## I. INTRODUCTION

The Madison Public Schools is committed to consistently maintaining our facilities and planning for the future of our buildings as 21st century learning environments.

To initiate planning for a new PreK-5 Jeffrey Elementary School and improvements to Brown Intermediate to convert them to K-5 Elementary Schools, Madison Board of Education engaged the services of Colliers International, Drummey Rosane Anderson, and Daniel Hansen, educational consultant to assist with the development of these educational specifications. The following individuals participated in the initial specific program meetings to provide input for these educational specifications:

Elizabeth Battaglia, Director of Special Education	Frank Henderson, Principal, Brown Intermediate
Kerri Beisner, Teacher, Special Education	Michelle Horn, K-12 Literacy Coach
Peggy Bell, Teacher, Grade 3	Leslie Lopez, Teacher, Spanish
Margaret Borden, Teacher, Kindergarten	Deb Lynch, Teacher, Kindergarten
Robert Burr, Chief Custodian	Eileen Martin, Teacher, Special Education
Ingrid Byrne, Math Interventionist	Tracey McGinley, Teacher, Grade 5
Erinn Coady, Teacher, Special Education	William McMinn, Director of Facilities
Carissa Connell, Teacher, Visual Arts	Lisa Miceli, Teacher, PreK
Dr. Craig Cooke, Superintendent	Angela Milone, Teacher, PreK
Gail Dahling-Hench, Assistant Superintendent	Alicia Romanacci, Teacher, Spanish
Susan Daub, Teacher, Physical Education	Thomas Scarice, Former Superintendent
Tricia Edgar, Speech Language Pathologist, PreK	Lisa Seales, Teacher, Grade 4
Jill Fayan, Library Media Coordinator K-12	Drew Sellitti, Teacher, Grade 1
Scott Ferguson, Teacher, Music	Doreen Shirley, Reading Consultant
Jennifer Figurelli, Teacher, Grade 2	Elizabeth Solin, Administrative Secretary
Dawn Fiorelli, Library Media Specialist	Robin Sorey, Occupational Therapist, PreK
Elizabeth Fortsch, School Nurse	Kelly Spooner, Principal, Ryerson Elementary
Becky Frost, Principal, Jeffrey Elementary	MaryBeth Starr, Teacher, TESOL K-12
Stephanie Fumiatti, Teacher, Grade 5	Gay Tomasevich, Teacher, Computer Coding
Mike Ginsberg, Teacher, STEAM	Kerry Tucker, Teacher, Special Education
C.J. Gladstone, Special Education Coordinator	Linda Wade, Teacher, Special Education
Lynn Hadad, Teacher, PreK	Lauren Warner, Teacher, Grade 5
Maria Hainer, Teacher, PreK	

## II. MADISON CORE DOCUMENTS

### **Vision Statement: “Every Child, Every Day, Leading the Way”**

The Madison Public Schools are driven by a mission to prepare all learners to make a unique, positive contribution in a complex, global society. We are committed to fostering the diverse talents and abilities of each and every child in an emotionally and physically safe environment. We envision learning as joyful and learners as passionate. We support our educators as innovators in a dynamic pursuit of continuous improvement.

We are committed to the work that will lead to the development of all learners’ capacities to:

- put ideas into action by thinking critically and creatively to identify and solve authentic, complex problems;
- communicate and collaborate purposefully and effectively using a variety of media;
- approach learning with effort and persistence while responding to success and failure with resiliency, reflection, and adaptability in an ever-changing world;

- make ethical and responsible decisions.

### Vision for Curriculum Development

Madison Public Schools believes all students should have access to a high quality, engaging, education. There are expectations of success for all students with units that encourage student exploration and inquiry.

The curriculum is content rich, offering students opportunities to learn important concepts and procedures with understanding, while simultaneously providing students with opportunities to explore and grow in identified 21<sup>st</sup> Century Capacities. These multi-disciplinary outcomes (critical thinking; creative thinking; communication/collaboration; self-direction; and global thinking) are thoughtfully and purposefully embedded throughout the curriculum alongside content that is informed by state and national standards.

A common language is articulated accurately, and it reflects accepted practice within the discipline and/or current educational research and promotes the work of the discipline. The written documents in each grade level include key required components, including the scope of the material and the depth of understanding that is expected upon unit completion.

