Question	Answer	Side 3
<input type="checkbox"/> The way the body moves and maintains balance with the most efficient use of all its parts in a way that does not add undue stress is known as?	body mechanics	
<input type="checkbox"/> Keeping your feet 12-14 inches apart, placing one foot slightly forward, and pointing the toes in the direction of movement is how one maintains a _____?	base of support	
<input type="checkbox"/> What is the main purpose of using Body Mechanics?	to prevent injury	
<input type="checkbox"/> When using proper body mechanics how should you pick up an object?	(any order)keep back straight, bend at hips and knees, keep object close to body	
<input type="checkbox"/> When you change the direction of your body, using proper body mechanics, you must do what?	pivot with your feet	
<input type="checkbox"/> What do loss of balance, unlighted hallways, wet floors, crib rails left down, and visual changes commonly cause?	accidents and falls	
<input type="checkbox"/> Smoking and electrical overload are common causes of what?	fire	
<input type="checkbox"/> Decreased sensation to what increases the probability of burns in elderly clients?	temperature and pain receptors	
<input type="checkbox"/> In case of fire, what steps should you follow?	1) rescue any patient in immediate danger 2) pull alarm/announce fire contain/close doors extinguish the fire	
<input type="checkbox"/> In case of fire or natural disaster what is the first thing to keep in mind?	do not panic	
<input type="checkbox"/> Clients hoarding medications can lead to what problems?	overdose	
<input type="checkbox"/> What is your main concern with a client exhibiting an unsteady gait?	falling	
<input type="checkbox"/> Why should a bed be kept in the low position, when you are not performing procedures?	to prevent falls	
<input type="checkbox"/> What is the primary reason for using protective devices?	to prevent the client from injuring themselves or others.	
<input type="checkbox"/> A client who is in protective devices complains of a tingling sensation, and the extremity is cool to the touch. What are these signs of?	Impaired circulation	
<input type="checkbox"/> According to OBRA regulations, protective devices may only be used as a:	last resort	
<input type="checkbox"/> What protective device prevents clients from scratching themselves but gives the most freedom of movement?	hand mitts	
<input type="checkbox"/> What is the number one cause of fires in health care facilities?	smoking	
<input type="checkbox"/> In what order are clients evacuated from a facility during a fire?	1) ambulatory, 2) wheelchair, 3) bedridden	
<input type="checkbox"/> Why should a staff member stay with the clients after they have been evacuated?	to keep them from reentering the facility	
<input type="checkbox"/> An anti-septic control method that destroys pathogens but does not usually kill spores and viruses is:	disinfection	
<input type="checkbox"/> What is the most effective procedure for controlling infection?	handwashing	
<input type="checkbox"/> An area which is free of germs and contains materials and/or equipment that are free of germs is known as a?	sterile field	
<input type="checkbox"/> A health care worker contracts an infection after cleaning up soiled equipment without using proper personal protective equipment. This is an example of what mode of transmission?	indirect contact	
<input type="checkbox"/> Transmitting microorganisms by a patient touching the health care worker is an example of what mode of transmission?	direct contact	
<input type="checkbox"/> The disease producing power of a microorganism is called?	virulence	
<input type="checkbox"/> What is a person, animal, or plant which supports a parasite called?	host	
<input type="checkbox"/> Something which has been exposed to germs is considered:	contaminated	
<input type="checkbox"/> Microbes that cause disease are called?	pathogens	
<input type="checkbox"/> What is a person with low resistance or decreased immunity called?	susceptible host

Question	Answer	Side 3
<input type="checkbox"/> What term is used to describe quivering of cardiac muscle fibers which produces ineffective, rapid but weak heart action?	fibrillation	
