

Google Classroom and Infinite Campus Instructions

The following are some basic instructions for students who are new to the district or have never accessed **Google Classroom** or **Infinite Campus**:

Google Classroom: Username: _____@my.tvusd.k12.ca.us Password: _____

In order to access your student Google Classroom account for the first time, you will need to log in to a **networked** computer either in the GOHS library or in a classroom in order to activate your Google/Computer account. The default username for your account is your 10-digit student number (add two zeros to the beginning if only eight digits). The default **password** is your **8-digit** birthdate (all numbers). After you activate your account on a networked computer you will be able to access your account from home or on a mobile device.

Student Infinite Campus Account: Username: _____ Password: _____

In order to access your student Infinite Campus account for the first time, you will use your student number (either 8-digit or 10-digit). The student number is your username and doesn't change. The default password is your **lower case initials** (first name, last name) **and** your **6-digit** birthdate (all numbers). You will need to access your IC account through the Infinite Campus website at least once before you can access it on the mobile app. ****If you get a message stating your account needs attention, you must enter Infinite Campus through the website rather than the mobile app.**

Parent Infinite Campus Account:

Parents are sent an email regarding the Infinite Campus Parent Portal from the district office when enrolling a student for the first time. Please follow the link in your email to set up your account (If you cannot locate the email, please look in your spam folder). If you have forgotten the password and can't reset it through the "I forgot my password" link, you may contact GOHS to reset your password.