Maps for courses and grade levels define the pace and common expectations of a content. Teachers use these maps to guide and sequence instruction toward the attainment of key concepts detailed in the unit design. Unit design follows the Understanding by Design (UbD) Model by Jay McTighe and Grant Wiggins although personalized to match the work valued in Madison.

### Profile of a Graduate: Student Growth and Development Matrix

Critical Thinking	Creative Thinking	Collaboration/ Communication	Self-Direction	Global Thinking
<b>Inquiry</b> Posing, pursuing, and refining significant questions to deepen understanding about a topic or issue.	<b>Idea Generation</b> Studying a problem, need or model (mentor text, political piece, documents, art work, etc.) to consider limitations and imagine new solutions/transformations.	<b>Collective Intelligence</b> Working respectfully and responsibly with others, exchanging and evaluating ideas to achieve a common objective.	<b>Self-Awareness</b> Examining current performance critically to identify steps/strategies to persist.	<b>Citizenship</b> Identify, analyze and contribute to critical issues in society in an ethical and responsible manner.
<b>Analyzing</b> Examining information/data/evidence from multiple sources to identify possible underlying assumptions, patterns, and relationships in order to make inferences.	<b>Design</b> Engaging in a process to refine a product for an intended audience and purpose.	<b>Product Creation</b> Effectively use a medium to communicate important information.	<b>Decision Making</b> Make responsible decisions, based on potential outcomes.	<b>Alternate Perspectives</b> Interpret or critique complementary and competing approaches, experiences, and worldviews in order to develop an empathetic perspective.

### III. PROJECT RATIONALE

*(Excerpted from the **Madison Schools Renewal Plan**)*

In September of 2019, the Madison Public Schools contracted from six schools to five with the closure of Island Avenue Elementary School. Now, the schools are composed of the following grade levels:

- **Town Campus Learning Center**, PreK
- **Jeffrey Elementary School**, Kindergarten - Grade 3
- **Ryerson Elementary School**, Kindergarten - Grade 3
- **Brown Intermediate School**, Grades 4 and 5
- **Polson Middle School**, Grades 6 - 8
- **Daniel Hand High School**, Grades 9-12

According to Connecticut General Statutes 10-220, each Board of Education in Connecticut is responsible for the day to day maintenance and operation of its buildings, lands, and other property used for school purposes. Additionally, this statute mandates that each Board of Education “*shall make a continuing study of the need for school facilities and of a long-term school building program, and from time to time, make recommendations based on such study to the town.*” Within this purview, the Board of Education has worked in collaboration with the Town of Madison to study the long-term needs of its facilities, while planning for future enrollment trends.

The school district facilities have been comprehensively analyzed a number of times over the past twenty years. Most recently, an in-depth study that began in 2014 resulted in comprehensive reports facilitated by the Drummey, Rosane and Anderson (DRA) architectural consulting firm. These reports included the following:

- **Architectural Assessments** of each facility (DRA, October 6, 2015)
- **Mechanical and Electrical Systems Existing Conditions Narrative** (Consulting Engineering Services – CES, May 20, 2015)
- **Comprehensive 10 Year Enrollment Projections Analysis** (Education Resources Management, Dr. Arthur Wagman, December 23, 2014)
- **Enrollment Projection Refresh** (Education Resources Management, Dr. Arthur Wagman, Feb 9, 2017 and Nov 9, 2018)
- **Enrollment Projections** (SLR, March 2021)

With the addition of Colliers International serving as representation, these studies culminated with a plan to shrink the district footprint from six schools to five schools. A referendum on September 26, 2017 sought approval from the community to build a new elementary school on the Ryerson School property, with the expectation that a full renovation of Jeffrey School would follow immediately thereafter.

The referendum failed and the Board of Education then sought another approach to address the current and future maintenance needs of the school facilities. Based on a trend of significant declining student enrollment over time, and with the projection for the trend to continue into the foreseeable future, the BOE voted to move forward with the plan to contract the district from six schools to five by closing Island Avenue Elementary School in June 2019.

