A Food Web in a Grassland Ecosystem With Five Possible Food Chains

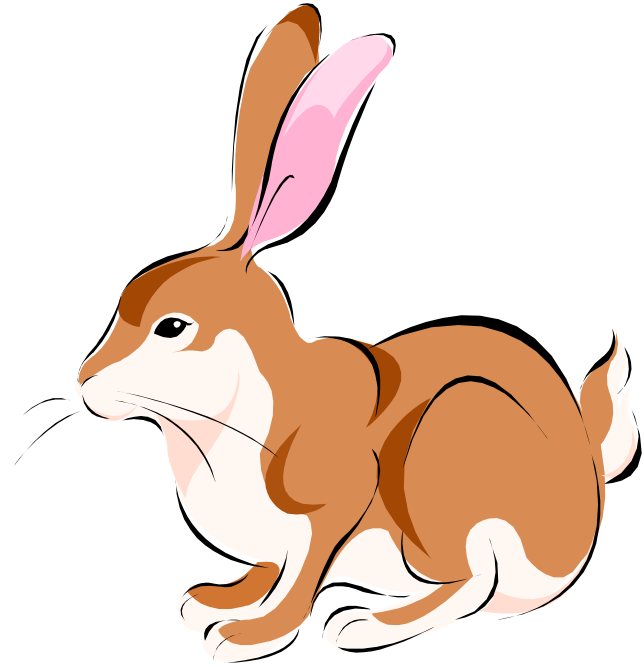

What is the role of a rabbit?

