Defining Child Sexual Abuse

Child sexual abuse is a form of child abuse that includes sexual activity with a minor. A child cannot consent to any form of sexual activity, period. Child sexual abuse does not need to include physical contact between a perpetrator and a child. Some forms of child sexual abuse include:

- ▶ Exhibitionism, or exposing oneself to a minor
- ▶ Fondling
- ▶ Intercourse
- ▶ Masturbation in the presence of a minor or forcing the minor to masturbate
- ▶ Obscene phone calls, text messages, or digital interaction
- ▶ Producing, owning, or sharing pornographic images or movies of children
- ▶ Sex of any kind with a minor, including vaginal, oral, or anal
- ▶ Sex trafficking
- ▶ Any other sexual conduct that is harmful to a child's mental, emotional, or physical welfare

U.S. Department of Justice

Facts and Statistics: Child/Teen Victims

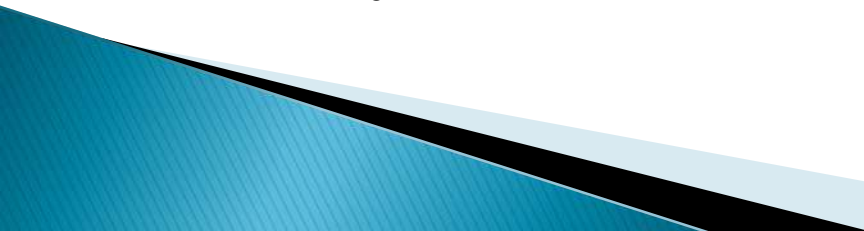

- ▶ Victims who were sexually abused: 26% age 12-14 and 34% younger than 9 years
- ▶ Approximately 1.8 million adolescents in the United States have been the victims of sexual assault
- ▶ Approximately 1 in 6 boys and 1 in 4 girls are sexually abused before the age of 18
- ▶ 35.8% of sexual assaults occur between the ages of 12 and 17
- ▶ 82% of all juvenile victims are female
- ▶ 69% of the teen sexual assaults reported to law enforcement occurred in the residence of the victim, the offender, or another individual
- ▶ Approximately 1 in 5 female high school students report being physically and/or sexually abused by a dating partner

U.S. Department of Justice: Abuse via Technology

- ▶ Approximately 1 in 7 (13%) youth Internet users received unwanted sexual solicitations
- ▶ 1 in 25 youths received an online sexual solicitation in which the solicitor tried to make offline contact
- ▶ In more than one-quarter (27%) of incidents, solicitors asked youths for sexual photographs of themselves
- ▶ The most common first encounter of a predator with an Internet-initiated sex crimes victim took place in an online chat room (76%)
- ▶ In nearly half (47%) of the cases involving an Internet-initiated sex crimes victim, the predator offered gifts or money during the relationship-building phase
- ▶ 15% of cell-owning teens (12-17) say they have received sexually suggestive nude/seminude images of someone they know via text
- ▶ 26% of teenagers and young adults say they have participated in sexting

Who are the offenders?

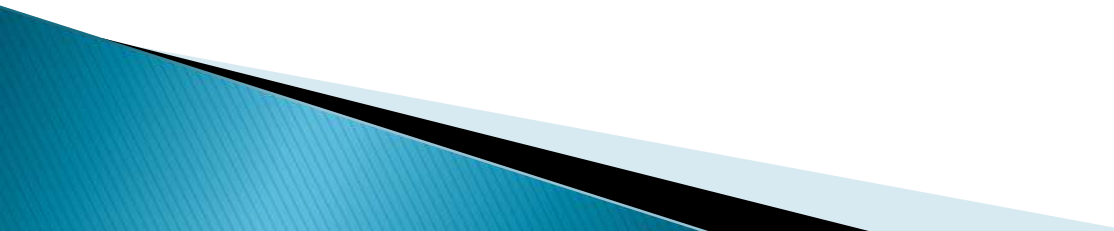

National Center for Victims of Crime Statistics:

- ▶ Offenders are overwhelmingly male, ranging from adolescents to the elderly
 - ▶ Some perpetrators are female. It is estimated that women are the abusers in about 14% of cases reported among boys and 6% of cases reported among girls
 - ▶ Approximately one-third of offenders are themselves juveniles
 - ▶ 23% of reported cases of child sexual abuse are perpetrated by individuals under the age of 18
 - ▶ Only 14% of children who suffered sexual abuse were violated by an unknown perpetrator
 - ▶ 60% of children are sexually abused by someone in their social circle. Hence, the phrase “Stranger Danger” is misleading
 - ▶ 40–80% of juvenile sex offenders have themselves been victims of sexual abuse

Age of Sexual Consent

Age of consent is *irrelevant* in the following; as even consensual adult sexual activity is *criminalized* in these relationships:

Non-Disclosure

- ▶ Not all sexually abused children exhibit symptoms—some estimate that up to 40% of sexually abused children are asymptomatic
- ▶ Males tend not to report their victimization, which may affect statistics. Some men even feel societal pressure to be proud of early sexual activity, regardless of whether it was unwanted.
- ▶ Children do not tell for a variety of reasons. These include:
 - threats to the child
 - fear of the perpetrator
 - lack of opportunity
 - lack of understanding of child sexual abuse
 - relationship with the perpetrator
 - shame
 - fear of causing trouble in the family
 - fear their parent's reaction

Student Disclosure

 - It is frequently to a friend or a sibling
 - Of all other family members, mothers are most likely to be told. Whether or not a mother might be told will depend on the child's expected response from the mother
 - Few disclose abuse to authorities or professionals
 - Of all professionals, teachers are the most likely to be told
- ▶ Provide a safe environment , safety is priority
- ▶ Provide reassurance and support
- ▶ Obtain facts, ask as few questions as possible
- ▶ You don't need to know specific details
- ▶ Obtain enough information to decide if abuse/exploitation *may* have occurred
- ▶ Don't need to be *certain* of abuse