In the fall of 2017, the Board of Education again commissioned the services of Colliers International to develop a long-term facility maintenance plan. With reports developed over the past few years, a draft plan was presented to the Board of Education’s Facilities Committee in the spring of 2018. On May 31, 2018, the Facilities Committee voted to forward the draft **10 Year \$100 million Capital Maintenance Plan** to the full Board of Education for approval. On June 19, 2018, the full Board of Education voted unanimously to adopt the plan.

The plan then moved to the Capital improvement Program – the town and schools joint long-term capital projects plan - while board members and members of the public began to question if there was a better plan out there other than the 10 Year \$100 million maintenance plan. Members of the BOE, Board of Selectmen, and Board of Finance came together to form the Tri Board School Facilities Working Group. The group held meetings and public forums over a period of months and in April 2019 the group presented viable options for the town to consider beyond the BOE adopted 10 Year \$100 Million Capital Maintenance Plan.

In September 2019, the BOE voted unanimously to adopt a long-term plan for the renewal of our school facilities. This plan is the culmination of work at the BOE level since the failed referendum in 2017 and the vast efforts of the Tri-

September 3, 2021

Board School Facilities Working Group. While the referendum failed, the issue of aging school facilities and mounting maintenance projects remain.

The BOE voted to adopt a plan to contract the district further from five schools to four. The earliest point in which this model would be implemented would be for the 2025-2026 school year.

The BOE adopted plan calls for:

- New construction of a PreK-5 elementary school
- Improvements to Brown Intermediate School to transition to a K-5 school
- Maintaining Polson as a 6-8 school and DHHS as 9-12
- Renovations at Polson including:
  - Air Quality System/HVAC
  - Auditorium Modernization
  - Security Enhancements

The plan, which was approved unanimously by the BOE, would result in the closure of both existing K-3 elementary school buildings as well as the Town Campus Learning Center Preschool (TCLC). The plan has been sent to the school and town Capital Improvement Plan (CIP) where it will be incorporated with all other capital needs of Madison.

This project seeks to provide school buildings that:

- Create learning environments designed for current instructional strategies as captured in Madison's Core Documents;
- Benefit from needed technology upgrades;
- Comply with current building and fire codes;
- Incorporate contemporary design for school safety;
- Utilize modern, efficient heating and cooling systems; and
- Provide accessibility to all by meeting the requirements of the Americans with Disabilities Act.

#### IV. THE PROJECT

**Objective:** To ensure all Madison children are able to attend a school that is safe, modern, compliant with current building codes and able to support their educational program.

The following project specifications for the new Jeffrey Elementary School were developed using data from the population study conducted in March 2021: *School Enrollment Projections Analysis* conducted by Milone & MacBroom (now SLR).

- School: **Jeffrey Elementary School**
- Project Type: New Construction
  - Total Program Area: **58,895** square feet (*TGSF x 71%*)
  - Estimated Building Area (inside face of walls): **78,527** square feet
  - Space Standard Building Area: **74,867** square feet
  - Total Gross Square Feet (outside face of walls): **82,453** square feet (*Bldg. Area x 1.05*)
- Anticipated Referendum: February 2022
- Design Enrollment: **601\*** students

*\* Includes 45 PreK students from the Town Campus Learning Center*

## V. ENROLLMENT AND CAPACITY DATA

The Jeffrey Elementary School enrollment as of October 1, 2020 was 324 students in grades K – 3. The eight-year maximum enrollment projection for the new PreK-5 Jeffrey Elementary School is 601, which includes 45 PreK students transferring from the Town Campus Learning Center to the new Jeffrey Elementary School.

## VI. OVERVIEW OF PROGRAMS

### GENERAL EDUCATION

The features of the elementary classrooms at Jeffrey can be divided into three classifications: (1) Early Childhood – PreK and Full-Day Kindergarten; (2) Early Elementary - grades one and two; and (3) Intermediate - grades three, four and five. The classroom needs of all elementary children will require flexibility of space, portability of furniture and acoustical treatment of environment. This will be accommodated while providing low height furnishings and more space for group instruction and movement that will range from total class involvement to three or four separate groups doing different activities at the same time. Specific to Madison's instructional approach, whole class gathering spaces are required for both Morning Meeting/language arts mini lessons as well as a separate space for the Number Corner, a feature of the mathematics program. Space should also be provided for students to read, write, research, and study for either individual or small group projects. The learning environment must also accommodate space for multiple adults (specialists and para educators) who work with students within the general classroom environment. All instructional classrooms require storage space for items such as classroom libraries, textbooks, reference materials, supplemental books, supplies, science equipment, charts, globes, computers, calculators and audio-visual equipment. Equally important is wall space to post anchor charts and other instructional reference materials for students to access on a daily basis.