<input type="checkbox"/> What term describes the spread of cancer from one organ of the body to another?	metastasis	
<input type="checkbox"/> What is the medical term for the onset of menstrual periods?	menarche	
<input type="checkbox"/> What is the term used to describe the period of time immediately following the delivery of a baby?	postpartum	
<input type="checkbox"/> What is the name of the instrument used to measure the volume of exhaled air?	spirometer	
<input type="checkbox"/> What is the condition called which results from a decrease in the amount of calcium stored in the bones?	osteoporosis	
<input type="checkbox"/> What is the term given for having had nothing to eat or drink for a specific period of time?	fasting	
<input type="checkbox"/> Name the condition where a patient has overwhelming attacks of sleep which cannot be overcome?	narcolepsy	
<input type="checkbox"/> What is an x-ray of the breast called?	mammogram	
<input type="checkbox"/> What is the name of the chronic lung disease characterized by over distention of the alveolar sacs and inability to exchange oxygen and carbon dioxide?	emphysema	
<input type="checkbox"/> According to Maslow's hierarchy of needs, what are the needs to be met after the physiological needs?	safety and security	
<input checked="" type="checkbox"/> What is the partition that separates the two nasal cavities called?	nasal septum	
<input type="checkbox"/> What are the two main tubes to the lungs called?	bronchi	
<input type="checkbox"/> What is the cluster of capillaries located at one end of the nephron called?	glomerulus	
<input type="checkbox"/> What is the tube called that carries urine from the bladder to the outside?	urethra	
<input type="checkbox"/> Which endocrine gland is the largest?	thyroid	
<input type="checkbox"/> What hormone regulates the metabolic rate of body cells?	thyroxin	
<input checked="" type="checkbox"/> What do lacrimal glands secrete?	tears	
<input checked="" type="checkbox"/> Which gland produces a hormone which regulates the amount of calcium dissolved in the circulating blood?	parathyroid	
<input type="checkbox"/> Name the female gonad.	ovary	
<input type="checkbox"/> What is the 20 foot tube in which the spermatozoa mature and become motile?	epididymis	
<input checked="" type="checkbox"/> Name the cartilage associated with the larynx which bends over the laryngeal opening to direct food into the esophagus.	epiglottis	
<input type="checkbox"/> What is the valve between the small and large intestine called?	ileocecal	
<input checked="" type="checkbox"/> What is the first part of the small intestine called?	duodenum	
<input type="checkbox"/> What membrane lines the eyelids?	conjunctiva	
<input type="checkbox"/> What cranial nerve carries impulses for smell?	olfactory	
<input type="checkbox"/> What is the region or junction at which a nerve impulse is transmitted from one neuron to another called?	synapse	
<input type="checkbox"/> What lobe of the cerebrum interprets visual messages?	occipital	
<input type="checkbox"/> What kind of glands are those which secrete hormones into the blood stream?	endocrine	
<input checked="" type="checkbox"/> What is the anatomical term that indicates a structure nearer its origin?	proximal

Question	Answer	Slide 3
<input type="checkbox"/> What are the desired end products of carbohydrate digestion?	monosaccharides	
<input type="checkbox"/> What is a protein that is deficient in one or more essential amino acids called?	Incomplete	
<input type="checkbox"/> What is the protoplasm inside the cell membrane called?	cytoplasm	
<input type="checkbox"/> Name the three kinds of muscles and tell whether it is voluntary or involuntary.	(any order) skeletal, voluntary smooth, involuntary cardiac, involuntary	
<input type="checkbox"/> What are the hardest structures in the body, which are constructed primarily of calcium?	teeth	
<input type="checkbox"/> List three accessory organs of digestion.	(any order) liver, gallbladder, pancreas	
<input type="checkbox"/> What is the most abundant mineral in the body?	calcium	
<input type="checkbox"/> What is another name for the master gland?	the pituitary gland	
<input type="checkbox"/> What is the medical term for the collar bone?	clavicle	