A. Omnivore

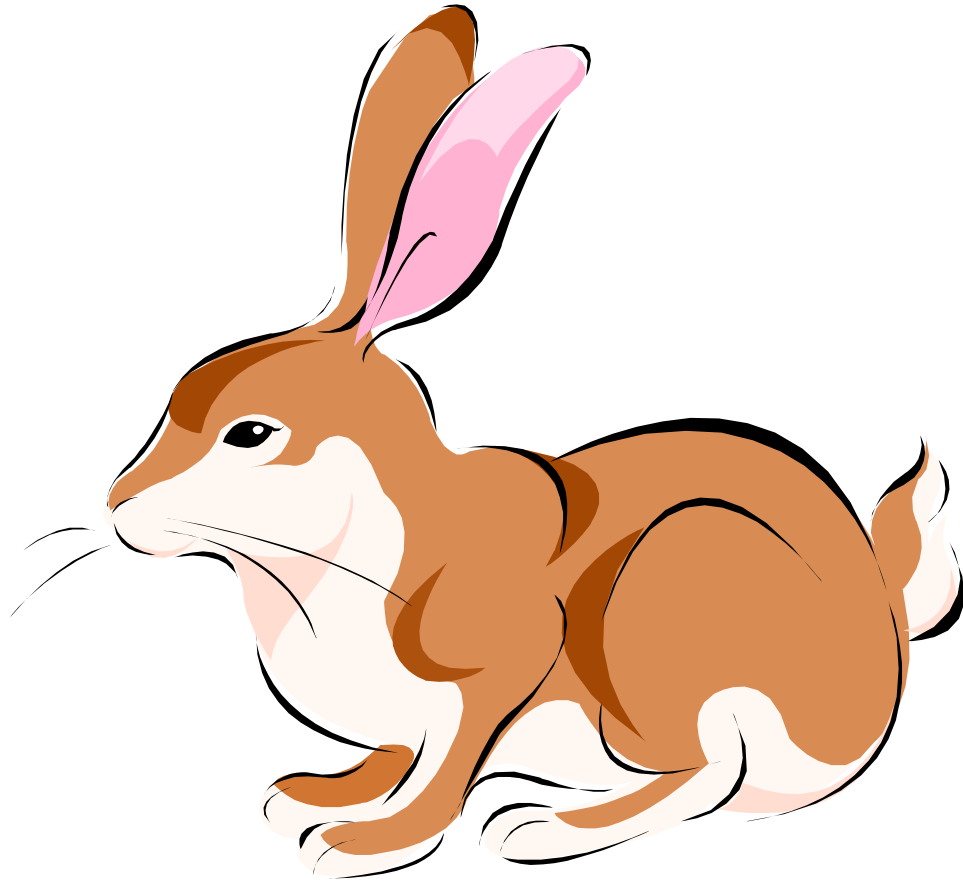

B. Herbivore

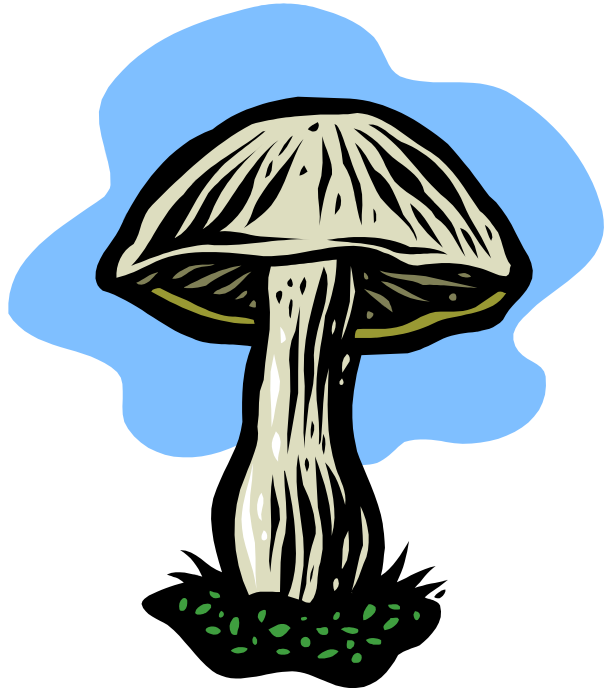

C. Carnivore

D. Decomposer

b. herbivore

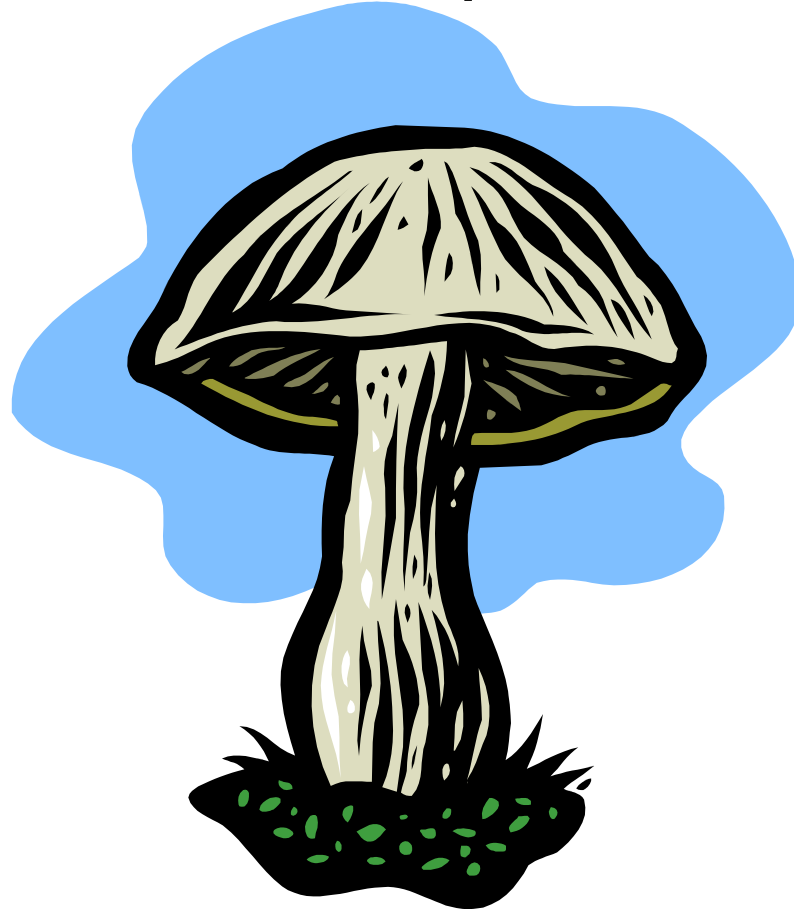

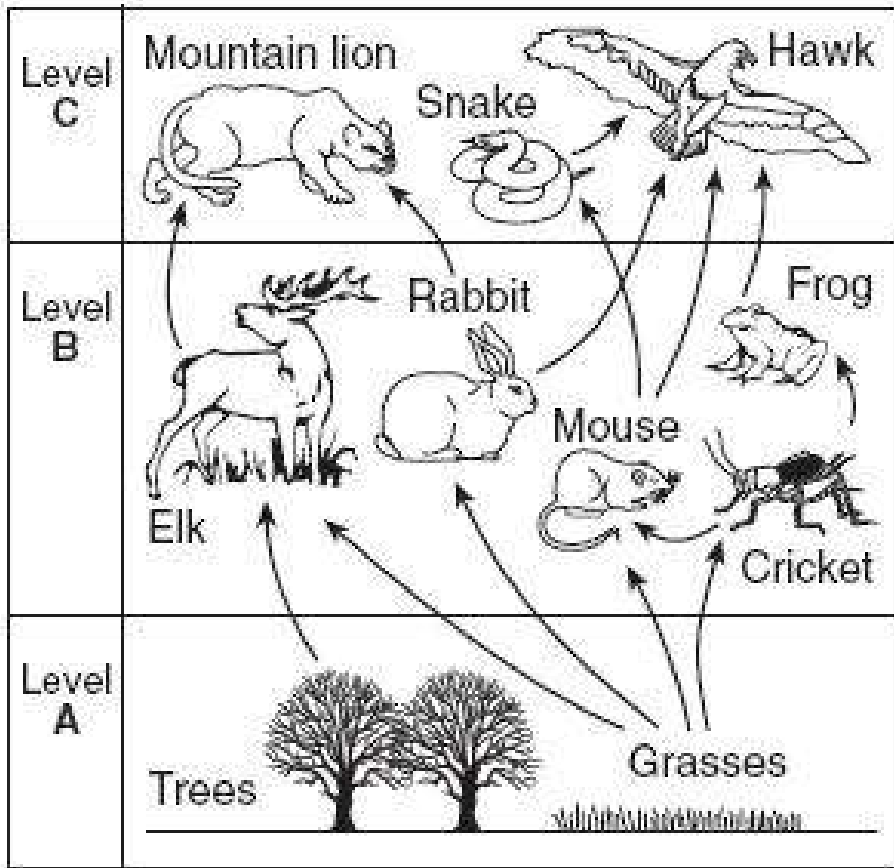

Here is a picture of a mushroom.

What is the role or job of a mushroom?

- A. It is a herbivore
- B. It is a producer because it grows on the ground
- C. It is a consumer because it feeds on other living things
- D. It is a decomposer because it recycles matter from dead plants