In addition to the subject areas of Health & Wellness, Mathematics, Reading/Language Arts, Science, and Social Studies, our General Education program includes curriculum focused on Art, Music, Physical Education, STEAM and World Languages. Additionally, an instrumental program (a percussion band and a theater class) is provided for all students in grades 4 and 5. Support Services include a Library/Media Center and technology support integrated throughout the learning environments. Facilities for these areas need to be specific to each program's purpose yet allow for flexibility of space as with the PreK-5 classrooms. As the PreK – 5 program requires that students travel to these various program areas periodically during the day, consideration should be given to the student traffic that will result from this academic arrangement. Student proximity to the library/media center, STEAM lab, gymnasium/auditorium, general music and art rooms should also be considered.

A platform off of the gymnasium will serve as a stage area for school assemblies, performances and other events. It will be adjacent to the gymnasium and accessible from the main corridor. The platform will be accessible and code compliant with ramp access. Included in the design will be a high-quality built-in sound system, stage draperies and main curtains, as well as adjustable stage and general lighting. An electronically controlled acoustical wall will be installed at the proscenium to allow the space to be used for instrumental music lessons and ensemble practice on the platform while the gymnasium is in use.

Additional instructional space is necessary to provide support for non-identified students, as prescribed in the Scientific Researched Based Intervention (SRBI) requirements of the Connecticut State Department of Education. General Education Intervention/Support Services is comprised of Reading, Mathematics and English Learner support (TESOL). Each of these rooms will be centrally located within the academic area of the building. These rooms will be utilized for individual testing, individual and small group instruction. A Developmental Guidance program is also part of the general education support services.

The outside play area for the early elementary and intermediate levels must be extensive and varied to accommodate activities that range from the minimal space demands of jump rope and the like, to larger areas needed to play soccer, kickball, softball, etc. This play area should be away from instructional spaces, if possible. Ideally, this play area should be in close proximity to gymnasium and cafeteria for easy access. The early childhood play area should be near the PreK and kindergarten classrooms, depending on the design of the school and proximity to other classrooms.

## **SPECIAL EDUCATION**

Madison Public Schools invest significantly in their special education programming to best serve their students and in order to avoid costly outplacement services for their students. Special Education programs at the new Jeffrey Elementary include: a PreK program with related services specific to PreK; a K-5 program: the Functional Academic Skills Education (FASE), serving students from across the district; K-5 Special Education Resource, Occupational/Physical Therapy (OT/PT) Services and Related Services (Social Work, Psychologist, Speech/Language/Hearing, BCBA).

Program spaces for special education/related service teachers should be able to meet the needs for small group instruction. They will need to be of sufficient size to accommodate children who require specialized equipment. Rooms will be used for individual testing, confidential meetings with parents and/or students, individual and small group instruction, counseling, and staff conferences.

## **SUPPORT SERVICES**

### **MEDIA CENTER**

The Library Media Center of an elementary school is a multi-purpose room and preferred to be located as a central “hub” of the school and can be referred to as a Learning Commons. It should be bright, colorful, attractive, warm and inviting. It is important that the media center be designed with the student’s safety in mind. There should be freestanding low, double-faced shelving allowing a staff member to see the entire area. The area must be spacious enough to house an appropriate print and media collection. There should be room for multiple classrooms to use this resource on an independent basis. The room is divided for multiple purposes. A small story corner, a large group instructional space, a student project area, a production area for teachers, provision for multiple computer workstations for research and access to online card catalogue as well as a circulation area located near an entrance/exit door is also required.

### **TECHNOLOGY**

A contemporary elementary school must be able to support varied uses of technology. In particular, the school’s infrastructure should reflect the latest in wiring and cabling, which would support current technology applications as well as the capacity to support future requirements. Computers should support the full range of educational and operational functions in the school.

