

Connecticut High School Graduation Requirements Unpacked

Brief 1: Introduction to the Series

In 2017 the Connecticut General Assembly took a bold step in its journey to create a graduation diploma system that prepares all students for the future of their choosing while allowing local districts, schools, and students the flexibility to create a wide variety of learning pathways. A summary of the major changes to the graduation requirements is captured in the table below. They include an increase in the number of required credits, significant emphasis on flexibility and multiple pathways, less restrictive course requirements, required students supports and remediation, and a new mastery-based diploma assessment requirement. This new law maintains the provision around mastery-based learning and graduation.

Over the course of the next several weeks, we will be publishing brief updates that dig into each of the individual areas below with resources, ideas, and considerations for implementation. These updates will help you think about these areas for opportunities in ways that build upon the work you're already engaged in and are simple, actionable, and have the potential to profoundly impact students.
