1. Fred and Ethyl had 132 flowers altogether at first. After Fred sold  $\frac{1}{4}$  of his flowers and Ethyl sold 48 of her flowers, they had the same number of flowers left. How many flowers did each of them have at first?

$$132 - 48 = 84$$

$$7 \text{ units} = 84$$

$$1 \text{ unit} = 12$$

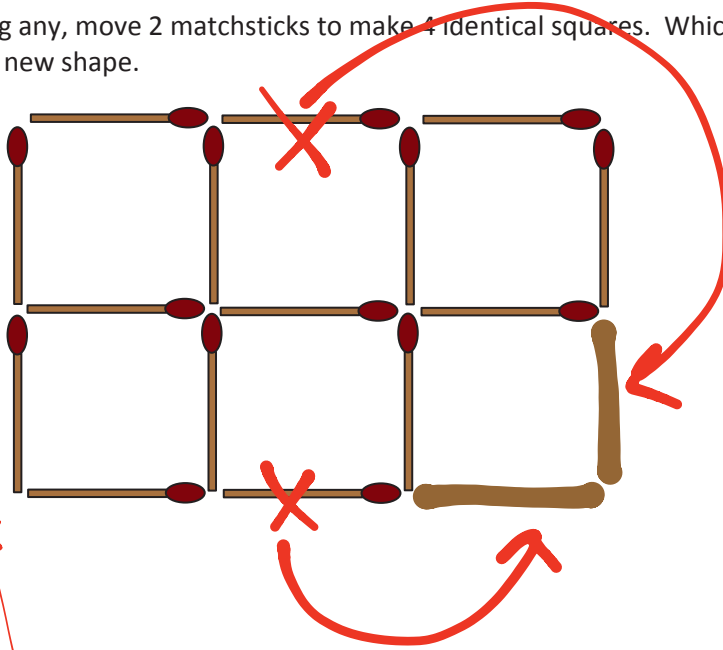

$$\begin{array}{r} 12 \\ 7 \overline{)84} \\ \underline{-7} \phantom{0} \\ 14 \\ \underline{-14} \\ 0 \end{array}$$

$$\text{Fred} = 12 \times 4 = 48 \text{ flowers}$$

$$\text{Ethyl} = 12 \times 3 + 48 = 36 + 48 = 84 \text{ flowers}$$

The following problems are puzzles for your enjoyment. They are intended to encourage working together and family problem-solving fun. They are not a required element of this homework assignment.

2. Without removing any, move 2 matchsticks to make 4 identical squares. Which matchsticks did you move? Draw the new shape.

other solutions are possible

3. Move 3 matchsticks to form exactly (and only) 3 identical squares. Which matchsticks did you move? Draw the new shape.

other solutions are possible