Wiring for all classrooms will include multiple network drops and multiple electrical outlets. The entire facility will have wireless connectivity to support the implementation of one-to-one mobile devices such as laptops, netbooks, and other Internet-ready devices.

## **VII. PROGRAM SPECIFICATIONS (Detailed Description)**

Unless otherwise noted, the standard furnishings for every classroom noted below are expected to include the following:

- Room darkening shades
- Acoustical insulation for soundproofing
- Air conditioning
- ADA compliant building standards
- Wireless/internet access to support at least 30 mobile devices
- Multiple electric outlets
- Sound Field System
- Telephone
- Intercom for communication with office

**SPECIAL SERVICES PROGRAMS****PRE-SCHOOL PROGRAM**

Based on current enrollment projections of 45 students, four classrooms of the Pre-school will be required to meet the needs of special education students. By design, and to meet the legal requirements for inclusive education, the classes include eligible students with special needs and at least equal numbers of typical same age peers. Like kindergarten children, these children will spend a lot of time on the floor for activities. All of the furnishings, toilet and sinks should be at a level appropriate for children aged three to five. These classrooms should have space to accommodate gross and fine motor activities as well as lessons and an area for the children to sit together as a group. The classroom needs to have ample space to accommodate children who use wheelchairs, standers or other adaptive equipment, and several adults.

## IX. ENVIRONMENT – SYSTEMS – EQUIPMENT

<b>SYSTEM</b>	<b>SPECIFICATIONS</b>
<b>Building Systems</b>	<ul style="list-style-type: none"> <li>• The building systems incorporated into the new construction will be designed in accordance with Connecticut High Performance Building standards, equivalent in performance to a LEED Silver rating.</li> </ul>
<b>Heating/Cooling (HVAC) System</b>	<ul style="list-style-type: none"> <li>• Heating &amp; cooling should be produced with natural gas with a boiler for heating and roof top DX cooling. Consider including Geo-thermal wells for energy efficiency.</li> <li>• All spaces are to receive air conditioning, but only those areas with summertime use will have the systems running year-round; all other areas will have systems set to dehumidification only during summer months.</li> <li>• In-line water heaters for domestic hot water shall be provided during non-heating season usage.</li> <li>• Use in-slab hydronic heat delivery at the lower levels for PreK and Kindergarten classrooms.</li> <li>• Energy recovery units, VFD fan systems and pumps to be utilized in the design.</li> <li>• Perimeter heating will be provided by fin tube radiation and the possible use of ceiling mounted radiant panels, cooled by a VAV system with each room served by a dedicated VAV box and hydronic reheat coil.</li> <li>• The use of “chill beams” will be considered for general heating and cooling. Designer to provide additional information on chill beam systems to Owner.</li> <li>• The gymnasium/auditorium and cafeteria will be served by separate variable speed air handlers. Air handlers shall include a hot water heating coil and DX cooling coils.</li> </ul>

