

EXHIBIT H – Brief Narrative re: cleaning, a la carte, vehicles, and cash handling

LEARN has the highest standards of cleanliness and maintenance and expects the same from the FSMC it contracts with. If deficiencies are noted either by the District or the FSMC they must be corrected immediately. Maintenance issues are to be promptly reported to the SFA's facilities department. If the SFA notices deficiencies on the FSMC's part, prompt attention and correction will be expected.

A la carte items are to be made available at the high school level and must be paid for either in advance or at each transaction.

LEARN will supply courier service for food to be transported from Marine Science Magnet High School to Three Rivers Middle College. There could, on occasion, be reason for additional transport needs. LEARN will be looking for a FSMC that is willing to partner with the SFA to troubleshoot solutions to short- or long-term issues.

Cash is to be reconciled daily, in conjunction with SFA school staff, and deposited on a regular basis. Discrepancies will be addressed immediately, and repeated concerns will lead to further investigation and action.
