

Name _____

Date _____

Davon marks a 4-inch paper strip into equal parts as shown below.

- Label the whole and quarter inches on the paper strip.
- Davon tells his teacher that his paper strip measures 4 inches. Sandra says it measures 16 quarter inches. Explain how the two measurements are the same. Use words, pictures, or numbers.

This drawing shows that 4 quarter inches makes 1 inch. This means when Davon counts 4 inches, Sandra would count 16 quarter inches.