SYSTEM	SPECIFICATIONS
<b>Climate Controls/ Ventilation System</b>	<ul style="list-style-type: none"> <li>• The building will be designed with Direct Digital Control (DDC) systems (Alerton or Automate logic) centrally tied into the School Facilities Department via Graphical User Interface.</li> <li>• Spaces should have independent, on demand heating, cooling and ventilation control for operational efficiency.</li> <li>• Each classroom will be provided with a temperature sensor and carbon dioxide sensor. The carbon dioxide sensor is an energy saving device. By sensing the carbon dioxide within the room, the outside air intake is adjusted, reducing the amount of outside air being heated or cooled, resulting in less energy used.</li> <li>• Climate controls/ventilation systems need to meet current codes and standards.</li> <li>• MDF and IDFs must be climate controlled (A/C)</li> </ul>
<b>Lighting System</b>	<ul style="list-style-type: none"> <li>• Efficient and appropriate natural lighting will be maximized within the facility as appropriate for the programmatic use of the spaces.</li> <li>• Motion sensors and dual switching will be installed in classrooms.</li> <li>• The use of LEDs throughout, with exceptions in specialty areas.</li> <li>• Attention should be given to security lighting for both interior and exterior of the building.</li> <li>• Emergency back-up will be via local battery ballasts.</li> <li>• The use of light shelves and light sensors for natural light to reduce electrical load shall be considered in locations where possible.</li> </ul>
<b>Electrical (Power) System</b>	<ul style="list-style-type: none"> <li>• Power to be provided by local utility company.</li> <li>• Consider solar roof mounted.</li> <li>• Distribution will include customer metering.</li> <li>• Emergency (whole building) generator to accommodate Life Safety needs.</li> <li>• Generator must be sufficient to support critical IT equipment in MDF and all IDFs as well as administrative offices and Nurse's office.</li> <li>• Generator must support critical kitchen equipment with the intention being to cook, serve, and store food. (Hoods, ovens, serving line, freezer, refrigeration, etc.)</li> </ul>
<b>Technology</b>	<ul style="list-style-type: none"> <li>• There shall be a combined voice/data system with "VOIP" (Voice Over Internet Protocol) design.</li> <li>• The school shall have wall mounted, interactive LED devices in every classroom and meeting space.</li> <li>• Video streaming devices in every classroom and meeting space.</li> <li>• iPad and or Chrome Book charging stations in every room.</li> <li>• Multiple data drops with sufficient power in every classroom and meeting space.</li> <li>• Latest generation full WIFI coverage throughout the entire building.</li> <li>• Shared printing stations to support multiple classrooms in convenient locations throughout the building.</li> <li>• Head end equipment to be housed in an MDF with 24-hour environmental control.</li> <li>• All IDF closets require 24-hour environmental control.</li> <li>• Horizontal cabling shall be Category 6e plenum rated or contemporary equivalent.</li> <li>• Cable shall be run in corridors to support horizontal cable structure.</li> <li>• Fiber backbone between the MDF and IDF rooms shall be capable of at least 10GB minimum anticipating future growth.</li> <li>• Fiber optical cable from street to MDF also must support 10 GB as well as anticipate future growth.</li> <li>• Office space and workspace for Technology Personnel with sufficient data drops and power to support technology in the building.</li> <li>• Storage for Technology Department is critical.</li> </ul>

SYSTEM	SPECIFICATIONS
<b>Security</b>	<ul style="list-style-type: none"> <li>• Digital video surveillance of exterior/interior areas of the building integrated with District system.</li> <li>• Electronic security system with keypad access control installed into the school.</li> <li>• Design the plan to prevent access to instructional areas of the school when community events take place in assembly areas during non-school hours.</li> <li>• Motion sensors shall be mounted in corridors.</li> <li>• Respond to future state and/or federal mandates related to security requirements for elementary facilities (i.e. panic button systems)</li> <li>• Door locks shall be Sargent and integrated with existing MPS system.</li> </ul>
<b>Phone System</b>	<ul style="list-style-type: none"> <li>• A comprehensive, district-integrated phone system (dial-out) will be integrated into technology scope of the project, including hands-free and handle options.</li> <li>• Must be capable of reporting originating room identification as part of E911 call.</li> <li>• Install phones in every room of the facility occupied by teachers or students at any given time, including all meeting, support and instructional spaces.</li> <li>• Provide Voice Over “IP” options.</li> </ul>
<b>Public Address</b>	<ul style="list-style-type: none"> <li>• The building’s public address system is comprehensive and will be addressed as part of the technology component of the project to incorporate internal building communications as well as external communications.</li> <li>• The PA system should be developed in conjunction with the phone, clock, data, voice and DIVOS video distribution system of the school.</li> <li>• Secondary access to security and public address systems will be located in the MDF/Head End Room.</li> </ul>
<b>Clocks</b>	<ul style="list-style-type: none"> <li>• Clocks, similar to the phone system will be integrated into the technology component of the project.</li> <li>• All support and instructional spaces will be included.</li> <li>• System to have manual override capability in the event that Daylight Saving Times are adjusted by the Federal Government.</li> </ul>
<b>Plumbing System</b>	<ul style="list-style-type: none"> <li>• Plumbing fixtures/system will be designed per current and applicable codes.</li> <li>• Fixtures will be self-operating</li> <li>• Plastic piping to be considered for domestic water and heating where possible.</li> <li>• Floor drains in gang toilet areas</li> <li>• Plumbed for full whole building sprinkler system</li> </ul>
<b>Fire Protection</b>	<ul style="list-style-type: none"> <li>• Building will be fully protected by a sprinkler system installed per NFPA 13.</li> <li>• Waterless fire suppression systems required in MDF and IDF’s with appropriate redundant detection.</li> </ul>
<b>Fire Alarm</b>	<ul style="list-style-type: none"> <li>• The building will be protected by a fully addressable analog, manual and automatic fire alarm system. MPS use Notifier fire system in all schools.</li> </ul>
<b>Acoustics</b>	<ul style="list-style-type: none"> <li>• The building will comply with ANSI S12.60-2002: Acoustical Performance Criteria, Design Requirements and Guidelines for Schools.</li> <li>• Suspended acoustical ceilings and/or acoustical decks will be installed throughout the building.</li> <li>• Corridor walls should be constructed of glazed concrete masonry units, or materials with a comparable NRC rating, and provide an adequate separation for sound control.</li> <li>• In specialized areas, such as media centers, appropriate acoustical treatments will be installed.</li> <li>• Sound field system will be provided in each classroom.</li> </ul>
<b>Windows/Doors</b>	<ul style="list-style-type: none"> <li>• Windows should be high efficiency, non-operational type with low e-glazing.</li> <li>• Emergency egress windows and rated doors will be installed in accordance with applicable codes.</li> <li>• Consider key fobs, thumb latches, vision panels – review with District and integrate with security section.</li> <li>• Door locks shall be Sargent and integrated with existing MPS system.</li> </ul>

