## Module 6: Find the missing side

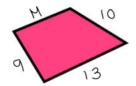

\*\*Remember... to find perimeter, ADD UP ALL THE SIDES!!

1. The perimeter of the given polygon is 30. Find the length of side K.

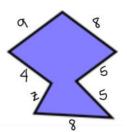

Equation: \_\_\_\_\_\_ Side K = \_\_\_\_\_

1. The perimeter of the given polygon is 41. Find the length of side M.

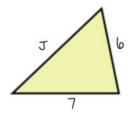

Equation: \_\_\_\_\_\_ Side M = \_\_\_\_\_

2. The perimeter of the given polygon is 42. Find the length of side Z.

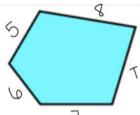

Equation: \_\_\_\_\_\_ Side Z = \_\_\_\_\_

3. The perimeter of the given polygon is 24. Find the length of side J.

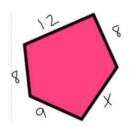

Equation: \_\_\_\_\_\_ Side J = \_\_\_\_\_

4. The perimeter of the given polygon is 37. Find the length of side T.

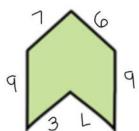

Equation: \_\_\_\_\_\_ Side T = \_\_\_\_\_

5. The perimeter of the given polygon is 47. Find the length of side X.

Equation: \_\_\_\_\_\_ Side X = \_\_\_\_\_

6. The perimeter of the given polygon is 36. Find the length of side L.

Equation: \_\_\_\_\_\_ Side L = \_\_\_\_\_

7. The perimeter of the given polygon is 62. Find the length of side C.

Equation: \_\_\_\_\_\_ Side C = \_\_\_\_\_