<input type="checkbox"/> What muscle abducts the arm and caps the shoulder?	deltoid	
<input type="checkbox"/> What is the kissing muscle of the lips called?	orbicularis oris	
<input type="checkbox"/> What artery supplies blood to the head and the neck?	carotid	
<input type="checkbox"/> What is the name of the longest vein of the body?	saphenous	
<input type="checkbox"/> Name two of the three types of hormones that are produced in the adrenal cortex.	(any order) glucocorticoids, mineralocorticoid, androgens	
<input type="checkbox"/> Name the two types of cells in the islets of Langerhans that produce hormones.	(any order) Alpha and Beta	
<input type="checkbox"/> What hormone stimulates the "fight or flight" response to an emergency?	epinephrine	
<input type="checkbox"/> The body may be divided into three imaginary planes. Which plane runs lengthwise from the front to the back dividing the body into right and left sides?	sagittal	
<input type="checkbox"/> The body may be divided into three imaginary planes. Which plane cuts the body horizontally into an upper and lower portion?	transverse	
<input type="checkbox"/> Which bands of connective tissue anchor bones together?	ligaments	
<input type="checkbox"/> What is the body's first line of defense against pathogens?	skin	
<input type="checkbox"/> How many cervical vertebra are there in the vertebral column?	seven	
<input type="checkbox"/> What is the medical term for the knee bone?	patella	
<input type="checkbox"/> What is the medical term for the lower arm bone on the thumb side?	radius	
<input type="checkbox"/> What is the medical term for the lower arm bone on the little finger side?	ulna	
<input type="checkbox"/> What is the longest and strongest bone of the body?	femur	
<input type="checkbox"/> What is the name of the hip socket into which the head of the femur articulates?	acetabulum	
<input type="checkbox"/> What is the projection of the ulna known as the elbow or "funny bone" called?	olecranon process	
<input type="checkbox"/> What is the movement in certain types of joints that decreases the angle between two adjoining bones called?	flexion	
<input type="checkbox"/> What is the movement in certain types of joints that increases the angle between two adjoining bones called?	extension	
<input type="checkbox"/> Name the outer membrane covering the brain and spinal cord.	dura mater

Question	Answer	Side 3
<input type="checkbox"/> What disease can be caused by a parasite sometimes found in pork?	trichinosis	
<input type="checkbox"/> What type of diet should help reduce edema?	low sodium	
<input type="checkbox"/> Name the mucous membrane lining the inner surface of the uterus.	endometrium	
<input type="checkbox"/> What is the progressive wavelike movement that occurs involuntarily in the walls of the gastrointestinal tract called?	peristalsis	
<input type="checkbox"/> What is the tough connective tissue membrane that covers the bone called?	periosteum	
<input type="checkbox"/> What are the coverings of the brain and spinal cord called?	meninges	
<input type="checkbox"/> What is the liquid part of the blood known as?	plasma	
<input type="checkbox"/> Blood in the right ventricle is kept from being pumped back into the atrium by the action of what structure?	tricuspid valve	
<input type="checkbox"/> What stimulates the initiation of the heart beat?	sinoatrial node	
<input type="checkbox"/> The coronary arteries branch off what blood vessel?	ascending aorta (Be specific, only correct answer)	
<input type="checkbox"/> Name the lymphatic organ that plays a key role in immunity and becomes adipose tissue later in life?	thymus	
<input type="checkbox"/> Where is the Circle of Willis located?	In the brain	
<input type="checkbox"/> Name a glandlike structure in the brain that is shaped like a pine cone, located in a pocket near the corpus callosum. The exact function of the gland is unknown.	pineal body	
<input type="checkbox"/> What nerve is known as the pneumogastric or 10th cranial nerve, has both motor and sensory functions and a wider distribution than any of the other cranial nerves?	vagus	
<input type="checkbox"/> What blood vessels generally carry blood low in oxygen content?	veins (must be plural)	
