

Name _____

Date _____

Erica buys some packs of rubber bracelets. There are 8 bracelets in each pack.

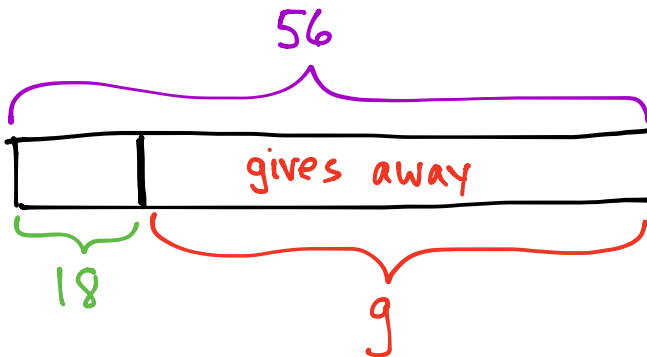

- a. How many packs of rubber bracelets does she buy if she has a total of 56 bracelets? Draw a tape diagram, and label the total number of packages as p . Write an equation, and solve for p .

$$56 \div 8 = p$$

$$7 = p$$

- b. After giving some bracelets away, Erica has 18 left. How many bracelets did she give away?

$$56 - g = 18$$

$$g = 38$$

Erica gave away
38 bracelets.