d. It is a decomposer because it recycles matter from dead plants

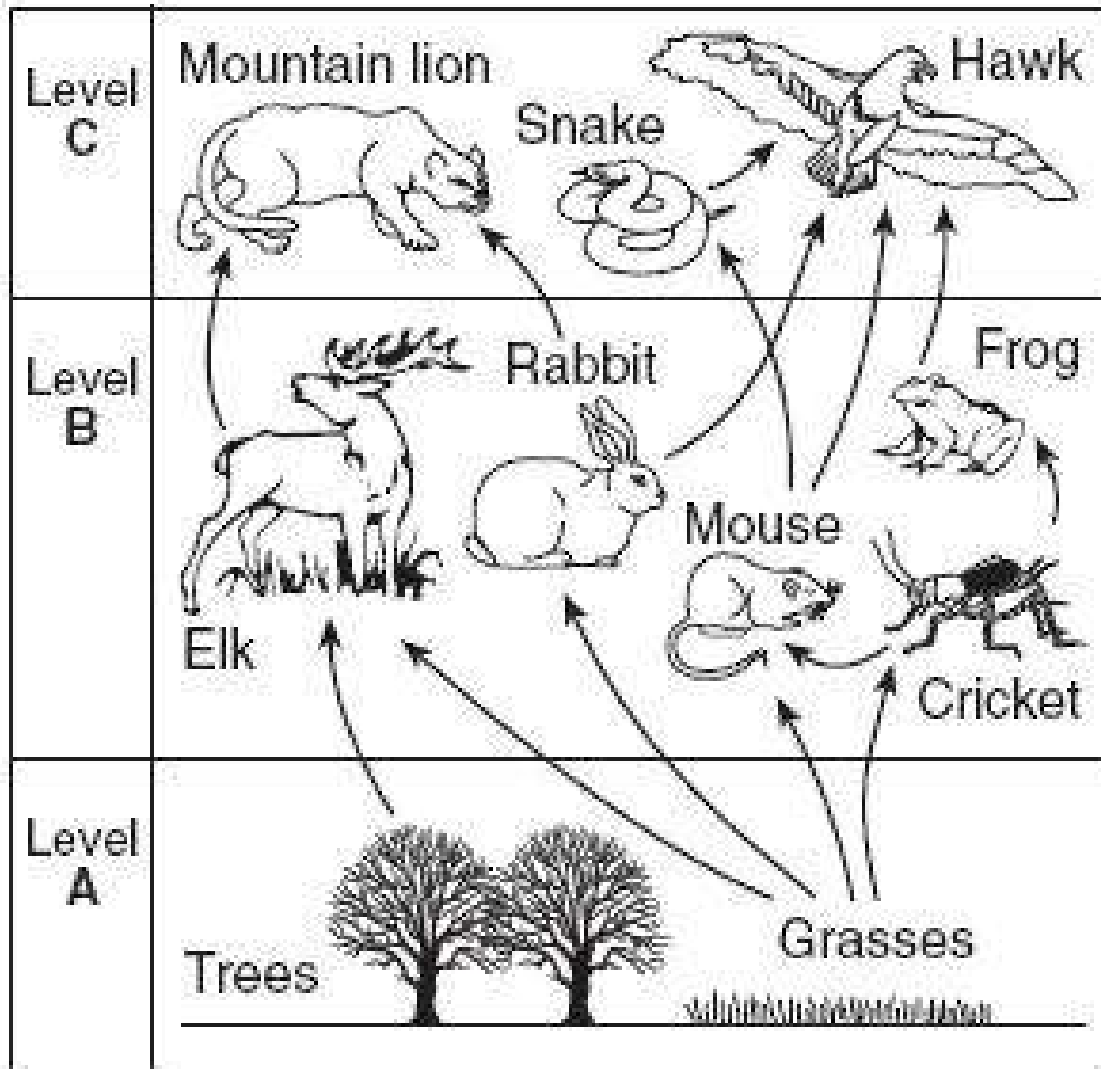

Which two animals compete for food?

- A. Mountain Lion and the Frog
- B. Mouse and the Cricket
- C. Elk and the Trees
- D. Cricket and the Snake

R Mouse and the Cricket

They both eat the grass.

How is the hummingbird helping this flower?

- a. By keeping it warm
- b. By keeping insects away
- c. By pollinating it
- d. By bringing it food

