

Name _____

Date _____

Solve.

To practice for an Ironman competition, John swam 0.86 kilometer each day for 3 weeks. How many meters did he swim in those 3 weeks?

3 weeks is 21 days.

$$\begin{array}{r} 0.86 \\ \times 21 \\ \hline 086 \\ + 1720 \\ \hline 18.06 \end{array}$$

He swam 18.06 km in those 3 weeks.

$$18.06 \text{ km} = \underline{\hspace{2cm}} \text{ m}$$

$$18.06 \text{ km} = 18.06 \times (1 \text{ km})$$

$$= 18.06 \times 1000 \text{ m}$$

$$= 18060 \text{ m}$$

He swam 18,060 meters in those 3 weeks.
