DIRECTIONS:

You can use these however you want, but I'll tell you how I use my full product incase you need some guidance.

FOR MY FULL PRODUCT - I have four sets of flashcards that are grouped by the "whole thing". Meaning, all of the make 10 is together, all of the make 9 is together, and so on. This is for my beginners who need to have some consistency with number bonds.

I also have eight sets of flashcards (I use the cover on page 3-twice for these). These flashcards all are mixed up. You can mix them up however you choose.

Once I print everything I need, I write the **answers in pencil** on the back of the card. Then laminate all sheets, then cut out. I then punch a hole in the right hand corner and use as my flashcard center.

Students can either use as flashcards with a partner or center where they write the answer and then check. (using dry erase markers).

If you have any questions or comments, please don't hesitate to email me at scjuneau@yahoo.com.

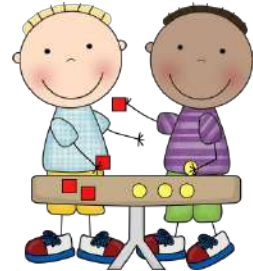

Thanks for checking out my sample product!