c. By pollinating it

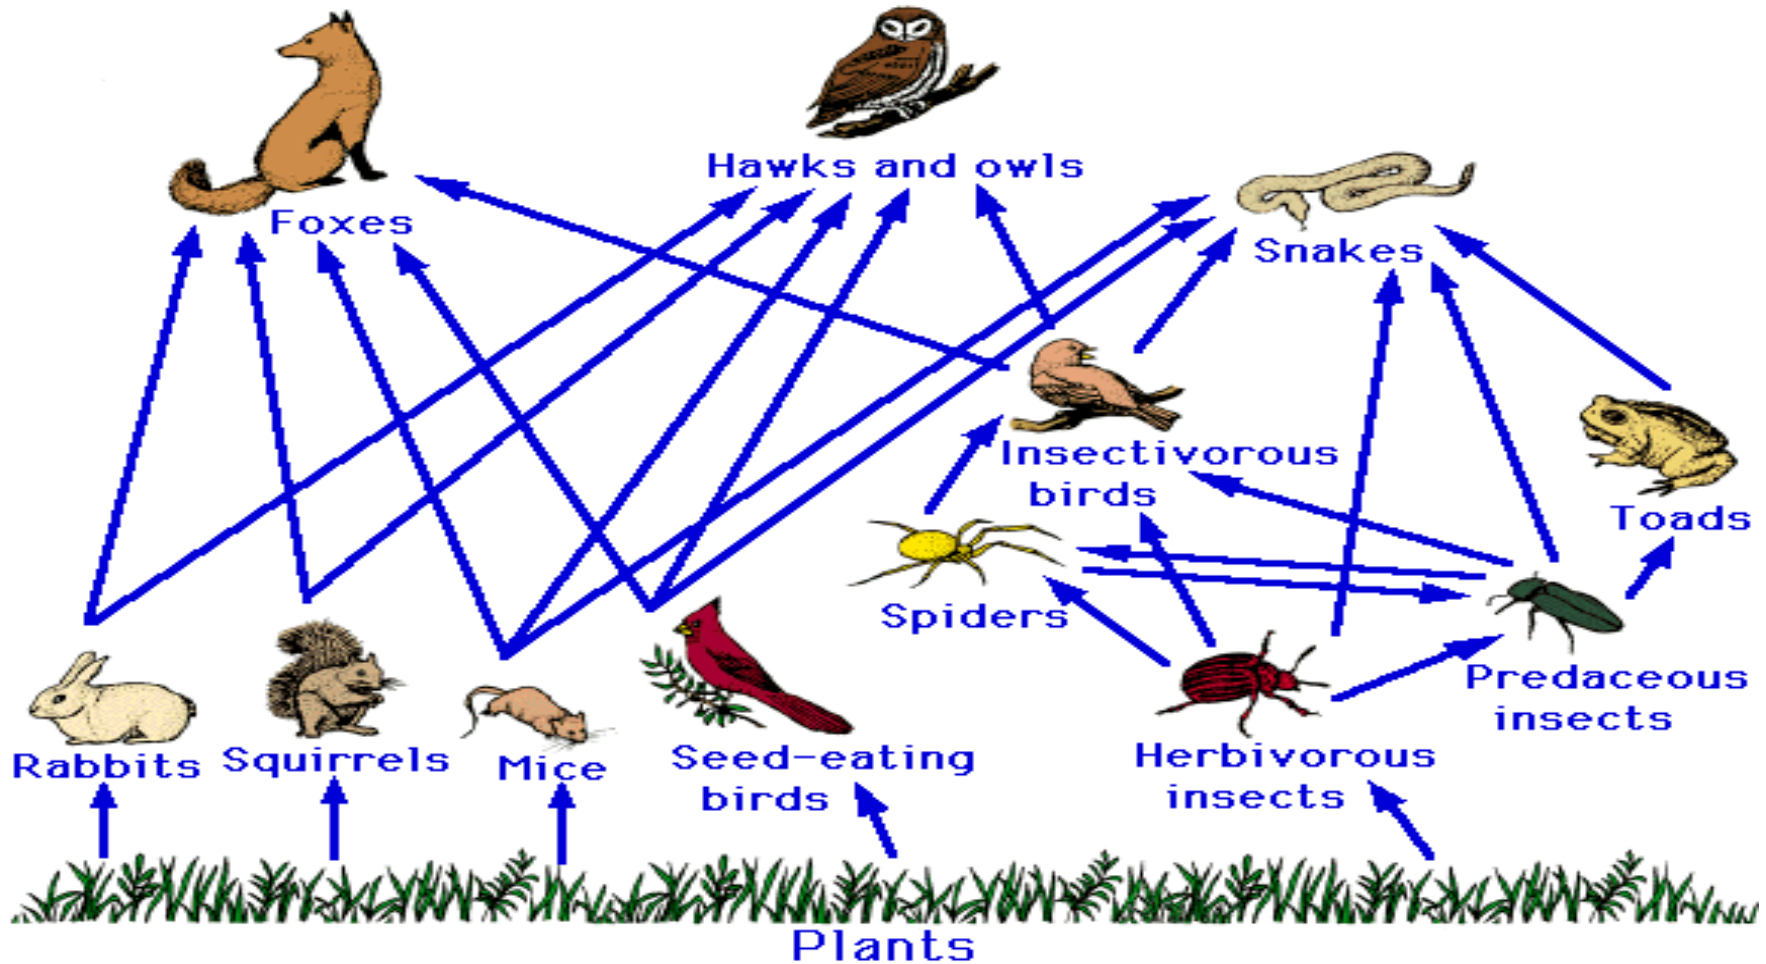

Which 2 animals compete for food?

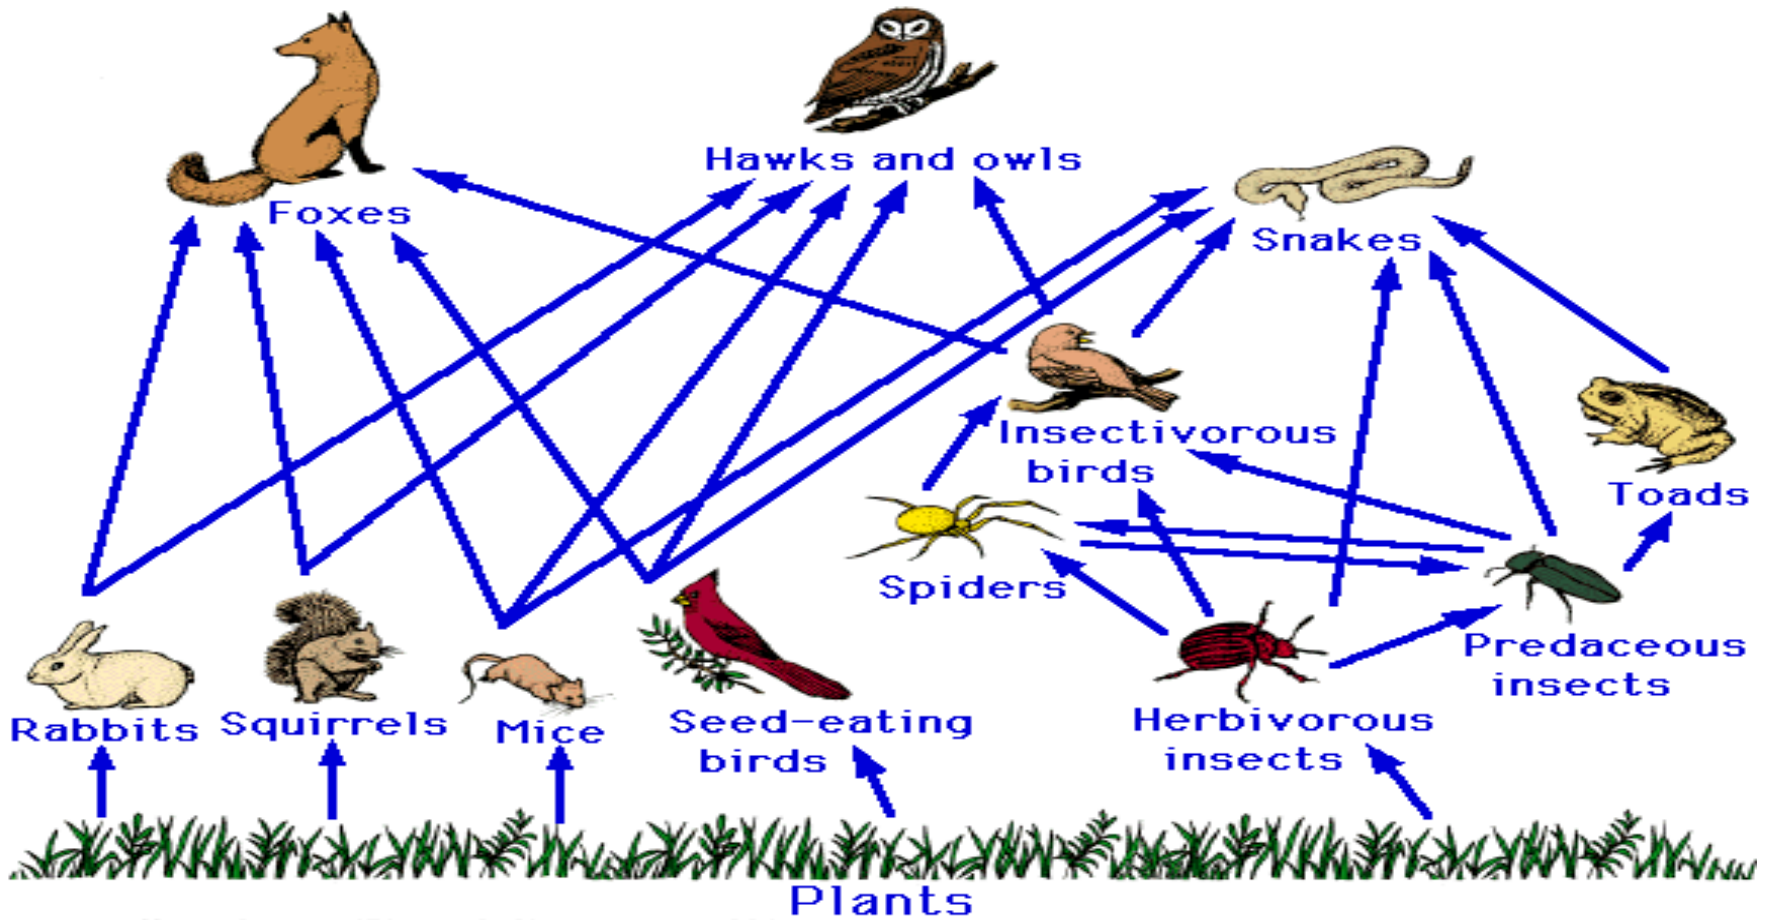

a. Snake/Mice

b. Rabbit/Mice

c. Toad/Fox

d. Squirrel/Snake

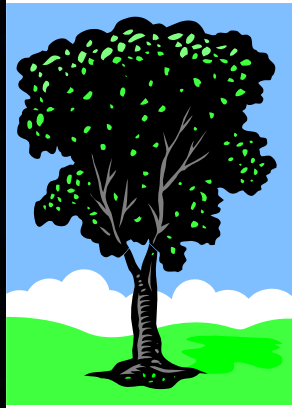

b. Rabbit/Mice
They both eat grass.

