

Name _____

Date _____

Donald writes $6 \times 9 = 54$. Explain two strategies you could use to check his work.

$$\begin{aligned} 6 \times 9 &= 5 \times 9 + 1 \times 9 \\ &= 45 + 9 \\ &= 54 \end{aligned}$$

Other methods
also exist

$$\begin{aligned} 6 \times 9 &= 6 \times 10 - 6 \times 1 \\ &= 60 - 6 \\ &= 54 \end{aligned}$$

$$9, 18, 27, 36, 45, 54$$
