

During last night's Board of Education meeting, the board unanimously voted to direct Tecton Architects to complete the long-range facilities master plan for the Simsbury Public Schools by prioritizing the option of a 6th grade addition to Henry James and a renovate-as-new project at Latimer Lane as the first capital improvement projects in the timeline. Once the formal plan is completed, the conversation will move forward to the Board of Selectmen and Board of Finance for an analysis of the town's ability to fund identified projects over the long term. Due to the economic impact of COVID-19, the originally presented timeline for these projects may need to be altered. More detailed communication from the Superintendent will come out later this week.