Which of these are non-living?

A B

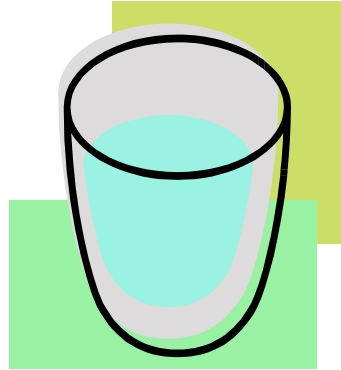

C

D

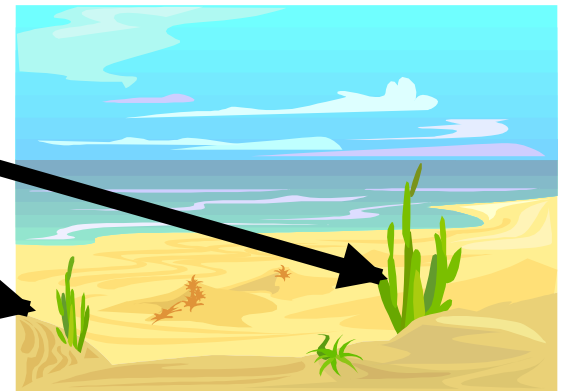

Both "A" and "C" are non-living

these are
alive

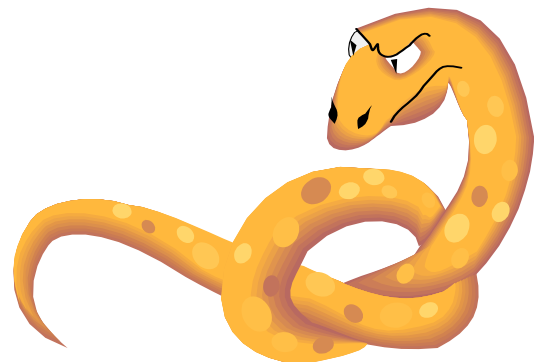

Grass

Mouse

Snake

Which organism provides the energy for all the members of this food chain?

A.Snake

B.Grass

C.Mouse

D.None of these

Grass

What is the job or role of fungus?

- A. They add nutrients to the forest
- B. They destroy trees and plants
- C. They make food for other things
- D. They recycle matter from dead wood and make it available to other living things

D.They recycle matter from dead wood and make it available to other living things

What's the role of a mountain lion?

- a. Omnivore
- b. Herbivore
- c. Carnivore
- d. Decomposer

c. carnivore!

Which of these is living?

The rock

The Tree

The Water

The boat

The Tree

Which if these starts the food chain?

Food Chain

How is this
bee helping
the flower?

- a. It's helping it get larger
- b. It's bring it food
- c. It's helping the flower relax
- d. It helps pollinate the flower

