

**Geometry in  
my life!!**

*By Taylor*

**This is a  
cube**

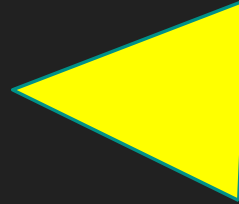

**A cube has all the sides the same no side is longer then the other it has 6 faces I found this cube in the cupboard in my house.**

**Cube!!!**

# This is a equilateral Triangle

**A equilateral triangle has a sides equal it Has three sides it is 2d shape I found this shape in my living room.**

**This is a sphere**

A sphere has no faces  
angles and no edges it is  
perfectly circular I found this  
object in my room.

This is a circle

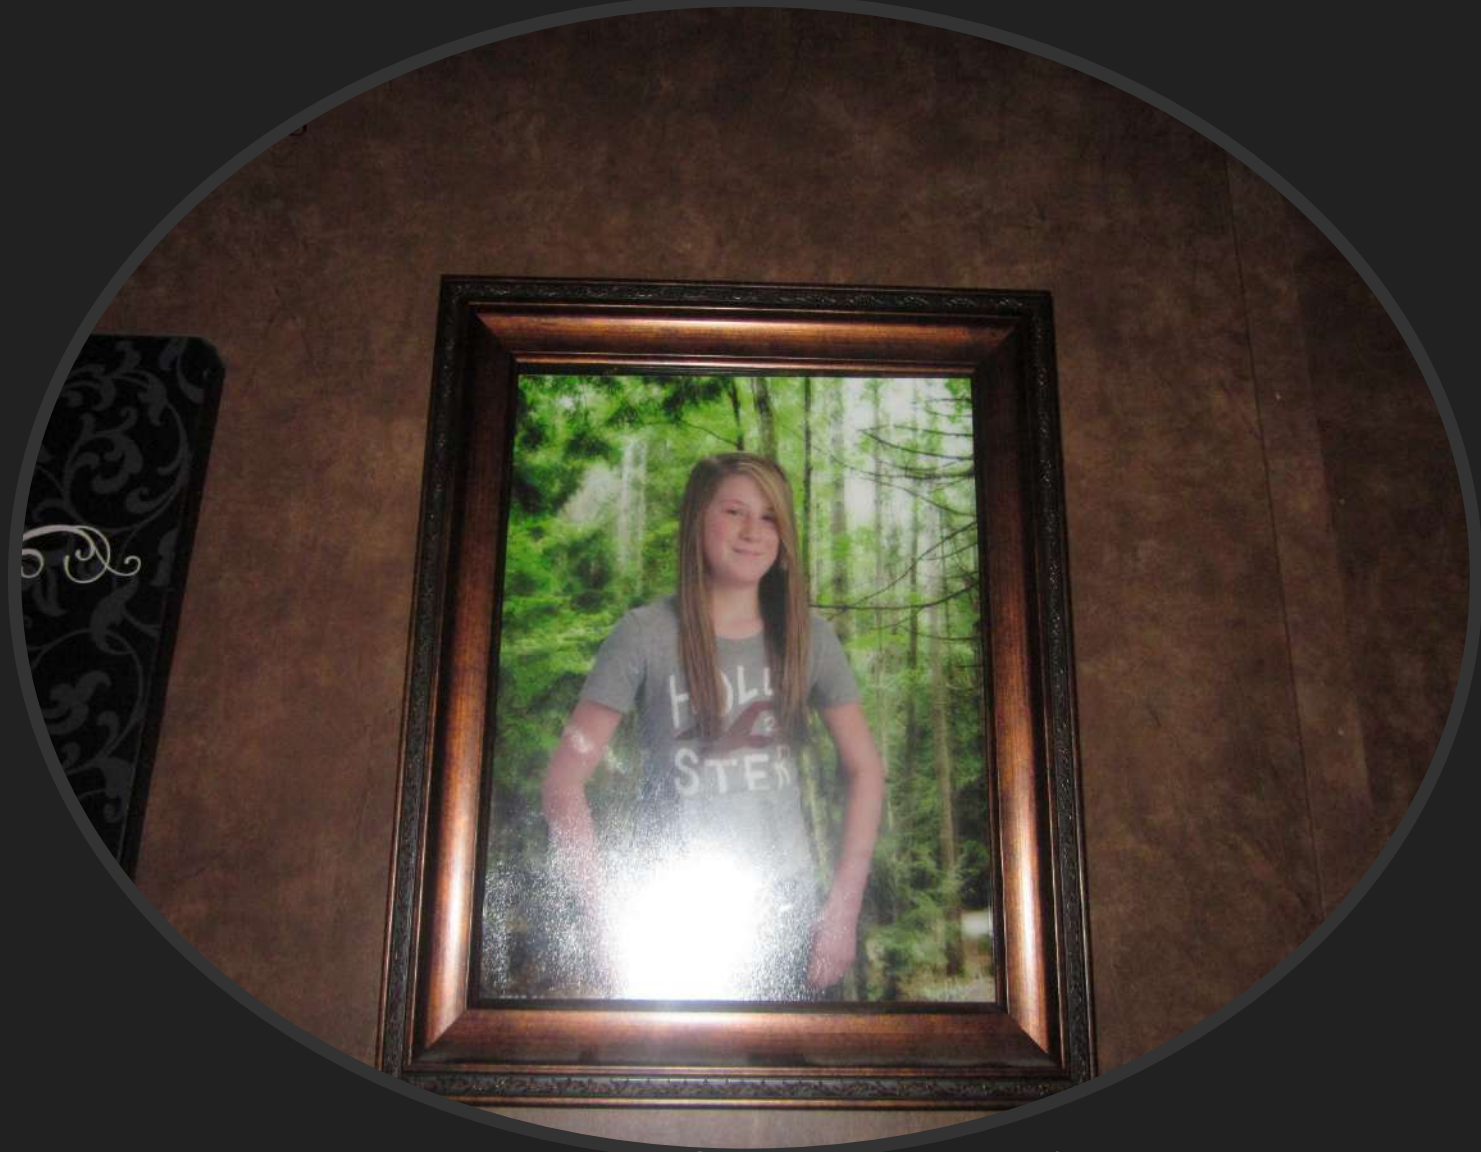

**A circle is a shape with no vertices and I found this object in my living room.**

# This is a Rectangle

A rectangle is a shape that has the top and bottom the same and the left side and the right side the same it has four sides I found this shape on my wall.

The frame is a rectangle

# This is a hexagon

*A hexagon is a shape with six sides all sides are equal to each other I found this shape on my stand it's a fish tank.*

# This is a square

A square has all sides the same there is no side longer then the other there is four edges I found this shape in my kitchen.

# This is parallel lines

Parallel lines are like partners they are never ending lines they never cross each other I found the parallel lines on my sealing.

# *This is intersecting Lines*

*Intersecting lines are like a  $\times$   
and they also cross each other I  
found these intersecting lines on  
my living room wall witch is a  
window.*

# This is a rectangular Prism

*A rectangular prism is a 3D shape it has 6 faces it has 8 vertices 10 edges I found this rectangular prism in my cupboard.*

*This was geometry*  
*in my life by*  
*Taylor Johnson*