<input type="checkbox"/> What are the tubes that connect the kidneys to the bladder called?	ureters (must be plural)	
<input type="checkbox"/> Iron is a necessary component of what part of red blood cells?	hemoglobin	
<input type="checkbox"/> How many glasses of liquid should be consumed daily by an adult?	six to eight	
<input type="checkbox"/> What are the 46 thread-like substances in the nucleus of a human cell which carry hereditary characteristics called?	chromosomes	
<input type="checkbox"/> What are the basic structural units of nerve tissue called?	neurons	
<input type="checkbox"/> What is the body system called that includes the hair, nails, and skin?	integumentary	
<input type="checkbox"/> What is another name for the excretory system?	urinary	
<input type="checkbox"/> What is a localized dilation or balloon-like swelling that may occur as a result of weakness in the wall of an artery?	aneurysm	
<input type="checkbox"/> What is the response of damaged tissues to injury which is characterized by swelling, redness, heat, and pain?	inflammation	
<input type="checkbox"/> How many ribs are there in the human body?	12 pairs	
<input type="checkbox"/> Which of the endocrine glands produces hormones which regulate the growth of the body, especially the skeleton?	pituitary	
<input type="checkbox"/> What nutrient comprises about 58% of the body weight?	water	
<input type="checkbox"/> What are protease, lipase and amylase examples of?	enzymes	
<input type="checkbox"/> What mineral is essential for regular heart rhythm and is found in meats, oranges, and bananas?	potassium	
<input type="checkbox"/> Name the four fat soluble vitamins	A, D, E, K (any order)

Question	Answer	Side 3
<input type="checkbox"/> What nutrient is the cheapest and most abundant of the energy nutrients?	carbohydrates	
<input type="checkbox"/> Where is Vitamin A stored?	in the liver	
<input type="checkbox"/> Why should vegetables be boiled with little water?	to avoid loss of water soluble vitamins	
<input type="checkbox"/> What organ functions to produce bile and store glycogen, fats, proteins, and vitamins?	liver	
<input type="checkbox"/> What is the tube that extends from the pharynx to the stomach called?	esophagus	
<input type="checkbox"/> What is the presence of air in the pleural cavity called?	pneumothorax	
<input type="checkbox"/> What is the bone that forms the upper jaw?	maxilla	
<input type="checkbox"/> What is the bone that forms the lower jaw?	mandible	
<input type="checkbox"/> What vitamin deficiency will affect bones?	D	
<input type="checkbox"/> What are the basic building blocks of proteins called?	amino acids	
<input type="checkbox"/> Which nutrients require a longer time for digestion?	fats	
<input type="checkbox"/> What mineral may need to be increased in the diet of a patient with anemia?	iron	
<input type="checkbox"/> What meat contains three times as much thiamine as other meats?	pork	
<input type="checkbox"/> What are the receiving chambers of the heart?	atria	
<input type="checkbox"/> What are the discharging chambers of the heart?	ventricles	
<input type="checkbox"/> What is the part of the nervous system that is concerned with control of involuntary bodily functions?	autonomic	
<input type="checkbox"/> Name three functions for the skeletal system?	(any three; any order) protection, movement, mineral storage, production of blood cells, support	
<input type="checkbox"/> Which part of the central nervous system controls heart rate, blood pressure, respiration, and swallowing?	medulla oblongata	
<input type="checkbox"/> Name the two phases of ventilation.	(any order) inspiration , expiration	
<input type="checkbox"/> How many servings of milk are recommended for a teenager daily?	three	
<input type="checkbox"/> What is a serving size for lean meat, fish or poultry for the meat group?	2-3 oz	
<input type="checkbox"/> Where does most of the nutrient absorption take place?	small intestine	
<input type="checkbox"/> Which nutrient is best to provide a burn patient's need to build new tissue?	protein	
<input type="checkbox"/> What are the four kinds of taste receptors of the tongue?	(any order) sweet, sour, salty, bitter	
<input type="checkbox"/> What are two of the three functions of food?	(any two, any order) provide energy, build and repair body tissues, regulate and control body's chemical processes	