**d. It helps pollinate
the flower.**

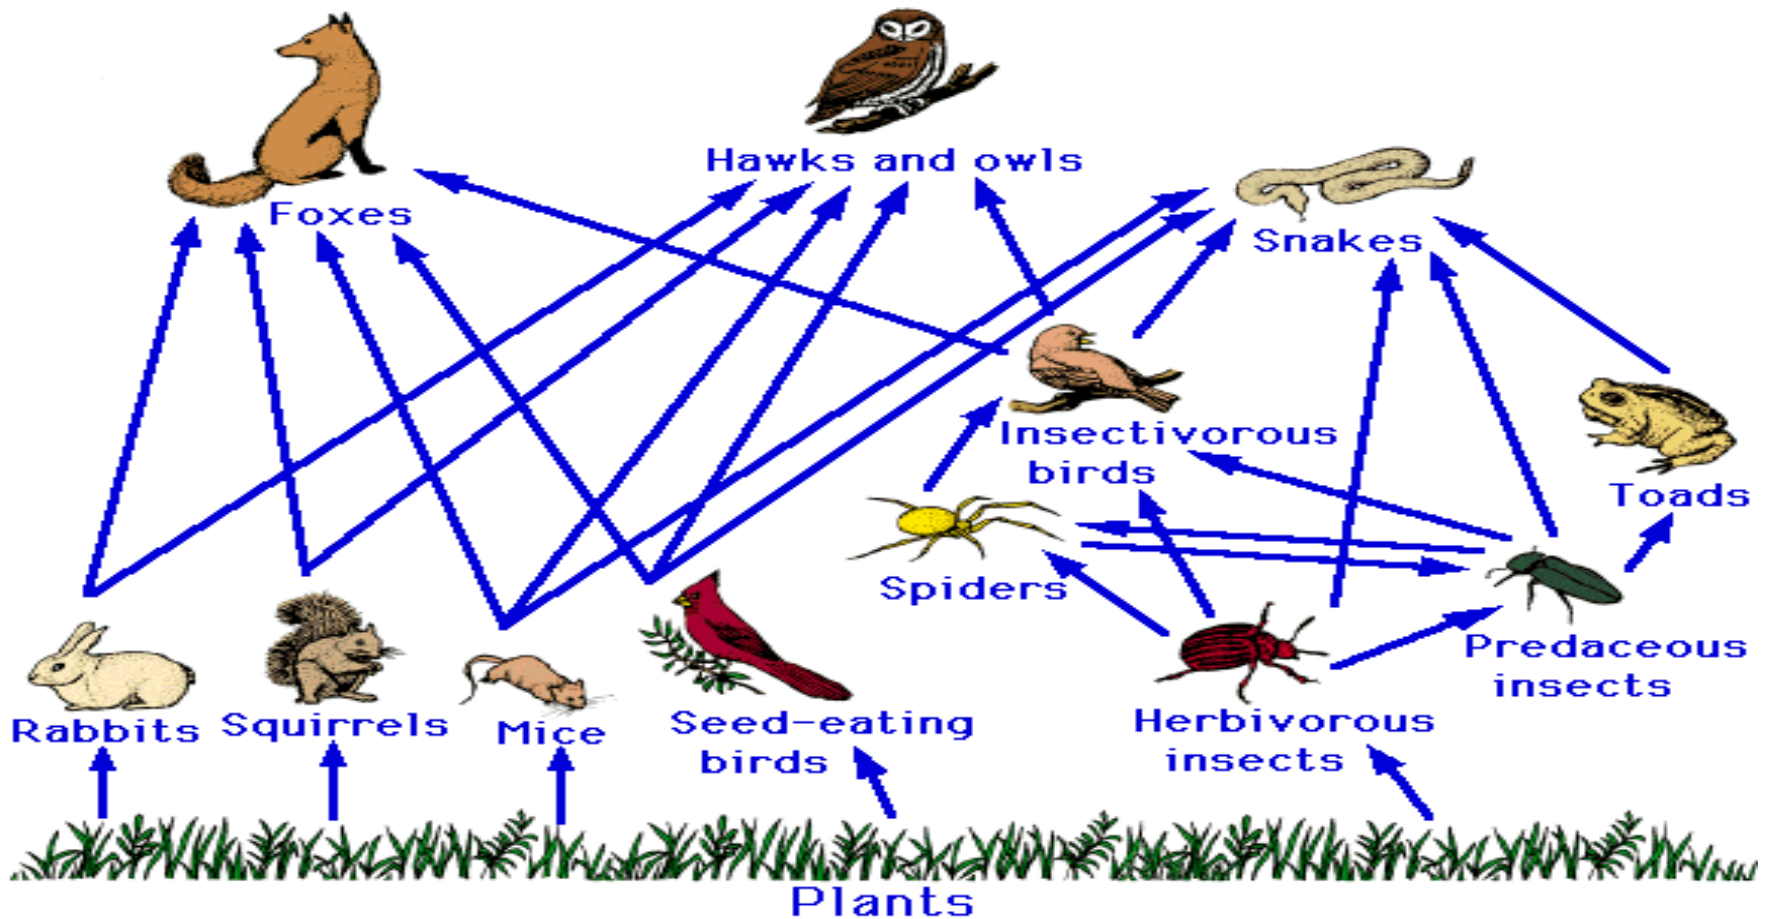

Which 2 animals compete for food?

