

<p style="text-align: center;">Grade 5 Unit 6</p> <p style="text-align: center;">Measurement Conversions and Fraction Operations</p> <p style="text-align: center;">Learning Target</p>	Self Assessment			
	+ I could teach someone 	On my own 	With some hints 	Not there, YET 
Section A				
<p>Lesson 1: Patterns of Ten</p> <ul style="list-style-type: none"> • I can convert metric lengths from a larger unit to a smaller unit. • I can explain patterns in the number of zeros of the product when multiplying a number by powers of 10. 				
<p>Lesson 2: Metric Conversion and Division by Powers of 10</p> <ul style="list-style-type: none"> • I can convert metric lengths from a smaller unit to a larger unit. • I can recognize and explain patterns in the placement of the decimal point when a decimal is divided by a power of 10. 				
<p>Lesson 3: Write Powers of 10 with Exponents</p> <ul style="list-style-type: none"> • I can use whole-number exponents to denote powers of 10. 				
<p>Lesson 4: Multi-step Measurement Conversion Problems</p> <ul style="list-style-type: none"> • I can solve multi-step problems involving metric length measurement conversions. . 				
<p>Lesson 5: Convert Liquid Measurement</p> <ul style="list-style-type: none"> • I can solve multi-step problems involving metric liquid measurement conversions. 				
<p>Lesson 6: Convert Customary Length Units</p> <ul style="list-style-type: none"> • I can solve multi-step problems involving customary length measurement conversions. 				
<p>Lesson 7: More Conversion Problems</p> <ul style="list-style-type: none"> • I can solve multi-step problems involving customary liquid measurement conversions. 				

<p style="text-align: center;">Grade 5 Unit 6</p> <p style="text-align: center;">Measurement Conversions and Fraction Operations</p> <p style="text-align: center;">Learning Target</p>	Self Assessment			
	+ I could teach someone 	On my own 	With some hints 	Not there, YET 
Section B				
<p>Lesson 8: Add Fractions with Unlike Denominators</p> <ul style="list-style-type: none"> • I can add fractions with unlike denominators, where one denominator is a multiple of the other. • I can solve problems involving addition of fractions. 				
<p>Lesson 9: Subtract Fractions with Unlike Denominators</p> <ul style="list-style-type: none"> • I can solve problems involving subtraction of fractions. • I can subtract fractions with unlike denominators, where one denominator is a multiple of the other. 				
<p>Lesson 10: Add and Subtract Fractions with Unlike Denominators</p> <ul style="list-style-type: none"> • I can add and subtract fractions with unlike denominators, using an equivalent sum or difference of fractions with like denominators • I can solve problems involving addition and subtraction of fractions with unlike denominators where one denominator is a multiple of the other. 				
<p>Lesson 11: All Sorts of Denominators</p> <ul style="list-style-type: none"> • I can recognize that when adding or subtracting fractions with unlike denominators, a common denominator can be found by multiplying the denominators. 				
<p>Lesson 12: Solve Problems</p> <ul style="list-style-type: none"> • I can solve problems involving addition and subtraction of fractions with unlike denominators. 				
<p>Lesson 13: Put It All Together: Add and Subtract Fractions</p> <ul style="list-style-type: none"> • I can add and subtract fractions with unlike denominators. 				
<p>Lesson 14: Remember the Line Plot</p> <ul style="list-style-type: none"> • I can make a line plot to display a data set of measurements in fractions of a unit. 				
<p>Lesson 15: Problem Solving with Line Plots</p> <ul style="list-style-type: none"> • I can use what they know about operations with fractions to solve problems involving information presented in line plots. 				

<p style="text-align: center;">Grade 5 Unit 6</p> <p style="text-align: center;">Measurement Conversions and Fraction Operations</p> <p style="text-align: center;">Learning Target</p>	Self Assessment			
	+ I could teach someone 	On my own 	With some hints 	Not there, YET 
Section C				
<p>Lesson 16: Compare Products</p> <ul style="list-style-type: none"> I can compare products in a way that makes sense to them. 				
<p>Lesson 17: Interpret Diagrams</p> <ul style="list-style-type: none"> I can compare the size of a product to the size of one factor on the basis of the size of the other factor, without performing the indicated multiplication. 				
<p>Lesson 18: Compare Without Multiplying</p> <ul style="list-style-type: none"> I can recognize that the product of a fraction and a whole number is less than, equal to, or greater than the whole number when the fraction is correspondingly less than, equal to, or greater than 1. 				
<p>Lesson 19: Compare to 1</p> <ul style="list-style-type: none"> I can explain what happens to a given fraction when multiplied by a fraction greater than or less than 1. 				
<p>Lesson 20: Will it Always Work?</p> <ul style="list-style-type: none"> I can make generalizations about multiplying a whole number by a fraction greater than, less than, or equal to 1. 				
<p>Lesson 21: Weekend Investigation</p> <ul style="list-style-type: none"> I can create line plots and use the information to solve problems. I can solve problems involving addition and subtraction of fraction with unlike denominators.