## **X. SITE DEVELOPMENT**

There will be three primary entrance areas to the building: (1) the Main Entrance for visitors and parent drop off/pick up; (2) K-5 student entrance for bus drop-off/pick up; (3) PreK entrance with separate bus loop. Passive security measures, such as visual control of the entrances from the adjacent office area, must be planned for. Active security measures and systems will be developed with the building design. Adequate lighting for monitoring activities and ensuring safety are of paramount importance at the building entrances. Each entrance area should accommodate a separate bus loading and parent drop-off area. Entry overhangs or covered walkways will be provided for inclement weather to the extent practicable.

Bus loading areas should be configured as a one-way drive in a direction to assure that loading and unloading of students occurs from the right-hand side of the vehicle adjacent to the building. The drive will have two lanes: one for travel, and one for stopping and unloading. The bus loading driveway should be located such that buses exit upstream of automobiles, thereby reducing delays.

Parent drop-off areas will also be configured as a one-way drive in a direction to ensure that loading and unloading of students occurs from the right-hand side of the vehicle adjacent to the building. Student drop-off and pick-up areas are to be separated from the bus loading area, and preferably should be separate from other parking lots.

A Receiving/loading dock should accommodate 18-wheeler vehicles and should be located in such a way as not to interfere with primary entrance areas yet be close to kitchen/custodial area.

Parking for staff and visitors will be developed to take the multiple uses of the building into account. In determining the size and location of the parking lots, consideration will be given to the use of the building for community access as well as student safety. ADA and other code requirements will be addressed in the design of parking.

Sidewalks will be featured around the perimeter of the school and shall be concrete with monolithic concrete curbing. Access to the parking lots, playfields, bus and parent pickup/drop-off areas, and access for student walkers will be addressed. Sidewalks should be designed to accommodate students who walk or ride bicycles to school. The number of driveways that are crossed by sidewalks should be eliminated/minimized as much as practicable.

Playgrounds will include paved (dry) play areas, replacement baseball and soccer fields, and new playscape equipment. PreK and Kindergarten play areas should be located in close proximity to their classrooms. Intermediate play areas should be located away from classroom areas, and in close proximity to the gymnasium.

Playfields, parking, service drives, drop-off zones and bus zones should be located to reduce the cost of connecting elements without requiring pedestrians to cross vehicular traffic lanes. The location of driveways, walkways and landscaping must permit adequate sight distances for both vehicles and pedestrians.

Site utilities and physical plant components, including drives and access roads, will be located to avoid conflict with student and vehicular traffic, as well as the planned future growth of building components.

Landscaping will be designed to allow the school to blend with the environment as well as to provide passive cooling and windbreaks when possible. Trees and other greenery will be of a hearty variety and require little maintenance and which complement the building and site. Trees will be planted a sufficient distance from the building to avoid future maintenance problems. Consideration will be given to safety and security when placing foliage around walkways and areas of building access.