A. Fox/Spider

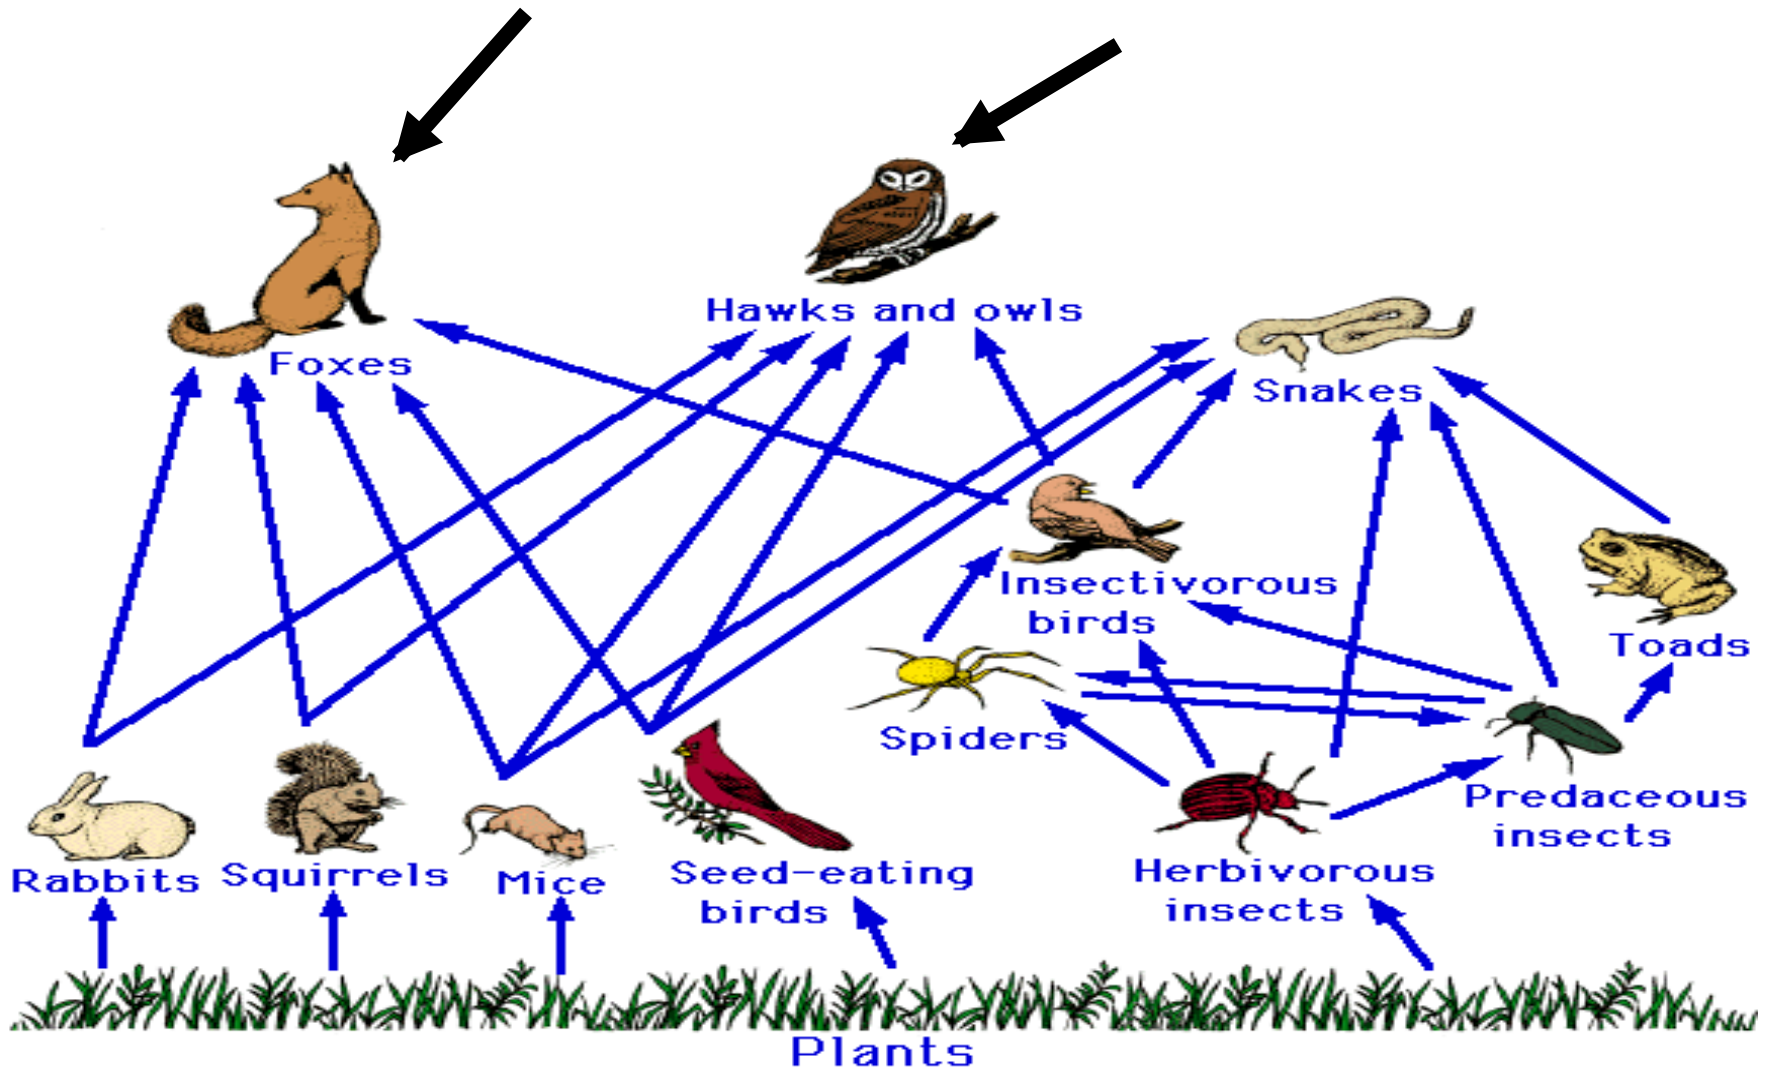

B. Toad/Mice

C. Fox/Hawks/Owls

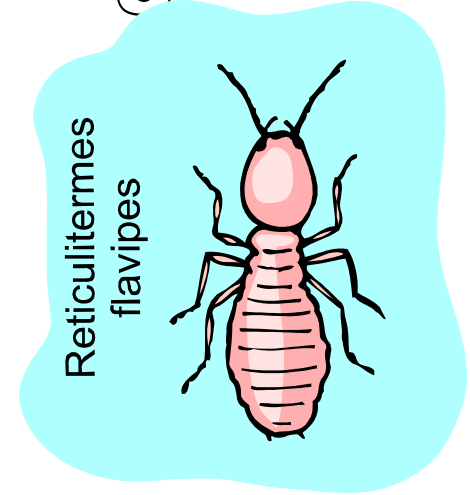

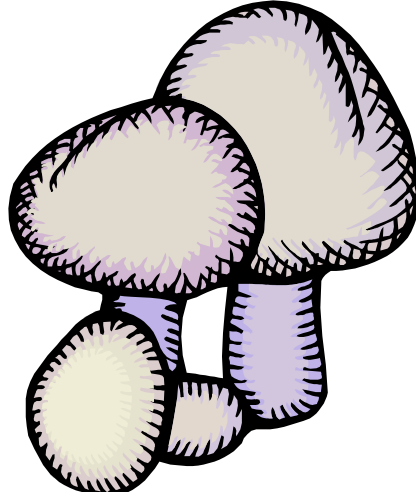

D. Rabbit/Snake

c. Fox/Hawks/Owls

What do we call these organisms?

- a. Carnivores
- b. Herbivores
- c. Decomposers
- d. Producers

What do we call
these mushrooms
growing on the tree?

