. Whoever has more pieces at the end of each of the lines wins!