<input type="checkbox"/> Name four of the six prime nutrient classifications.	(any four in any order) carbohydrates, vitamins fats, minerals, protein, water	
<input type="checkbox"/> What do the initials RDA stand for?	Recommended Daily Allowance	
<input type="checkbox"/> What is the term used to describe a state in which a prolonged lack of one or more nutrients retards physical development or causes the appearance of specific clinical conditions?	malnutrition	
<input type="checkbox"/> According to the food pyramid, which food group supplies significant amounts of calcium, riboflavin, and protein?	milk, yogurt, and cheese	
<input type="checkbox"/> According to the food pyramid, which food group supplies a significant amount of protein, niacin, iron, and thiamin?	meat, poultry, fish, dry beans, eggs, and nuts

Question	Answer	Side 3
<input type="checkbox"/> Citrus fruit is recommended for the daily intake of what vitamin?	C	
<input type="checkbox"/> One grain equals how many mg?	60	
<input type="checkbox"/> Five hundred mg equals how many grams?	0.5	
<input type="checkbox"/> Thirty minims equals how many milliliters?	2	
<input type="checkbox"/> How many ounces equals one cup?	8	
<input type="checkbox"/> How many tablespoons of liquid equals 2 ounces?	4	
<input type="checkbox"/> You have available vials of a substance labeled 75 mg in 1.5 ml. The order reads to give 60 mg. How many ml should you administer?	1.2 ml	
<input type="checkbox"/> What is an injury resulting in an over stretching of muscles called?	a strain	
<input type="checkbox"/> What is a displacement of a bone end from a joint?	dislocation	
<input type="checkbox"/> If Aspirin comes labeled 5 gr/tab and you want to take 600 mg. How many tablets would you take?	2	
<input type="checkbox"/> Baby A grows 3/8 inch in length in January and grows 7/16 in February. How many total inches did the baby grow?	13/16	
<input type="checkbox"/> A medical assistant fills a storage cabinet with 14 bottles of dextrose. Each bottle is filled with 16 2/3 ounces of the solution. How many ounces of this solution are in the cabinet?	233 1/3 oz	
<input type="checkbox"/> The \$125,000 supply budget for maintenance contracts must be reduced by 1/10. How much money will be left in the budget?	\$112,500	
<input type="checkbox"/> If 1.5 grams of a drug are administered B.I.D. to each of 12 patients, how many grams of the drug will be used in 30 days?	1080 g	
<input type="checkbox"/> If flu shots cost a clinic \$0.50 and the clinic charges \$5.00 per flu shot, what is the gross profit for a clinic that administers 178 flu shots?	\$801.00	
<input type="checkbox"/> A weight-loss clinic records the following weight losses for the following patients: A lost 2.938 kilograms B lost 3.891 kilograms C lost 1.218 kilograms D lost 0.112 kilograms What was the average weight loss? (take answer out to 3 places after decimal point)	2.038 kg	
<input type="checkbox"/> If 500 gowns are needed in each of 8 examination rooms and the available supply is 2938, how many more gowns need to be ordered?	1062	
<input type="checkbox"/> The following graph reads: water glass = 240 cc small bowl = 120 cc juice glass = 100 cc In an eight hour shift, a patient on I & O drank 3 glasses of water, one small bowl of broth, and one juice glass of apple juice. What was his total intake for the shift?	940 cc	
<input type="checkbox"/> Who originated the use of carbolic acid on wounds to kill microorganisms and prevent infection?	Joseph Lister	
<input type="checkbox"/> Who discovered X-rays?	Wilhelm Roentgen	
<input type="checkbox"/> Who invented the microscope and established that there was life smaller than the eye could see.	Anton von Leeuwenhoek	
<input type="checkbox"/> Who discovered that microorganisms were everywhere and invented the process of pasteurization?	Louis Pasteur	
<input type="checkbox"/> Who is known as the "father of microbiology"?	Robert Koch	
<input type="checkbox"/> About the 5th century, a Greek physician wrote a code of ethics for medical practice. Who was he?	Hippocrates	
<input type="checkbox"/> Who is the founder of modern nursing?	Florence Nightingale
