Mobile Health Clinic

Juanita Garza–Castro, MBA
Regional Manager,
MMC Business Development

Isidro Ramirez, B.S.
Regional Coordinator

Scheduled to begin Spring 2015

▶ Purpose:

- In partnership with our community and regional partners, we will offer free primary care services to the uninsured and high risk populations across dozens of central valley communities.

▶ Community Benefits:

- Not everyone obtains healthcare coverage (for several reasons). Our goal is to be direct providers and bridge the gap to accessible healthcare services to promote healthier communities and provide more purposeful impact.

**Only steps away from a health care provider
for our community's uninsured population**

Staffed by a health care team, the **Sutter Health Central Valley Region Mobile Health Clinic** offers non-insured patients:

Annual physicals

Head-to-toe physical exams as well as basic age appropriate screenings including pap smears and prostate exams.

Basic health care

Care for issues such as colds, back pain, headache, sleep problems, fatigue, weight-loss, skin concerns, and follow-up care for conditions like diabetes, high blood pressure and high cholesterol.

Immunizations

We provide immunizations for the flu, hepatitis A or B, pneumonia, shingles, tetanus, whooping cough (pertussis) and more.

Lab work

Standard lab tests such as blood pressure, body mass index, cholesterol levels, diabetes, kidney function, liver function and thyroid function. We also offer pregnancy tests and prostate cancer screening. Follow-up appointments will be scheduled to discuss the results.

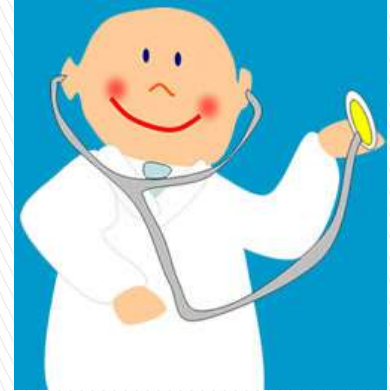

Resources

- Assistance finding services for continuity of care
- Assistance with Covered California application
- Assistance with providing resources for specialist

To schedule an appointment or for more information visit suttercentralvalley.org or call (209) 530-3489.

Community–Engaged Partnerships

- ▶ Sharing resources and referral networking
 - Primary care providers
 - Pharmacy and medication resources
 - ▶ Opportunity to develop system–wide implementation of healthcare models
 - Emphasis: disease prevention, chronic disease management, and ER utilization
 - ▶ Exemplify our foundation for regional community partnerships across our valley’s geographies and unique needs
-
