Electronic Resources- Internet/Computer Networks Use

The Brookfield Board of Education recognizes that an effective public education system develops students who are globally aware, civically engaged, and capable of managing their lives and careers. The Board also believes that students need to be proficient users of information, media, and technology to succeed in a digital world.

Therefore, the Brookfield School District will use electronic resources as a powerful and compelling means for students to learn core subjects and applied skills in relevant and rigorous ways. It is the District's goal to provide students with rich and ample opportunities to use technology for important purposes in schools just as individuals in workplaces and other real-life settings. The District's technology will enable educators and students to communicate, learn, share, collaborate and create, to think and solve problems, to manage their work and to take ownership of their lives.

The Board directs the Superintendent or his/her designee to create strong electronic educational systems that support innovative teaching and learning, to provide appropriate staff development opportunities and to develop procedures to support this policy.
