

GEOGRAPHY STORIES: STATES & PROVINCES!

What, Why, & Who: It is difficult to find a range of stories for older students who are emergent readers. In addition, students need a variety of stories that are age-appropriate, engaging, and curriculum-related. These stories were created at workshops, and represent the geography and culture of regions. They were developed by teams at several workshops.

How: See story writing tips in the January, 2006 Tip of the Month at this website: www.aacintervention.com

Most of these stories are very simple, 'transitional' stories. Read about story types in the article, 'Beginning Literacy Framework.'

www.donjohnston.com/research/beg_lit_framework.pdf

Remember, working in teams is a GREAT way to create and EDIT stories for maximum usefulness!

ONTARIO STORIES: Durham School District Workshop, December 06