- a. Producers
- b. Decomposers
- c. Carnivores
- d. Herbivores

b. Decomposers

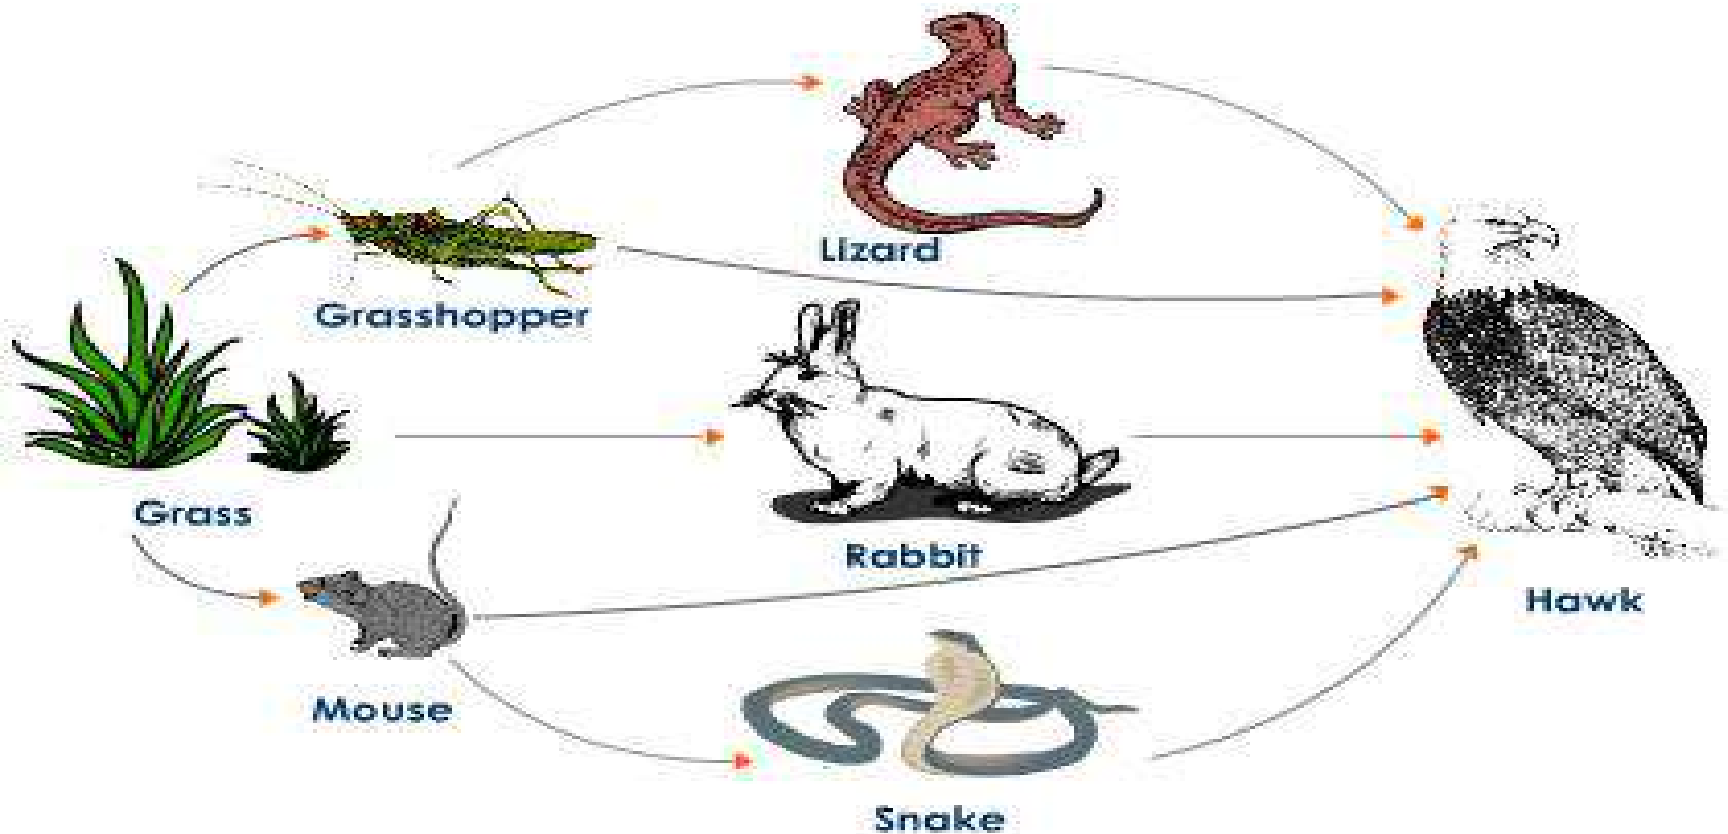

Which compete for food?

A. Grass/Mouse

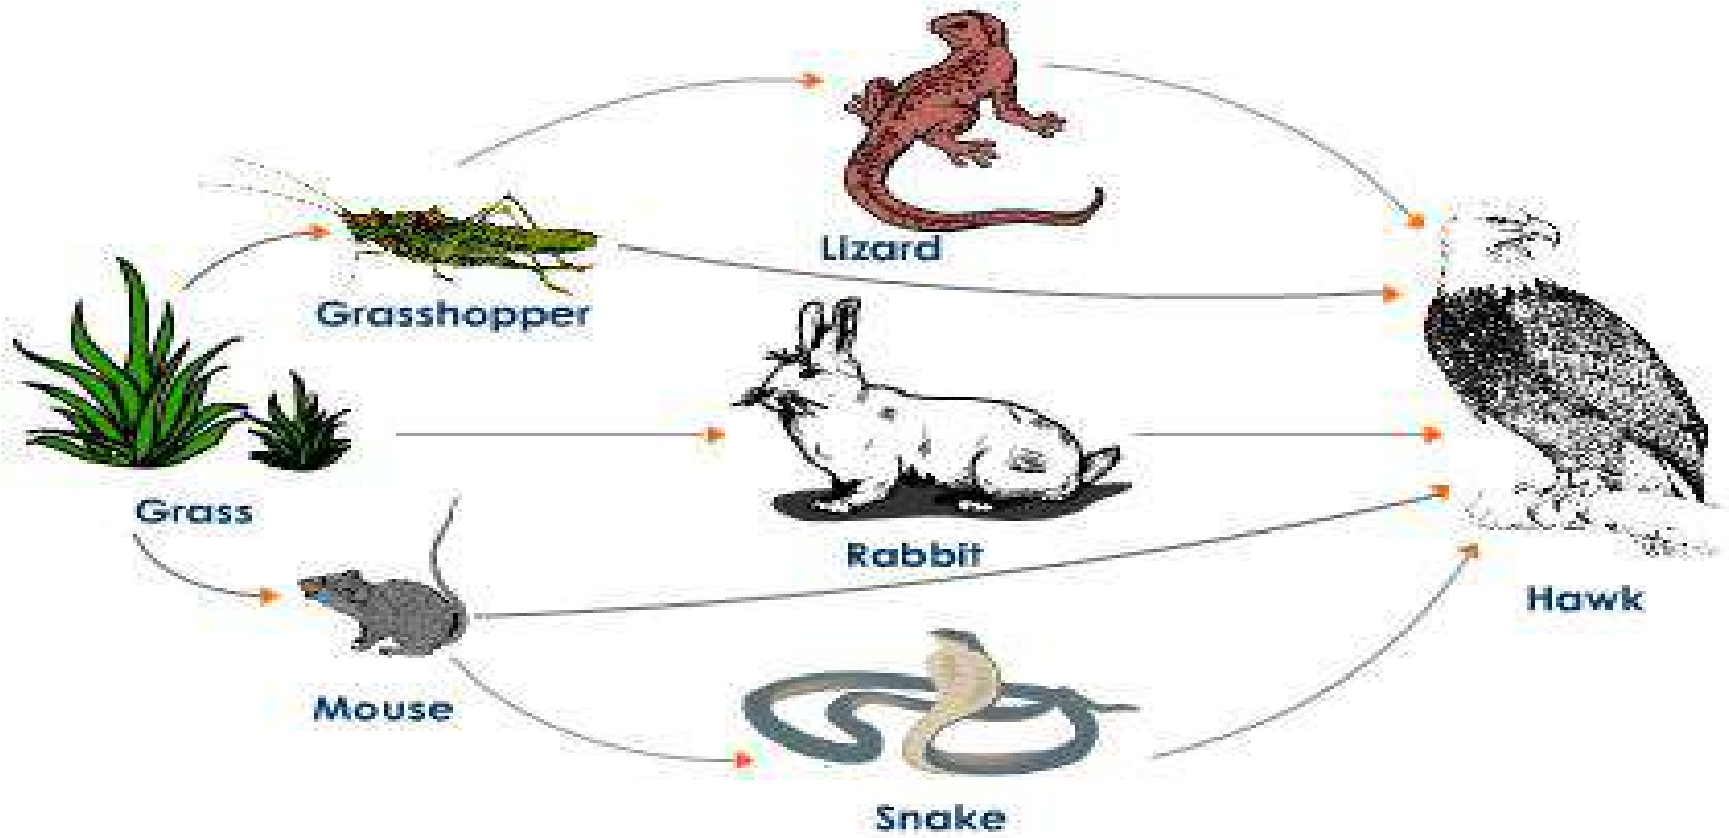

B. Lizard/Rabbit

c. Snake/Mouse

D. Hawk/Snake

A Food Web In a Grassland Ecosystem With Five Possible Food Chains

A Food Web in a Grassland Ecosystem With Five Possible Food Chains

D. Hawk/Snake

They both eat the mouse
