The Massachusetts Department of Public Health Immunization Division is pleased to make available the 2020-2021 Massachusetts Grade 11 Immunization Survey results by school. Please be aware that the data are limited in a number of ways, including those listed below.

- · All data are self-reported by schools and discrepancies may exist. The Immunization Division continues to work with programs to resolve discrepancies and update immunization data when possible.
- · Not all schools return their survey. Schools without data due to non-response are indicated (*).
- According to departmental guidelines for schools reporting fewer than 30 total students, data cannot be released and are noted (†).
- Schools with fewer than 30 students may have data discrepanices not noted here.
- · Some schools returned surveys that contained discrepancies leading to mathematically impossible rates. When possible, we work with schools to resolve data discrepancies. Schools where rates were withheld due to unresolved discrepancies are indicated (¶).
- Data are collected in the fall, but immunization data are updated throughout the year. Rates during the same school year may be higher than reported if additional children receive immunizations after data are reported. Also, the student body is dynamic; some students join or leave the school, which may affect immunization rates.
- · Children are allowed a medical or religious exemption to one or more vaccines.
- Children without the required number of doses of vaccine do not necessarily have an exemption on file.
- · Children without a record of vaccination who have serologic proof of immunity to certain diseases (measles, mumps, rubella, hepatitis b, and varicella) meet school entry requirements and may be counted as vaccinated.
- · Rates for vaccines are rounded to the nearest percentage point and may slightly under- or overestimate true immunization rates.

Data definitions:

* School did not respond to survey.

| + | School returned survey and reported fewer than 30 total students, so data cannot be released. |
|-------------|--|
| ¶ | School returned survey however, due to data discrepancies, rates are not available at this time. |
| ‡ | Indicates a school with a negative Gap. The Gap is calculated by the Immunization Division based on submitted aggregate data. A school may have a negative Gap due to a student having both a medical and religious exemption or being fully vaccinated with an exemption. Data are self-reported, in aggregate, by schools so the Immunization Division is unable to account for these students who may be double counted in the Gap calculation. |
| 2 MMR | 2 doses of MMR (measles, mumps, and rubella) vaccine. Students with laboratory evidence of immunity to all three diseases are also included in this category. |
| 3 Нер В | 3 doses of hepatitis B vaccine. Students with laboratory evidence of immunity are also included in this category. |
| 2 Varicella | 2 doses of varicella vaccine. Students with a reliable history of chickenpox disease or laboratory evidence of immunity are also included in this category. |
| Tdap | 1 dose of Tdap (tetanus, diphtheria, and acellular pertussis) vaccine |
| MenACWY | 1 dose MenACWY (formerly MCV4) |
| Series | 2 MMR + 3 Hep B + 2 Varicella + 1 Tdap +1 MenACWY |
| Exemption | Medical and religious exemptions combined. |
| Unimmunized | Students with an exemption that have no documented vaccines. |
| No Record | Students reported as not having an immunization record on file. |

Students that have neither all vaccines required for school nor an exemption. This rate is calculated by the

Immunization Division based on submitted data.

Gap
